Board of Governors’ Quarterly Meeting Agenda Overview

Boardroom, First Floor
Administration Building
Dixon University Center
2986 North Second Street
Harrisburg, PA 17110-1201

Wednesday, April 6, 2016

Committee Meetings
3:00 p.m. (Boardroom)

Academic and Student Affairs
1. Student Spotlight – Kutztown University of Pennsylvania (PRESENTATION)
2. Supply/Demand Gap Analysis: Summary of Key Findings (PRESENTATION)
3. Recommendation for Approval of Five New Academic Programs (ACTION)
   a. Approval of a Doctor of Education in Educational Leadership and Administration Program at East Stroudsburg University of Pennsylvania
   b. Approval of a Doctor of Education in Transformational Teaching and Learning Program at Kutztown University of Pennsylvania
   c. Approval of a Bachelor of Science in Industrial and Systems Engineering Program at Slippery Rock University of Pennsylvania
   d. Approval of a Bachelor of Science in International Business Program at West Chester University of Pennsylvania
   e. Approval of a Doctor of Psychology in Clinical Psychology Program at West Chester University of Pennsylvania

Action Plans updates (Part 1)
Each university will provide a 10-minute update regarding its action plan.
Board of Governors’ Meeting
Thursday, April 7, 2016
9:30 a.m.

Standing Committee Assignments

Committee reports

Academic and Student Affairs
1. Student Spotlight – East Stroudsburg University of Pennsylvania (PRESENTATION)
2. Annual Syed R. Ali Zaidi Award Recognition of Recipient
3. Recommendation for Approval of Five New Academic Programs

Audit
1. Office of Internal Audit and Risk Assessment (OIARA) Third Quarter Fiscal Year 2015/16 Update
2. Revisions to Board of Governors’ Policy 1991-06-A: State System Audit Policy

Finance, Administration, and Facilities
1. Housing Acquisition and Financing, Edinboro University of Pennsylvania
2. Bond Financing of Various Projects, Slippery Rock University of Pennsylvania
3. Bond Issue
4. Authorization to Issue Refunding Bonds
5. Demolition of Various Buildings, East Stroudsburg University of Pennsylvania
6. Revisions to Board of Governors’ Policy 1996-01-A: Sources of Funding for University Scholarships
7. Pricing Pilots

New business

Working lunch & Action Plan updates (Part 2)
Each university will provide a 10-minute update regarding its action plan.

(Adjourn no later than 2 p.m.)

ITEM # 1

Academic and Student Affairs Committee Meeting
April 6-7, 2016

SUBJECT: Supply/Demand Gap Analysis: Summary of Key Findings (PRESENTATION)

UNIVERSITIES AFFECTED: ALL

BACKGROUND:

Meeting the Needs of the Commonwealth and its Learners:
State System’s Gap Analysis Project[1]

The State System’s Gap Analysis Project is research targeted to determine in which fields Pennsylvania and its regions expect gaps in future workforce needs. Conducted in three phases, the project resulted in the production of 43 reports including:

Degrees of Value: College Majors and the Pennsylvania State System’s Contribution to the Workforce: Prepared by the Georgetown University Center on Education and the Workforce, this report demonstrates the increasing importance of bachelor’s degree holders in the Commonwealth’s workforce and highlights the significant role the State System plays in Pennsylvania’s workforce,

Workforce Characteristics Technical Reports: Specific to Pennsylvania and its regions, the workforce characteristics reports contain a set of economic, workforce, demographic, and socio-economic information to contextualize the gap analysis.

Supply/Demand Technical Reports: Reports that provide a data-driven perspective of employer demand and higher education supply for Pennsylvania and its regions.

The Georgetown Center report was released on January 21, 2016, and key findings from this phase highlighted the growing importance of college-educated workers in Pennsylvania’s economy, the fact that the State System costs less than other sectors and was a major producer of bachelor’s degrees (and higher) in Pennsylvania, and the increasing role of STEM-H within the State System (and the state’s economy).

In this segment of the Board of Governors agenda, key findings from the Workforce Characteristics Report will be presented. The goal of this body of research was to answer key policy questions including:

✓ What is the labor market landscape for Pennsylvania and its regions?
✓ What are the largest skilled occupations employed within the state? What are some characteristics of specific high-volume and high-growth occupations including:
  o Are women or men typically found in the occupation?
  o Do certain races/ethnicities occupy larger shares of the occupation?
  o What is the age distribution of the occupation?
  o What is the educational attainment of workers in the occupation?

[1] To complete the Supply/Demand Gap Analysis, the State System collaborated with Georgetown University’s Center on Education and the Workforce and Oxford Economics to provide key economic research, projections and develop an education program to occupation classification crosswalk that better reflects the employment destinations of Pennsylvania’s post-secondary program completers.
What is the demographic and socio-economic composition of Pennsylvania’s workforce?

Workforce characteristics reports were produced for the state, five broad sub-regions, and 14 university specific workforce regions to facilitate local conversations around workforce intelligence. A Workforce Characteristics Briefing Report was also produced to synthesize the findings for the state and the regions. The results from the State System's Supply/Demand Gap Analysis project will become part of the State System’s Program Alignment Toolkit — an infrastructure of resources that are being created to assist the State System’s universities to increase their individual and collective impact on Pennsylvania’s economy.

SUBJECT: Student Spotlight (PRESENTATION)

UNIVERSITIES AFFECTED: ALL

BACKGROUND: Students are our primary focus. The Academic and Student Affairs Committee is committed to ensuring students are celebrated at each Board of Governors’ meeting.

Music to Your Ears
Kutztown University Physics and the Tesla Coil Orchestra

The Kutztown University physics program offers you a brief synopsis of it program followed by a demonstration of the Tesla Coil Orchestra, created and performed by the students. In 2002, the Kutztown University physics program was limited only to a Bachelor’s of Science degree in physics, and that year had a graduating class of one student. Since then the university improved the program, evidenced by the increased number of student majors, by implementing the following:

- hiring new faculty,
- revising courses,
- improving major requirements,
- supporting undergraduates in research,
- developing career opportunities beyond the major,
- creating internship opportunities.

Currently, the Kutztown University physics program offers a Bachelor of Science with three specialized tracks: physics, engineering physics, and astronomy, as well as a new astronomy minor. Kutztown was recognized by the American Institute of Physics for the second year in a row as the top undergraduate physics-only program in Pennsylvania for graduating physics majors. In other words, the university graduates more physics majors, on average, than any other undergraduate institution in Pennsylvania.

The national average for graduating majors is eight, while Kutztown graduates an average of 16. When compared to more than 1,000 similar institutions nationwide, Kutztown is ranked 24th. Kutztown University has one of the biggest research observatories on the East Coast, enabling professors and students to work on diverse research projects, including the discovery of new planets (exo-planets) orbiting stars outside of our solar system. It also has a new digital planetarium as well as a laser light show system available for use by students for outreach within the university and the community.

The physics program offers unique internship opportunities with industrial companies in the area, such as East Penn Manufacturing, providing students practical application experience that improves their opportunities for employment post-graduation. Students in the physics program demonstrate growth as they create and explore innovative ideas and concepts in their field.
An example of this was the use of a Tesla Coil, originally designed by Nikolai Tesla around 1891, to create electricity in objects without the use of wires. The Tesla Coil can be conceptualized as an apparatus that produces lightning on a small scale. Students were able to build a coil and demonstrate its ability to light fluorescent bulbs without wires. Furthermore, by programming the frequency of the resonating electricity, students are able to use the coils as a musical instrument, essentially using lightning to play songs, while demonstrating the ability of the coils to produce wireless electricity.
Tiffany Visgaitis
My name is Tiffany Visgaitis, and I am a junior physics-astronomy concentration major and math minor at Kutztown University. I grew up in Hazleton and attended Hazleton Area High School. I hold a BFA in graphic design from Temple University and decided to pursue a career in physics after exploring some science and math classes while living in Philadelphia. I relocated to the Lehigh Valley in order to attend Kutztown University to achieve this goal. I am vice president of the Kutztown University chapter of the Society of Physics Students. I also work as a part-time museum and outreach educator at the Da Vinci Science Center (located in Allentown), and privately tutor other students in physics. I enjoy engaging in science with a variety of people of different ages and abilities. The fall semester of 2015 I worked with Dr. Reed, an astrophysicist at Kutztown University, and helped discover an exo-planet (a planet outside of our solar system). I plan on attending a graduate program in physics in order to continue learning about astrophysics, a subject I love, and further my research pursuits.

Jennica LeClerc
My name is Jennica LeClerc and I am a junior at Kutztown University majoring in physics with a minor in mathematics. I am a graduate of Bayard Rustin High School in West Chester. I currently work with Dr. Das on an undergraduate research project in physics. This summer, I will be doing undergraduate research at the College of William and Mary. After college, I plan on going to graduate school for my doctorate in physics. The greatest part of the physics program at Kutztown University is the personal relationship and bond that forms among the professors and the students. They care about the students and always work hard to help them achieve their academic goals. The efforts put forth by these professors help ensure that students have the best chance possible chance at obtaining a successful career beyond Kutztown University.

Stephanie Klein
My name is Stephanie Klein and I am an international student from Reutlingen, Germany. I began my studies at Kutztown University in the fall semester of 2012. This May, I will graduate with a Bachelor of Science in physics. After graduating, I will move back to Germany to pursue a master’s degree in physics at the University of Tübingen. I chose to study at Kutztown University because of the research opportunities offered within the astronomy track. I have conducted research with Dr. Phill Reed since the fall semester of 2013. We have successfully presented posters about this research at two astronomy conferences, the most recent one being the International Astronomical Union General Assembly in August 2015, which was held in Honolulu, Hawaii.

Paul Quinn
My name is Paul Quinn, and I am an associate professor of physics at Kutztown University. I received my bachelor’s degree in physics from Drew University and both my master’s and Ph.D.in physics from Lehigh University. I have been teaching at Kutztown University since the fall of 2002. As a theoretical physicist, I specialize in computational skills and statistical mechanics, fluid mechanics, and granular materials. My research requires me to theoretically explain how various systems of sands and grains react when subjected to different vibrations, and then compare my theoretical results to those acquired by simulations that I build and run using the computer. I have also conducted research in geophysics, solar cell physics, and thermodynamics. At one point, I even did research in food science, inventing a popcorn maker that more efficiently cooks popcorn. Currently, I am finishing my eighth and final year as local chapter president of APSCUF for Kutztown University. I love teaching physics, no matter what the course or the student. My teaching experience ranges from upper level physics laboratories to general education courses for non-science majors. My most recent accomplishment is designing a course titled, “The Physics of Superheroes” for non-science majors to educate students about physics without the use of mathematics, which can be intimidating for some students. It is rewarding to work with the students in our program, and I look forward to continuing this for years to come. My vision is to someday offer a graduate degree in physics at Kutztown University, further enhancing the education of the youth of Pennsylvania.
ITEM # 3

Academic and Student Affairs Committee Meeting
April 6-7, 2016

SUBJECT: Student Spotlight (PRESENTATION)

UNIVERSITIES AFFECTED: ALL

BACKGROUND: Students are our primary focus. The Academic and Student Affairs Committee is committed to ensuring students are celebrated at each Board of Governors’ Meeting.

The East Stroudsburg University Health Education and Alcohol, Tobacco and Other Drug (AToD) Peer Educators are a diverse group of students who are trained to provide educational programs and outreach on responsible student decision-making toward health, wellness, and safety topics, including, but not limited to: alcohol, drugs, sexual violence, bystander intervention, sexually transmitted infections, and stress management. Peer education provides a way for students to talk to other students about lifestyle choices with the goal of harm reduction. Peer education guides students to make personal decisions while encouraging and helping them to make those decisions in safer and healthier ways. Peer educators provide programs, information, and resources that empower students to have a greater understanding of themselves, their relationships, and their environment. Peer educators develop trustful, nonjudgmental connections with students in order to support them in reducing risks in their behavioral choices.

Currently, there are 20 peer educators who participate in a comprehensive week-long training prior to the first week of the fall semester. Additionally, before attending that training, students must complete 30 hours of content and office policy training that was created specifically for Peer Educators and is available on “My Portal.” They must complete a test at the end of each section by passing with a score of 80 percent. Weekly throughout the academic year peer educators meet for one hour for continued training and to discuss trends, upcoming programming as well as successes and challenges that may have arisen. Peer educators are also evaluated annually through a thorough self-evaluation when they score themselves and then are scored by the Health Education & AToD prevention coordinator on a variety of competencies, and are also evaluated throughout the year during programming on their presentation skills.

East Stroudsburg’s trained peer educators deliver varied programs, reaching over 7,500 participants annually, to NCAA and club sport teams, Greek organizations, clubs, academic classes, residence halls, and anyone else who might be interested. They also provide education and awareness at tabling events, flyers, monthly bulletin boards and “Potty Break Bulletins” and outreach cards disseminated throughout campus.

Supporting Documents Included: Handout

Other Supporting Documents Available: N/A

Prepared by: Kathleen M. Howley

Telephone: (717) 720-4200
Zaria Cyriaque
Zaria Cyriaque is a sophomore from Somerville, N.J. She is majoring in hotel, restaurant, and management and has completed a minor in communications with a concentration in public relations. Zaria is in the process of beginning another minor in public health with a concentration in community health. She is very active in the office when it comes to presentations to various groups on campus about healthy lifestyles and awareness of drugs and alcohol and their effects. Through her participation in the Health Education and ATOD Prevention Office, Zaria has been able to educate her peers on a number of health and wellness topics.

Bridget Marley
Bridget Marley is a senior from Havertown, currently completing her internship at the Health Education and ATOD Prevention Office, after completing her pre-practicum with the office last spring. She will graduate in May with a Bachelor of Science in public health with a concentration in community health. Bridget has experience with program development and implementation through her experience as a resident advisor this academic year. Last year she was the vice president for the university's Health & Physical Education Club and attended the state conference and was a voting representative at the state assembly. She was the team leader of the ROCKETS program, which is an after-school program for at-risk children in the campus community, to teach the children about proper nutrition, exercise, and studying habits.

Meleena Olaniyan
Meleena Olaniyan is a first-generation college student in her sophomore year majoring in athletic training. Her goal is to graduate from ESU with her bachelor's degree and to attend West Chester University of Pennsylvania to complete her master's degree in the same field. She spends time doing community service teaching and refereeing young children. Her goal is to make a difference in her peers' lives and feels that being a peer educator is just the right step to making that happen.

Samantha Walz
Samantha Walz is a freshman at East Stroudsburg University from Reeders. Although she is currently undeclared she has a strong interest in communications and philosophy and is looking to declare an interdisciplinary study. From her time working at the Health Education and ATOD Prevention Office, she is also seeking a double major in community health with a minor in women's studies. Samantha is looking forward to working as a peer educator at Health Education and ATOD Prevention over her tenure as an ESU student. She is interested in learning as much as she can from working as a peer educator and sharing that knowledge with others.

Annie Frame
Annie Frame, is a senior peer educator for the Health Education and ATOD Prevention Office from Waynesboro. She will graduate in May with her Bachelor of Science degree in public health with a concentration in health service administration. Following graduation she will complete her internship at the Health Education and ATOD Prevention Office and then go on to complete her Master's of Public Health at West Chester University. During her time at ESU she has had experience working in the community with non-profit organizations, the Swim and Gym and ROCKETS programs. Annie is passionate about increasing knowledge and education to individuals so they are able to live a healthy lifestyle.

Alyson C. Patascher
Alyson C. Patascher, MPH, CTTS, currently serves as the health education and alcohol, tobacco and other drugs (ATOD) prevention coordinator at East Stroudsburg University. She co-chairs the Campus-Community Coalition and chairs the Drug and Alcohol Task Force. She facilitates the Brief Alcohol Screening and Intervention for College Students (BASICS) program.
in which more than 150 students participate annually. She also serves on the board of directors of a local non-profit, Carbon, Monroe, Pike Drug and Alcohol Commission as the vice president. Ms. Patacher has been in her current role at ESU for four years. She has grown the peer educator program from five peer educators to over 20 students, where they develop and facilitate programming on responsible student decision-making toward health, wellness, and safety topics, including, but not limited to: alcohol, drugs, sexual violence, bystander intervention, sexually transmitted infections, and stress management. Prior to accepting her current role, she worked in the Division of Research and Economic Development at ESU in the Office of Sponsored Research. Previously, Ms. Patacher worked in a non-profit organization for nine years, during which she focused on substance abuse prevention, evaluation, grant writing, and compliance.

**Laura Suits**
Ms. Suits has been the graduate assistant for the Health Education & AToD Prevention Office for the past year. She is a student in ESU’s Master’s in Public Health in community health program. She has been instrumental in guiding the peer educators, implementing and evaluating new programming, working with the data received from the NCHA-ACHA and CORE surveys, and advocating for health and wellness within the university and the community. Her background education is a Bachelor of Science in public health with a community health focus at East Stroudsburg University. She played for the women’s softball team at ESU for four years, and served as a pitching coach for one year.

**Doreen M. Tobin**
Doreen M. Tobin, D.Ed., currently serves as the vice president for student affairs and Title IX coordinator at East Stroudsburg University. She came to ESU from Kutztown University where she was the associate vice president of student affairs. She brings to her current position more than 35 years of experience in the field of student services on the university level.

Dr. Tobin has been active at the state and national level and has contributed to a number of State System committees and initiatives including, the Strategic Plan Implementation Advisory Council, the Special Project Team on Alcohol and Other Drugs, and the Undergraduate Women's Leadership Institute.

Dr. Tobin’s areas of interest and intense involvement include diversity and multicultural education, assessment, systemic responses to alcohol and other drug abuse, and women's leadership development. In her role at ESU, she has provided strong leadership for staff development initiatives in multicultural competence, diversification of staffs and student governance organizations, and the expansion of services to support diversified student body needs. Since 2011, Dr. Tobin has worked to assure implementation of Title IX compliance measures through educational programming, responsive policies and processes, and resources to assist victims of sexual assault.
ITEM # 4

Academic and Student Affairs Committee Meeting
April 6-7, 2016

SUBJECT: Annual Syed R. Ali-Zaidi Award for Academic Excellence (Recognition of Recipient will be Thursday)

UNIVERSITIES AFFECTED: All

BACKGROUND: Created in 2000, the Syed R. Ali-Zaidi Award for Academic Excellence is conferred upon a graduating senior from one of the State System universities. This award was founded by Dr. Syed R. Ali-Zaidi, a charter member of the Board of Governors. Funding for this academic excellence award was made possible through gifts from Dr. Ali-Zaidi, Highmark Inc., and the State System Foundation, Inc. Dr. Ali-Zaidi wishes to inspire and honor State System students who exhibit excellence in their pursuit of knowledge.

Candidates for the 2016 award were recommended by their university president at the conclusion of a campus application and selection process that was open to all graduating seniors. Multiple selection criteria included outstanding academic scholarship, including prizes, honors, and honorary societies; participation in extra/co-curricular activities; and a two-page essay by the nominee addressing how the university has prepared him or her for the next career step.

This year, a review panel appointed by the chancellor considered 14 nominees in accordance with the criteria outlined above and ranked three finalists. Mr. Mervin Fansler, a student at Millersville University of Pennsylvania, was selected as the recipient of the 2016 Syed R. Ali-Zaidi Award for Academic Excellence and will receive a check for $1,000, along with a commemorative medallion.

Supporting Documents Included: Millersville University President Nomination Letter, Mervin Fansler’s Resume

December 1, 2015

Chancellor Frank T. Brogan
Pennsylvania State System of Higher Education
Dixon University Center
2986 North Second Street
Harrisburg, PA 17110-1201

Dear Chancellor Brogan:

It is a great pleasure to nominate Millersville University senior, Mr. Mervin Fansler, for the 2016 Syed Ali-Zaidi Award for Academic Excellence. Enclosed are the materials in support of his nomination.

Mr. Fansler has accumulated a superior record of academic achievement at Millersville University. His outstanding academic performance, as demonstrated by his 3.97 GPA, is particularly impressive given the challenging curriculum he has undertaken by majoring in both Computer Science and Mathematics, with a minor in Molecular Biology and Biotechnology. He is also pursuing department honors in both Computer Science and Mathematics, each requiring independent research projects:

- "Developing in silico simulation software to assess the efficacy of a single-fragment amplified fragment length polymorphism (AFLP) protocol," under the direction of Dr. Gary Zoppetti, Department of Computer Science and Dr. Carol Hepefer, Department of Biology, and
- "Computing the transfer of the coalgebra structure on a chain complex to its homology," under the direction of Dr. Ronald Umble, Department of Mathematics.

As Dr. Umble notes, "Mr. Fansler is by far the best and most mature student mathematician to pass through our program during my 32 years as a Millersville University faculty member." This sentiment is unanimous among his faculty instructors and advisors due to dedication, hard work and commitment to academic excellence. As Dr. Hepefer notes "He earned the highest grade in the class that semester and, compared with advanced students I've taught in that course over the past thirty years, he ranked among the very best." We believe one of the reasons for this is because Mr. Fansler has embraced the student-scholar model, recognizing the importance of placing the content he is learning in the classroom into practice by participating in numerous research experiences. His first project was through his selection from a national pool of applicants for a summer REU program funded by the National Science Foundation (NSF) at DePauw University. In this program, he led the design and implementation of a software library used to support teaching functional programming concepts. He then worked with Dr. Zoppetti on his NSF-funded Explore Science, Technology and Health
(ExSciTech) project performed in collaboration with scientists at the University of Delaware. In this project, Mr. Fansler worked as a member of a three student team in which they developed a WebGL game to educate and engage users on biochemical concepts relevant to drug design. Once that project was completed he volunteered in Dr. Hepfer’s lab and quickly mastered technical protocols used in molecular genetics. He isolated and analyzed RNA samples from Doryteuthis pealeii, a species of squid for which he has subsequently generated a draft genomic database. This particular project served as the precursor to his Computer Science Honors Thesis and has provided the impetus for his pursuit of a Ph.D. in the area of bioinformatics with applications to genetic analysis upon graduation from Millersville University.

Mr. Fansler is an exceptional and well-rounded student involved in numerous co-curricular activities. Aside from working as an IT Consultant to assist in putting himself through school, he is a member of the Mathematics Club and the Millersville Programming Team. As a member of the latter, Mr. Fansler competed in the 2015 Pennsylvania Association of Computer and Information Science Educators (PACISE) programming contest in which our team recorded a 1st place finish! Mr. Fansler is also articulate and personable, having presented his scholarly activities at various local venues including Made In Millersville, our university’s campus-wide celebration of undergraduate research and creative activity.

In conclusion, Mr. Fansler is an outstanding student scholar, leader and member of our university community. He embodies the very best qualities of a Millersville University student. As Dr. Zoppetti notes “Merv once remarked that he is driven by projects that allow him to help others accomplish their objectives, and I’ve witnessed this altruism firsthand.” Through his self-motivation, maturity and inquisitive nature, he has set his own bold path that is built upon a clear sense of academic purpose.

I am delighted to enthusiastically endorse Mr. Mervin Fansler for the 2016 Syed Ali-Zaidi Award for Academic Excellence.

Sincerely,

John M. Anderson, Ph.D.
President

Education

Millersville University of Pennsylvania, Millersville, PA
Bachelor of Science, Computer Science, Mathematics [Dual Major]; May 2016 (expected)
Minor: Molecular Biology and Biotechnology
G.P.A.: 3.97/4.0

Research Experience

Millersville University, Department of Mathematics, Millersville, PA, 2015-Present
Research Assistant, Honors Thesis Candidate
Advisor: Professor Ronald Umble
Developed open-source software to parse definitions of cellular complexes and coproducts on them to data structures compatible with the SageMath mathematics system. Developed combinatorial SageMath classes for the Associahedron and Multiplihedron cell complexes. Working toward computing the transfer of coalgebra structure on chain complexes to homology and toward a Departmental Honors Thesis in Mathematics, the results of which are anticipated to yield significant new results in pure mathematics with potential application in medical imaging and related fields.

Millersville University, Department of Computer Science, Millersville, PA, 2015-Present
Honors Thesis Candidate
Advisors: Professor Gary M. Zoppetti, Professor Carol Ely Hepfer
Developing in silico simulation software to assess the efficacy of a single-fragment amplified fragment length polymorphism (AFLP) protocol. Working toward a Departmental Honors Thesis in Computer Science, in joint collaboration with the Biology Department.

Millersville University, Department of Biology, Millersville, PA, 2015-Present
Research Assistant (Volunteer)
Advisor: Professor Carol Ely Hepfer
Isolated RNA samples from the squid species Doryteuthis pealeii. Performed primer design for targeting novel muscle-specific proteins in squid. Configured local BLAST server to provide reliable access to genomes and transcriptomes of interest. Working to identification of isoforms and differential expression of muscle-specific proteins.
Millersville University, Department of Computer Science, Millersville, PA 2013

Research Assistant
Advisor: Associate Professor Gary M. Zappetti
Assisted in development of web-based educational games as part of the Explore Science, Technology, and Health (ExSciTech) project promoting volunteer computing, a joint research project between Millersville University and University of Delaware.

DePauw University, Summer REU Program, Greencastle, IN 2013
Research Intern
Advisor: Professor Brian Howard
Led a team of developers in designing and implementing a software library to support teaching functional programming concepts in an undergraduate curriculum using media computation.

Honors, Awards, and Scholarships

Sage Days 65 Travel Grant 2015
Computer Science Award 2015
Edna Myers Scholarship (Mathematics) 2014, 2015
Lee E. and Laura H. Boyer Award (Mathematics) 2014, 2015
Lee E. and Laura H. Boyer Award (Computer Science) 2014
Donald Fergusson ’70 Scholarship 2014
Willard O. & Dr. Catherine Gibson Havemeier Scholarship (Computer Science) 2014
Mathematics Chairman’s List 2013-2015
Dean’s List 2013-2015
Search for Excellence Scholarship 2002

Mathematics Course Honors:

At the discretion of the professor, a course honors designation is awarded to students of mathematics who perform at an exceptionally high level in a particular course.

Real Analysis 2015
Mathematical Statistics II 2015
Mathematical Statistics I 2014
Elementary Differential Geometry 2013
Linear Algebra 2 2002
Ordinary Differential Equations 2002
Abstract Algebra 2002
Linear Algebra 2002
Calculus I, II 2001
Presentations, Posters

Professional Experience

IT Consultant, Custom Prescriptions of Lancaster, Lancaster, PA 2013-Present
Administer and service the IT infrastructure that supports the operations of a local community compounding pharmacy. Manage social media presence. Provide general help-desk support. Assist in developing Standard Operating Procedures for regulatory compliance.

Freelance Web Developer and Consultant, Self-Employed, Columbia, PA 2012-2013
Designed and implemented web sites according to client requirements, including e-commerce sites. Assessed and provided consultation on IT infrastructure configurations, maintenance, and upgrades.

Front-End Web Developer, LaRouche Policy Institute, Purcellville, VA 2009-2012
Developed web applications to support interactive policy documents and reports, multimedia publications, and advocacy campaigns. Launched and administered websites for clients. Conceived and developed enterprise applications for streamlining media publication workflows.

ITEM # 5

Academic and Student Affairs Committee Meeting
April 6-7, 2016

SUBJECT: Recommendation for Approval of Five New Academic Programs (ACTION)

UNIVERSITIES AFFECTED: East Stroudsburg University of Pennsylvania, Kutztown University of Pennsylvania, Slippery Rock University of Pennsylvania, and West Chester University of Pennsylvania

BACKGROUND: In accordance with Board of Governors’ Policy 1985-01-A: Requirements for Initiation or Change of Credit-Based Academic Programs, with the approval of the respective Councils of Trustees to bring the proposed programs forward for approval by the Board of Governors of Pennsylvania’s State System of Higher Education, and upon recommendation of the Chancellor, the following five new academic programs are put forth for consideration:

a. Approval of a Doctor of Education in Educational Leadership and Administration Program at East Stroudsburg University of Pennsylvania
b. Approval of a Doctor of Education in Transformational Teaching and Learning Program at Kutztown University of Pennsylvania
c. Approval of a Bachelor of Science in Industrial and Systems Engineering Program at Slippery Rock University of Pennsylvania
d. Approval of a Bachelor of Science in International Business Program at West Chester University of Pennsylvania
e. Approval of a Doctor of Psychology in Clinical Psychology Program at West Chester University of Pennsylvania

Supporting Documents Included: Executive Summaries of Degree Proposals and Five-Year Budget Projections for each proposed academic program

Other Supporting Documents Available: Board of Governors’ Policy 1985-01-A: Requirements for Initiation or Change of Credit-Based Academic Programs.

Prepared by: Kathleen M. Howley Telephone: (717) 720-4200

EXECUTIVE SUMMARY OF DEGREE PROPOSAL  
Doctor of Education in Educational Leadership and Administration Program  
East Stroudsburg University of Pennsylvania  
April 6-7, 2016

1. Brief Description of Program and Appropriateness to Mission  
East Stroudsburg University of Pennsylvania is seeking approval to offer a 60-credit Ed.D. program in educational leadership and administration. Since 2000, East Stroudsburg University and Indiana University of Pennsylvania have jointly offered a Doctor of Education in administration and leadership studies on the East Stroudsburg campus. This collaborative program has matured to the point where its curriculum has been mutually designed with IUP and approved through the University-Wide Curriculum Committee of East Stroudsburg. The doctoral program’s courses are taught by East Stroudsburg faculty and its operations are supported by East Stroudsburg administration. With 15 years of experience offering a collaborative Doctor of Education and the passage of Pennsylvania’s Higher Education Modernization Act (Act 104) of 2012, East Stroudsburg University is poised to offer its own professional doctorate to serve the needs its region.

The proposed Ed.D. program is grounded in the belief that effective administrators play a key role in advancing their institutions and the students they serve. This proposed program offers a rich mixture of theory and application through specifically designed courses that are aligned with the university’s mission and strategic plan. The doctoral program will continue to provide entering students a “challenging and contemporary graduate curricula,” “a learning community,” “varied opportunities for student and faculty research,” and “leadership and service in the educational development of the region” through a doctoral cohort/learning community model grounded in theory, critical analysis, and application (University Mission Statement). While alignment with East Stroudsburg University’s mission and strategic plan occur throughout the doctoral program, notable areas of intersection include collaboration with local and regional educational institutions, development and implementation of innovative programs, and fostering a culture of research and continuous program improvement.

2. Need  
The proposed Ed.D. program is designed to enhance leadership and administrative skills of PK-12 and higher education leaders. As such, professions congruent with PK-12 and higher education administration were targeted as part of a comprehensive market analysis. Hanover Research Incorporated (Hanover), U.S. Census Bureau, and Economic Modeling Specialists International (EMSI) are among the resources used to conduct a needs analysis. One of the largest determinants of employment rates for educational administrators, including school principals and superintendents, is government funding for public education (Hanover, 2015). Although a number of states across the country have decreased per-pupil-expenditure since 2008, Pennsylvania has actually increased per-pupil-expenditure during this timeframe and currently ranks 15th by percentile of change in spending per student in the nation (U.S. Census Bureau, 2015). Hanover (2015) also projects substantial growth for educational administration positions throughout the Mideast Region (5.3 percent) with the largest increase being witnessed in educational administration positions in post-secondary education (11.8 percent). Educational administrative positions in the Commonwealth are expected to grow at a rate of 9.6 percent. Data provided by Economic Modeling Specialists International also paints a promising picture for PK-12 and higher education educational administration opportunities in the Commonwealth. During the past year, the percentage of all educational administration positions increased at a rate of 7.3 percent, outpacing the national average of 1.5 percent.
As part of Hanover’s analysis, a survey was administered to prospective doctoral candidates for East Stroudsburg University’s proposed Ed.D. program. Survey results indicated that more than half of the respondents were at least *moderately interested* in pursuing an Ed.D. through East Stroudsburg University’s proposed program with 13.6 percent indicating that they were *very interested* and 13 percent indicating that they were *extremely interested*. Finally, East Stroudsburg University’s collaborative program with IUP has maintained strong enrollments throughout its 15-year existence. The partnership program uses a cohort model. With cohorts starting every other year, the number of students accepted into a cohort represented about half of the number who applied. The number of students accepted, by cohort, is as follows: Cohort 1=17; Cohort 2=15; Cohort 3=21; Cohort 4=23; Cohort 5=13; Cohort 6=21; and Cohort 7=19.

3. **Academic Integrity**

To evaluate East Stroudsburg University’s capacity to independently operate a doctoral program, an external evaluation was conducted by Dr. Mary Salvaterra, professor emerita at Marywood University, who has more than 40 years of experience in education and extensive experience with doctoral programs. Dr. Salvaterra indicated that ESU’s College of Education provided “strong evidence of its logistical ability to mount and support an independent doctoral program.” She also noted that “East Stroudsburg University has sufficient library resources and databases to maintain research capabilities both on campus and on-line.” Her report added that “27 faculty members, representing multiple departments across campus, have qualified for graduate teaching status (i.e. earned doctorate, graduate teaching effectiveness, and scholarly productivity) and have been involved in teaching doctoral level classes and chairing dissertation committees.” Dr. Salvaterra also commented in her report that “the faculties have achieved a high level of experience and scholarly reputations.”

The academic integrity of the doctoral program will be documented, measured, and assessed through the analysis of student performance data. Assessments will continue to be carefully designed and articulated through the program, aligning with institutional learning outcomes and standards in the profession (state and accrediting bodies). To support the ongoing quality of the program and its relevancy, the university has created an advisory council consisting of the dean of the College of Education, the graduate dean/director, doctoral faculty, program director, doctoral students, and other key stakeholders. The role of the doctoral advisory council includes recommending graduate school policies, marketing, and enhancing program relevancy.

4. **Coordination/Cooperation/Partnerships**

Having partnered with IUP for the past 15 years, a number of resource-sharing opportunities are well established and will continue to be in place. These include collaborative professional development opportunities and faculty sharing as appropriate. Library resources are also routinely shared with IUP and libraries throughout the world. It is expected that collaboration with IUP will continue after East Stroudsburg University’s program attains independent status. Collaborative opportunities will also be sought with other State System institutions as other doctoral programs emerge. As with IUP, sharing of library research materials, professional development opportunities, and even engaging in shared research will be of benefit to both programs. While the proposed Ed.D. program will be housed in the College of Education, it will be enhanced through thoughtful and planned collaboration with faculty and departments throughout the university (e.g., faculty from the Psychology, Early Childhood Education, and Exercise Science departments have taught courses in the campus’s collaborative program and faculty representing 10 departments have served on dissertation committees). East Stroudsburg University also partners with a number of outside agencies. The vast majority of the university’s doctoral candidates are practicing administrators. As such, these agencies have opened their doors to research
studies, internships, and a variety of other practitioner-based requirements related to the program. Current partners include local school districts (e.g., Delaware Valley School District, Stroudsburg School District, Pen Argyl Area School District, Nazareth Area School District, Bethlehem Area School District, Scranton Area School District, Wilkes-Barre Area School District, Allentown School District, and Easton School District) and regional partnerships with intermediate units 20 and 21 and schools located in northwest New Jersey, southern New York, and Philadelphia.

5. Assessment
The Ed.D. program’s assessments will include the following: 1) course embedded, standards-aligned assessments; 2) licensure pass rates (from superintendent’s licensure exam); 3) exit surveys; and 4) interviews/surveys of local and regional stakeholders. These assessments will be reviewed by East Stroudsburg University’s Doctoral Advisory Committee in concert with the university’s Office of Assessment and Accreditation. While assessment outcomes will inform programmatic decisions, they will also lay the foundation for Council for the Accreditation of Educator Preparation (CAEP) accreditation. In addition, East Stroudsburg University will apply to the Pennsylvania Department of Education to obtain approval to offer a Superintendent Letter of Eligibility via its doctoral program. Accordingly, program assessment mandates related to the Pennsylvania Department of Education (i.e. Annual Review and Major Review) also will be conducted as required. To document, measure, and assess the achievement of course embedded, standards-aligned, outcomes, course-level student learning outcomes first will be mapped to the Educational Leadership Constituent Council standards and the CAEP standards. To facilitate continuous program improvement, direct evidence of student learning will be entered into our TK20 assessment software and, in turn, assessed each semester to “close the loop” when the course is taught next to demonstrate and sustain an evidence-based culture of assessment. The curriculum is designed to align course-embedded learning outcomes with, and achieve, best practice standards issued by the professional organizations and accreditors.

6. Resource Sufficiency
Given the 15-year partnership with IUP, the current funding measures in place (e.g., faculty and instructional resources) are adequate. Increased expenditures will be incurred as the program moves to independent status. Such increases in expenses, however, will be offset by the fact that the university will no longer be required to remit partnership agreement funds to IUP. Market analyses indicate the Ed.D. program will enroll an average of 20 candidates (per cohort) every other year with a cap of 60 students in the first seven years. On balance, East Stroudsburg University’s Doctor of Education program in educational leadership and administration will be able to sustain growth and program quality as it attracts and prepares leaders in education to fill a well-established critical need in the region.

7. Five-Year Budget Projection
Budget projections beginning fall 2016 and extending five years forward and the accompanying explanatory narrative are attached.

Prepared by: Dr. Joanne Bruno, Provost and Vice President of Academic Affairs
Implementation date: Fall 2016
Date approved by Council of Trustees: April 1, 2016
East Stroudsburg University of Pennsylvania

Budget Narrative

<table>
<thead>
<tr>
<th>ESTIMATED STUDENT IMPACT OF NEW PROGRAM</th>
<th>NARRATIVE/ASSUMPTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Headcount Enrollment</td>
<td>In consideration of Hanover (2015) and the Economic Modeling Specialists International (2015) data, it is reasonable to conclude that ESU’s proposed doctoral program will enroll an average of 20 candidates (per cohort) every other year. Candidates will, naturally, complete the program at different times and attrition (due to graduation and disenrollment) must be considered. As such, the anticipated enrollment is projected: Year 1 – 20 candidates; Year 2 – 18 candidates (based on historical attrition rates); Year 3 – 37 candidates; Year 4 – 37 candidates; Year 5 – 55 candidates. It is expected that the program will reach capacity at 55 candidates. Candidate tuition and supporting fees will drive revenue. Revenue is outlined in the chart below as well. Due to ESU’s proximity to New Jersey and New York, and based on past cohort enrollment data, it is anticipated that two (2) of these candidates would be out-of-state students (or approximately 10%). Cohort 1 (c1) will enroll 20 students (18 in-state/2 out-of-state) in the first year. They will take 18 credits the first two years. In year 3, cohort 1 will take 15 credits. In years 4 and 5, cohort 1 will take 2 dissertation credits/year. In year 3 cohort 2 (c2) takes 18 credits. Cohort 2 loses 2 students into the fourth year when they take 18 credits. In year 5, cohort 2 takes 15 credits. Cohort 3 (c3) starts in year 5 with 20 students.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ESTIMATED REVENUE</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Tuition Generated</td>
<td>The vast majority of the revenue will be driven by tuition. The program consists of 60 credits. Using the 5-year budget projection (attached), candidates will take 18 credits the first two years and 15 credits the third year. Students would then register for one dissertation credit per fall/spring semester until the dissertation is defended (minimum nine credits). As noted above, both in-state tuition rates and out-of-state tuition rates are used in the calculation given the composition of ESU’s current doctoral program. In addition to tuition, all students are assessed $61.00 per credit for instructional support fees. As an example, revenue calculations for instructional support fees were determined accordingly: Year 1 [20 candidates x 18 credits = 360 credits. 360 credits x $61.00 = $21,960]. Using this same calculation, instructional fee support income was calculated for each year of the program.</td>
</tr>
<tr>
<td>Instructional Support Fee</td>
<td>As noted above, Instructional support fees were calculated at $61.00 per credit. The assumption is that in year four, the first cohort will be taking dissertation credits and will not be charged an instructional support fee.</td>
</tr>
<tr>
<td>Additional Program Generated Revenue</td>
<td>N/A</td>
</tr>
<tr>
<td>External Grants &amp; Contracts</td>
<td>External Grants and contracts must be in hand (not planned or hoped for)</td>
</tr>
</tbody>
</table>
In year four, the first cohort begins the dissertation and pays one dissertation credit in the fall/spring semesters. In year four, this is listed under the new category. In year five, this is listed under the existing category.

**ESTIMATED EXPENSES**

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Salaries and Benefits - Faculty</td>
<td>The Professional and Secondary Education department has recently experienced several key retirements and the department is in the process of replacing these people. Therefore, the faculty expense is approximate and based on the first cost/benefit analysis. Trends suggest that more experienced faculty will teach in the doctoral program. This proposal follows a similar process as IUP when identifying faculty eligible to teach in the program. Calculations are based on an assistant and full professor each teaching three courses per year. This would be .375 of an eight course load. Base pay for an assistant professor is calculated at $59,487. Base pay for a full professor is calculated at $96,898. Social Security is included (.0765). Also included is retirement (.0929) and health care costs ($20,623). For example, in year 1 salaries would total $50,226 for a full professor and $33,886 for an assistant professor. In year 3, when cohort 1 is taking only 15 credits, it is assumed the assistant professor would be teaching only 2 courses for cohort 1 (likewise for cohort 2 in year 5). In year 4, the first cohort has started the dissertation and will not be taking any formal classes. According to the CBA, dissertation chairs are paid 3 credits when 3 of their doctoral students have successfully defended their dissertation.</td>
</tr>
<tr>
<td>Salaries and Benefits (Staff, Grad Asst Stipend/ Waiver, Teaching Assistancess, etc.)</td>
<td>A graduate worker will be funded for each new cohort.</td>
</tr>
<tr>
<td>Learning Resources</td>
<td>Library subscriptions for Proquest, Dissertation full text database ($6,800), and Proquest educational journals ($5,064)</td>
</tr>
<tr>
<td>Instructional Equipment</td>
<td>No additional resources needed</td>
</tr>
<tr>
<td>Facilities and/or modifications</td>
<td>No additional resources needed</td>
</tr>
<tr>
<td>Administrative Expense</td>
<td>20% of estimated tuition and fee revenue</td>
</tr>
<tr>
<td>Other</td>
<td>This expense would be for the four retreats extending throughout the three years of coursework.</td>
</tr>
</tbody>
</table>

Academic and Student Affairs Committee Meeting
April 6-7, 2016

SUBJECT: Approval of a Doctor of Education in Transformational Teaching and Learning Program at Kutztown University of Pennsylvania (ACTION)

UNIVERSITIES AFFECTED: Kutztown University of Pennsylvania

BACKGROUND: In accordance with Board of Governors’ Policy 1985-01-A: Requirements for Initiation or Change of Credit-Based Academic Programs, with the approval of the Council of Trustees at Kutztown University to bring this proposed program forward for approval by the Board of Governors of Pennsylvania’s State System of Higher Education, and upon recommendation of the Chancellor, the following motion is put forth.

MOTION: That the Board of Governors approve a Doctor of Education in Transformational Teaching and Learning Program at Kutztown University of Pennsylvania.

Supporting Documents Included: Executive Summary of Degree Proposal and Five-Year Budget Projection

Other Supporting Documents Available: Degree Proposal; Board of Governors’ Policy 1985-01-A: Requirements for Initiation or Change of Credit-Based Academic Programs.

Approved to move forward by: Kutztown University Council of Trustees, March 3, 2016

Prepared by: Kathleen M. Howley

Telephone: (717) 720-4200
Executive Summary of New Degree Program Proposal
Doctor of Education in Transformational Teaching and Learning Program
Kutztown University of Pennsylvania
April 6-7, 2016

1. Brief Description of Program and Appropriateness to the Mission
The Doctor of Education in transformational teaching and learning proposed by Kutztown University is designed to offer education and training to prepare educators who will ultimately transform their classrooms to promote social change. This program is for practicing classroom teachers who hold a master’s degree and are ready to take on the role of practitioner-scholar. Graduates will be able to apply action research to contemporary educational issues and needs, build community-school partnerships, and lead transformational change in the schools using a social justice approach. While traditional Ph.D. programs prepare graduate students for conducting research in a specialized area of educational practice, this doctorate is designed for the career educator – the individual who envisions their career as a lifelong practitioner-scholar in the classroom, working with children and adults to improve lives.

The program aligns with the State System’s Strategic Plan 2020: Rising to the Challenge by adapting to ever-changing student populations, aligning academic programs with real workforce and personal growth needs, and providing greater flexibility in how, when, and where students learn.

The program supports KU’s strategic goals, particularly the second goal related to community engagement, through action research in the classrooms and community-school partnerships. The teacher education program at KU is dedicated to having a positive impact on the lives of children and youth in the Commonwealth of Pennsylvania through the preparation of highly qualified educators. The focus on social justice and closing the achievement gap by helping teachers help learners and schools through engagement in lifelong learning is consistent with the College of Education’s conceptual framework.

2. Need
Continuing education is essential for teachers to stay current and offer the best learning experiences for their students. School districts offer incentives (tuition reimbursement and salary increases) to faculty who engage in continuing education. After earning 26 graduate credits (required for a permanent teaching certificate), many teachers continue studying toward a master’s degree, and Act 48 requires teachers to engage in professional development as a lifelong practice. While a doctorate is not required for K-12 teaching, 15 of 18 Berks County school districts recognize the doctorate for pay incentives and provide reimbursement for doctoral level credits.

Teachers are interested in learning skills that are directly applicable to their classrooms. In September 2015, 700 teachers responded to a market survey that was distributed through superintendents in local school districts. Nearly 400 were interested in or very interested in this doctoral program. Comments include “this program exactly fits my needs” and “I want a program that keeps me in the classroom. I see teaching as a lifelong profession” (Personal communication).

This program targets experienced classroom teachers with 5-15 years of experience, a population of enrollees that replenishes itself as new teachers begin their career every year.
3. Academic Integrity
“The professional doctorate in education prepares educators for the application of appropriate and specific practices, the generation of new knowledge, and for the stewardship of the profession” (Perry, 43). This program requires 60 credits (beyond the master’s degree), distributed as follows: Foundations Core (21), Research/Dissertation Core—Required Credits (21) and Specialization (18). The program will utilize fall, winter, spring, and summer semesters, and it is designed to be completed within three calendar years. Years 1 and 2 will be course intensive, while year 3 will be individualized work focusing on the capstone experience and specialization or individual interest areas of study. The blended delivery format will consist of monthly weekend classes with online webinars, discussions, assignments, and work embedded tasks interspersed between meetings. The program will begin with an intensive, multi-day retreat prior to the initial fall term. An intensive retreat also occurs during each of the two following summers. Since this is a cohort model, participants will enroll in all required courses together and maintain continuous enrollment through graduation.

4. Coordination/Cooperation/Partnership
Kutztown University has a strong history of collaboration with school districts and community partners. The College of Education has developed 81 school partnerships with area school districts for clinical placements and extensive collaborations. Letters of support from several area superintendents speak to the importance of this program in building and maintaining strong university-school relations and partnerships. The exchange of information between graduate students and school administration is mutually beneficial to build stronger school programs and foster a positive school climate (Nath, Guadarrama, and Ramsy, 2011).

All departments in the College of Education (Elementary, Secondary, Special Education, Library Science and Instructional Technology, and Counseling and Student Affairs) will contribute expertise to this program, as will the College of Liberal Arts and Sciences and the College of Visual and Performing Arts. Professional associations and agencies (Pennsylvania Department of Education, Phi Delta Kappa, Pennsylvania State Education Association, and intermediate units) will provide additional avenues for coordination. The location of Kutztown University takes advantage of the proximity to the urban centers of Reading and Allentown and their school districts.

5. Assessment
The assessment plan utilizes action research and competency based-outcomes in all core courses. Action research-based assessments facilitate work as classroom change agents by asking practitioner-scholars to identify specific problems and/or focus areas of interest, diagnose existing contexts, monitor practice, and make recommendations to improve class conditions. It is a reflective process that allows for both inquiry and discussion as components of the research. Data collected will indicate candidates’ understanding of the evidence needed to inform instruction based on student learning outcomes.

Competency-based outcomes (CbOs) have been established for each course. Evidence for mastery of the CbOs is provided through job-embedded applications and artifacts that have a measurable impact on the classroom and underscore the paradigm shift from an emphasis on teacher goals to an emphasis on learner outcomes. Practitioner-scholars demonstrate mastery of a competency through a selection of professional activities. Assessment of CbO completion consists of evidence and artifacts that demonstrate knowledge, understanding, and application to the workplace.
Furthermore, like Kutztown’s nationally accredited bachelor’s and master’s education programs, the doctoral program will have six course-embedded key performance-based assessments to collect data on students’ ability to meet program goals and objectives. For each competency, faculty rate the practitioner-scholar’s level of expertise according to a 5-point scale. Practitioner-scholars write a brief narrative description of the evidence regarding the rating for each competency. Additionally, practitioner-scholars identify five competencies in which they demonstrate expertise and an additional five to discuss with the cohort for improvement purposes. This feedback loop assures that discussion takes place regarding the competencies needed for success in the program.

Taskstream software will be used to collect data on student and program performance. A candidacy exam will be administered after the first year of the program, insuring that students meet baseline program goals and objectives required for program continuation. The dissertation provides a summation of learning in the program. A committee, headed by the associate dean and the doctoral program coordinator, will meet monthly to monitor the assessment system, including implementation of the feedback loop. Data collection will inform decisions regarding program improvement.

Finally, the Secondary Education Department will apply for membership in the Carnegie Project for the Education Doctorate (CPED), a selective group of doctoral practitioner programs. This consortium includes over 80 colleges and schools of education which have undertaken a critical examination of the Ed.D degree with the goal of strengthening the education doctorate.

6. Resource Sufficiency
Kutztown University affirms preparation to allocate sufficient resources to implement and sustain the program. Faculty, graduate assistant, and learning resources will be added, as per the attached budget. Classroom and office facilities in Beekey Educational Center, as well as the university’s course management system (D2L) and videoconferencing software (Blackboard Collaborate), appropriately meet the instructional needs of the program.

Prepared by: Anne Zayaitz, Acting Provost and Vice President for Academic and Student Affairs
Implementation Date: Fall 2017
Date Approved by Council of Trustees: March 3, 2016

ITEM # 5C

Academic and Student Affairs Committee Meeting
April 6-7, 2016

SUBJECT: Approval of a Bachelor of Science in Industrial and Systems Engineering Program at Slippery Rock University of Pennsylvania (ACTION)

UNIVERSITIES AFFECTED: Slippery Rock University of Pennsylvania

BACKGROUND: In accordance with Board of Governors' Policy 1985-01-A: Requirements for Initiation or Change of Credit-Based Academic Programs, with the approval of the Council of Trustees at Slippery Rock University to bring this proposed program forward for approval by the Board of Governors of Pennsylvania’s State System of Higher Education, and upon recommendation of the Chancellor, the following motion is put forth.

MOTION: That the Board of Governors approve a Bachelor of Science in Industrial and Systems Engineering Program at Slippery Rock University of Pennsylvania.

Supporting Documents Included: Executive Summary of Degree Proposal and Five-Year Budget Projection

Other Supporting Documents Available: Degree Proposal; Board of Governors' Policy 1985-01-A: Requirements for Initiation or Change of Credit-Based Academic Programs.

Approved to move forward by: Slippery Rock University Council of Trustees, March 18, 2016

Prepared by: Kathleen M. Howley
Telephone: (717) 720-4200

Board of Governors’ Meeting Agenda – Page 34
Executive Summary of Degree Proposal  
Bachelor of Science in Industrial and Systems Engineering Program  
Slippery Rock University of Pennsylvania  
April 6-7, 2016

1) Brief Description of Program and Appropriateness to Mission

Building upon Slippery Rock’s recently approved engineering degree in petroleum and natural gas and the university’s experiences of offering pre-engineering programs for students planning to transfer to other institutions for completion of an engineering degree program, Slippery Rock proposes a second full engineering program in industrial and systems engineering. This program will be the university’s second engineering degree program, thus allowing more students to stay at the university through graduation. Industrial and systems engineering is primarily concerned with how to improve processes and systems within an organization, particularly those processes that improve quality and productivity.

The proposed industrial and systems engineering program has been designed to provide graduates with the knowledge and capabilities required to successfully practice as industrial and systems engineers. The curriculum was designed to meet Accreditation Board for Engineering and Technology (ABET) engineering accreditation requirements for industrial engineering programs and will be evaluated by ABET as required, after the first student completes the program. Industrial and systems engineers work in project and program management, supply chain management, quality measurement and improvement, ergonomics, technology development, strategic planning, change management, and financial engineering. The industries that employ these engineers include aerospace, manufacturing, banking, consulting, construction, energy, forestry, insurance, medical services, transportation, and many other industries. Techniques used by industrial and systems engineers include lean manufacturing, Six Sigma projects, statistical analysis, diagramming, and other methods to improve effectiveness and efficiencies.

The Bachelor of Science degree in industrial and systems engineering will reflect the university mission “to provide high quality undergraduate and graduate academic instruction” and “to address the educationally-related…needs of the region served by the university” by developing a cost-effective program with robust assessment and working toward accreditation. As such, the new program aligns closely with the university’s mission and strategic plan to educate students to achieve career success.

2) Need

The Bureau of Labor Statistics projects that from 2012 to 2022 the nation will add 10,100 new industrial engineering jobs. These jobs are in addition to the 223,300 industrial engineers currently employed, many of whom are now entering retirement age.

Burning-Glass reported (using 2014 data) more than 80 percent of job postings looking for industrial engineers were for non-industrial engineering positions, including computer systems analysts, logisticians, management analysts, and operations research analysts. Economic Modeling Specialists International (EMSI) data project that these occupations will add more than 295,000 jobs to the national economy between 2015 and 2025, growing by 18 percent, which is faster than the average of 12 percent for all occupations. Additionally, Burning-Glass reported more than 400 online job postings within 150 miles of Slippery Rock in 2014 specified a bachelor’s degree in industrial and systems engineering. By contrast, national data show that 168 bachelor’s degrees in industrial and systems engineering were awarded in the region in 2012-13 (332 including Pennsylvania State University). Data provided by the Bureau of
Labor Statistics (2014) shows that Pennsylvania is among the top five states employing industrial engineers. This suggests that the region’s workforce will continue to need more industrial and systems engineers than are currently graduating, which is a significant opportunity for Slippery Rock.

In a survey administered to current Slippery Rock physics, pre-engineering, and mathematics students in September 2015, there were 79 respondents, with 53 percent indicating they would be very or highly interested in pursuing an industrial and systems engineering degree. These students who are interested in engineering currently transfer outside the State System to complete their degrees. In addition, using the College Board's data, there are 360 students in the 150-mile radius who are interested in industrial engineering (either as a first choice major or any other major) and who will graduate from high school in 2016 or 2017.

By offering the full degree, Slippery Rock will be able to retain more of its current pre-engineering students until graduation, as well as provide opportunities for additional students from other institutions.

3) **Academic Integrity**

The proposed program fulfills the goals of (1) providing strong theoretical and practical approaches to sciences and mathematics and (2) applying principles and skills learned in the general education core, including critical thinking, problem solving, and effective communication in both written and oral format.

To meet the general engineering accreditation requirements, the curriculum must contain a minimum of 32 hours of college-level mathematics and basic science, 48 hours of engineering topics consisting of engineering science and engineering design, and general education components. In addition to these general requirements, the accrediting agency also specifies distinct outcomes for specific engineering fields.

In order to produce skilled graduates that can be successful as professional engineers in the field and to meet the rigorous accreditation requirements and outcomes, the proposed program requires a total of 128 credit hours of coursework. Full-time students will be able to complete the program in four years, or eight semesters, but will need eight more than the typical 120 credits to graduate.

The goal of the proposed program is to produce skilled graduates who will:

- Successfully participate as professional engineers in all industries requiring professional industrial and systems engineers and/or to be successful in post-graduate education.
- Engage in life-long professional development with a commitment to continual professional growth.
- Achieve leadership positions in the industry of their choice.
- Consistently practice professional and ethical responsibilities, and be mindful of the role of professionals in global society.

The educational objectives of the proposed degree program are to give graduates:

- A strong foundation in mathematics, basic sciences, and business.
- An understanding of scientific and engineering principles and the application of these principles in solving process improvement problems using modern tools.
- An understanding of conventional engineering design principles as well as those pertaining specifically to the field of industrial and systems engineering.
• Development of technical communication and teamwork skills, as well as understanding the engineer's professional, ethical, and societal obligations.

4) Coordination/Cooperation/Partnerships
The first two years of coursework required in the proposed program already exist at Slippery Rock and other institutions, and will allow seamless entrance to the upper level courses in engineering. The department is in conversation with Butler County Community College to facilitate transfer. Internships will be sought with local companies for interested students.

The program will be coordinated with the expectations of the ABET accrediting agency. It will also establish an advisory board that includes local industry leaders to ensure that the program is responsive to market needs and expectations.

5) Assessment
To meet the established accrediting criteria, the program must show clear alignment between goals and documented student outcomes. The program will use appropriate, documented processes for assessing the outcomes and analyze the results for the continuous improvement.

Outcomes are produced through a rigorous academic curriculum; appropriate tools will be used to assess the achievement of program goals and student outcomes. Notably, the program requires a capstone design course, which will allow students to synthesize their experiences in both a comprehensive written report and an oral presentation. There will also be two survey opportunities, one at graduation and another five years after graduation, to assess satisfaction with the program and facilities.

After the first student graduates, the program will be eligible for initial ABET accreditation. Until this occurs, the university will operate the program under the required standards and prepare for the accreditation body’s site visit.

6) Resource Sufficiency
The currently available lecture facilities and freshmen and sophomore laboratory facilities will be sufficient to accommodate students in the new program. Existing software is also sufficient for the program at its outset; however, additional licenses might be required. In addition, the existing computer hardware will need to be upgraded and software licenses renewed in years 3 and 4.

The program will require two faculty lines (one in the Physics Department and one in the Mathematics Department). One full-time faculty will be added in year 3 (Fall 2018) and one in year 4 (Fall 2019) in the following specializations: (1) Industrial and Systems Engineering or Industrial Engineering (Physics), and (2) Operations Research (Mathematics).

Slippery Rock University has funds set aside for investment in new programming. The provost has allocated funding toward the startup costs of this new undergraduate degree, with the expectation that the monies will be reimbursed eventually to be used for other new initiatives.

Prepared by: Dr. Athula Herat, Chair, Department of Pre-engineering and Physics
Submitted by: Dr. Philip Way, Provost and Vice President for Academic and Student Affairs
Implementation date: Fall 2016
Date approved by Council of Trustees: March 18, 2016
### ESTIMATED STUDENT IMPACT OF NEW PROGRAM

**Headcount Enrollment**

The Bachelor of Science in Industrial and Systems Engineering program is projected to enroll six new full-time in-state students in year one. Enrollment is projected to reach 58 students by year five with 21 new students and 47 continuing students. Standard University persistence rates are used to calculate yearly progression for continuing students: 82 percent to year two, 73 percent to year three and 67 percent to year four.

### ESTIMATED REVENUE

<table>
<thead>
<tr>
<th><strong>Tuition Generated</strong></th>
<th>Tuition is calculated using the 2015-16 tuition rates for in-state and out-of-state undergraduate students.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Instructional Support Fee</strong></td>
<td>The Slippery Rock University Academic Enhancement fee, approved by the Council of Trustees, for undergraduate students is 10 percent of resident tuition up to a maximum of 12 credit hours.</td>
</tr>
<tr>
<td><strong>Additional Program Generated Revenue</strong></td>
<td>No additional program revenue is anticipated.</td>
</tr>
<tr>
<td><strong>External Grants &amp; Contracts</strong></td>
<td>No external grants or contracts are anticipated.</td>
</tr>
<tr>
<td><strong>Other</strong></td>
<td>The new program investment account will provide funding until the program reaches breakeven ($41,689 in year one, $1,455 in year three and $51,920 in year four).</td>
</tr>
</tbody>
</table>

### ESTIMATED EXPENSES

<p>| <strong>Salaries and Benefits - Faculty</strong> | The existing director of engineering will support the B.S. in Industrial and Systems Engineering program (Associate – Step 13). As such, 10 percent of the director’s salary and benefit expenses will be allocated to the B.S. in Industrial and Systems Engineering degree program. An existing faculty member (Associate – Step 12) will teach one course in the program each year starting in year one. Existing faculty will contribute a .50 FTE faculty line (Associate – Step 12) to the program in year three. A new full-time tenure track will be will be added in year added in year four (Associate – Step 12). |
| <strong>Salaries and Benefits (Staff, Grad Asst Stipend/ Waiver, Teaching Assistances, etc.)</strong> | Existing clerical support in the Department of Physics and Engineering is sufficient to support the Master of Science in Industrial and Systems Engineering program. Staff costs are based on the AFSCME contract that expired June 30, 2015. Ten percent of the clerk typist’s salary and benefit costs (CT 2 – Step 10) are allocated to the program in first two years of the program. The allocation increases to 20 percent in Year Three. |
| <strong>Learning Resources</strong> | Software licenses are budgeted at $6,000 per year. Support for a new full-time tenure-track faculty member will include: $400 per year in professional development and $1,600 to purchase a computer in the first year of employment. |
| <strong>Instructional Equipment</strong> | Existing computer labs will be used to support the program. |</p>
<table>
<thead>
<tr>
<th>Facilities and/or modifications</th>
<th>No facilities modifications are required.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Impact to additional non-major course sections (e.g. General Education)</td>
<td>For all baccalaureate programs, a $4,000 expense is calculated for each new full-time student. For each new part-time student, a $2,000 expense is included in the calculations.</td>
</tr>
<tr>
<td>Administrative Expense</td>
<td>Administrative expenses are calculated at 20 percent of tuition and academic support fee revenue.</td>
</tr>
<tr>
<td>Other</td>
<td>Marketing expenses are budgeted at $10,000 per year. ABET accreditation fees are budgeted at $2,000 per year and begin in year two. ABET visitation expenses are included in year four ($10,000).</td>
</tr>

### Board of Governors’ Meeting Agenda – Page 40
SUBJECT: Approval of a Bachelor of Science in International Business Program at West Chester University of Pennsylvania (ACTION)

UNIVERSITIES AFFECTED: West Chester University of Pennsylvania

BACKGROUND: In accordance with Board of Governors’ Policy 1985-01-A: Requirements for Initiation or Change of Credit-Based Academic Programs, with the approval of the Council of Trustees at West Chester University to bring this proposed program forward for approval by the Board of Governors of Pennsylvania’s State System of Higher Education, and upon recommendation of the Chancellor, the following motion is put forth.

MOTION: That the Board of Governors approve a Bachelor of Science in International Business Program at West Chester University of Pennsylvania.

Supporting Documents Included: Executive Summary of Degree Proposal and Five-Year Budget Projection

Other Supporting Documents Available: Degree Proposal; Board of Governors’ Policy 1985-01-A: Requirements for Initiation or Change of Credit-Based Academic Programs.

Approved to move forward by: West Chester University Council of Trustees, March 24, 2016

Prepared by: Kathleen M. Howley

Telephone: (717) 720-4200
1. Brief Description of Program and Appropriateness to Mission

West Chester University is proposing to add an undergraduate major in international business that will be administered in the Management Department of the College of Business and Public Affairs (CBPA). Furthermore, the proposed program will be compliant with the School of Business’s accreditation status as defined by the Association to Advance Collegiate Schools of Business (AACSB).

Although housed in the Management Department, the program will require courses with an international emphasis from other departments within and outside of the CBPA. In addition to the general education requirements, international business majors will be required to complete the business core course, international business courses, and a set of electives. Students will be strongly encouraged to use the electives to earn a complementary minor from a program outside of the business school. This interdisciplinary approach is intended to broaden students’ competency at identifying, analyzing, and resolving business challenges in an international context and from a range of disciplinary perspectives. Furthermore, students will be encouraged to advance their foreign language skills and complete an international education experience.

Leveraging the success of its current international business minor with current enrollment of 112 students, the purpose of the proposed program is to offer a high-quality and affordable international business major to the Commonwealth’s students. Enrolled students will receive experiences and develop their knowledge, skills, and abilities in preparation for a successful career in international business. The proposed program aligns well with the State System’s strategic plan goals of ensuring academic program excellence and relevance by responding to real workforce growth needs and provides opportunities for Commonwealth students to earn a high-quality, affordable, AACSB-accredited degree in international business. The program also provides students with the opportunity to “obtain credentials that prepare them for life, career, and citizenship.”

The Strategic Plan for WCU emphasizes the integration of international and global themes into the curriculum. The proposed international business major supports the university’s academic goals to strengthen the academic environment and expand academic opportunities to support students and the region. By using existing courses and faculty to provide the degree, the proposed program represents a productive use of university and State System resources.

2. Need

The greater Philadelphia region hosts a number of multinational companies that serve as potential employers of students from West Chester University’s business program. There is currently significant demand from area employers for graduates, especially those with a background in international business. Amerisource Bergin, SAP, Vanguard, Aramark, DuPont, UGI, Johnson Matthey, QVC, and SunGard are just a few of the multinational firms in West Chester’s region that have a direct need for qualified employees possessing the technical and analytical skills provided in the proposed business program with an understanding of the international context of global markets provided through a degree in international business.

In addition, West Chester’s service region is a hub for the pharmaceutical industry, with multinational firms such as GlaxoSmithKline, AstraZeneca, Merck and Co., and Johnson &
Johnson employing substantial numbers of workers from the region contiguous to West Chester. All indicators suggest that the job market for qualified international business majors will continue to improve as firms will compete for this increasingly valuable labor pool. A program in international business will address this need and provide West Chester students with the opportunity to join the global labor market. Due to the need in the Philadelphia region, if approved, this program is one that West Chester would like to offer at the State System site in the city as well as on the West Chester campus.

3. **Academic Integrity**

The proposed program is unique in that it would be the only AACSB-accredited international business degree program located in the eastern half of Pennsylvania. Shippensburg University does have a track in international business as part of its management degree, however; this program is distinctive, as students are required to take 24 credits beyond the business core, where others require only half of the required credits beyond the core. Further, only 6 of the 24 credits for the West Chester proposed program address management topics, which represents a truly interdisciplinary international business degree.

The WCU proposed international business program is designed as a field of study that extends beyond the domain of management, giving students a broader frame of international business through the discovery of areas outside of the traditional management degree. These topics include international relations, global history, history of civilization, and world geography. The international business program will also strongly encourage students to (1) earn a complementary minor from a program outside of the business school, (2) develop their foreign language skills, and/or (3) complete and international education experience.

The goal of the proposed program is to offer a high-quality and affordable international business program to the Commonwealth’s students. Enrolled students will receive experiences and develop their knowledge, skills, and abilities in preparation for a successful career in international business. From a variety of perspectives and disciplines, the program seeks to develop and disseminate knowledge concerning:

- the practice of global business across geographic and cultural boundaries;
- cross-border inter- and intra-organizational relationships; and
- multinational enterprises (MNE) and the institutional, financial, sociocultural, and sociopolitical contexts within which the MNE is embedded.

4. **Coordination/Cooperation/Partnerships**

The proposed program is designed to allow students to earn a complimentary minor. Such minors are offered by various departments across the university including history, biology, chemistry, communications, computer science, geology and astronomy, languages and cultures, mathematics, and physics. This program design facilitates student and faculty interactions across schools, which may facilitate multi-disciplinary teaching and scholarship.

The program will promote the international educational experiences championed by the Center for International Programs. The center provides support for three types of international education programs: faculty-led, exchange, and programs offered by our nine affiliated partners. The center assists with all aspects of the application and pre-departure process to ensure that every student has an opportunity to successfully complete an international program, and maximize their academic and personal growth.

Advisors for the proposed program will work with members of the Chester County International Business Council and their affiliations to find educational, career, and internship opportunities.
for enrolled students. Additionally, the program has secured letters of support from international corporations, including AstraZeneca, Johnson Matthey, Kreischer Miller, Colorcon, and GlaxoSmithKline, which provide external support for the need of the proposed program.

5. **Assessment**

The assessments for the proposed program are organized along five goals. 1) **Oral Communication**: Students will identify and apply the appropriate methods to effectively communicate information of a business nature to a multi-cultural audience. This item is assessed through a presentation rubric administered in FIN 372 International Finance / ECO 338 International Economics. 2) **Global Awareness**: Students will recognize the global context and how it relates to managerial decisions. This item is assessed through (1) final exam essay questions in FIN 372 International Finance / ECO 338 International Economics, (2) a global strategy tactics project in MKT 404 International Marketing, and (3) a multinational company strategy group project in INB 469 International Management Seminar. 3) **Corporate Social Responsibility**: Students will develop their understanding of the mutual responsibilities that exist between organizations and their stakeholders. This item is assessed through an essay in INB 469 International Management Seminar. 4) **Business Ethics**: Students will increase their awareness of the ethical dilemmas that organizations face and practice applying analytical tools to interpret them. This item is assessed through an essay in INB 469 International Management Seminar. 5) **Governance**: Students will recognize how ethical leadership contributes to organizational success and societal well-being. Item assessed in essay in INB 469 International Management Seminar.

6. **Resource Sufficiency**

West Chester University is committed to providing adequate faculty positions to support the growth expected in the department as a result of offering the B.S. in international business. In addition, the necessary physical resources and facilities have been identified. The faculty members of the university are qualified to offer teaching, mentoring, and advising students in international business. All full-time tenured and tenure track faculty members maintain active research agendas. These individual teacher-scholars are fully equipped to provide instruction related to international business. Following an initial university investment of $80,000 in years three and four, the program will again realize self-sufficiency in year 5.

*Prepared by:* Jeffery L. Osgood, Jr., Ph.D. and Matthew Shea, Ph.D.

</tr>
<tr>
<td>Headcount Enrollment</td>
<td>The headcount enrollment projections are based on the following assumptions: 1) First year enrollments are students converting from existing majors in year three of their studies. 2) Year two includes conversion of students from existing majors in year two of their studies. 3) Full-time students are projected to persist for four years. 4) Part time students are projected to persist for six years. 5) We are using a historic year-to-year retention of 82 percent, rounded up. 5) No out-of-state students in this program for the first five years given the College of Business &amp; Public Affairs (CBPA) ratio of in-state to out-of-state of 10:1.</td>
</tr>
<tr>
<td><strong>ESTIMATED REVENUE</strong></td>
<td></td>
</tr>
<tr>
<td>Tuition Generated</td>
<td>Using current tuition rates of $7,060 per year for full-time students and $294 per credit for part-time students.</td>
</tr>
<tr>
<td>Instructional Support Fee</td>
<td>Using WCU’s currently approved instructional support fee for each year of the 5-year budget projection, which is either $706 per year for full-time students and $29.42 per credit for part-time students.</td>
</tr>
<tr>
<td>Additional Program Generated Revenue</td>
<td>No additional program revenue is projected.</td>
</tr>
<tr>
<td>External Grants &amp; Contracts</td>
<td>No external or grant revenue are expected.</td>
</tr>
<tr>
<td>Other</td>
<td>University resources are need in years three and four to support the program.</td>
</tr>
<tr>
<td><strong>ESTIMATED EXPENSES</strong></td>
<td></td>
</tr>
<tr>
<td>Salaries and Benefits - Faculty</td>
<td>Given the growth in enrollments, it is estimated that a new hire is required every year beginning in year three. The cost is estimated at assistant professor step seven enrolled in the alternative retirement program (given overwhelming participation of faculty in this benefit).</td>
</tr>
<tr>
<td>Salaries and Benefits (Staff, Graduate Assistant Stipend/ Waiver, Teaching Assistances, etc.)</td>
<td>CBPA faculty are routinely provided graduate assistantships to support the additional research expectations associated with AACSB accreditation. Given this, one new graduate assistantship per year starting in year one culminating in an additional five graduate assistantships in year five. At WCU, the cost of one full-time graduate assistantship is $18,242 per year, which includes both a tuition waiver and stipend.</td>
</tr>
<tr>
<td>Learning Resources</td>
<td>The need for additional learning resources in $4,000 increments beginning in year one of the program’s existence. These expense will cover the costs associated with the international aspects of the program (i.e. international travel for speakers, etc.)</td>
</tr>
<tr>
<td>Instructional Equipment</td>
<td>The College of Business &amp; Public Affairs is currently slated to enter a brand new building in the first year of the program. Therefore no additional instructional equipment is necessary.</td>
</tr>
<tr>
<td>Facilities and/or modifications</td>
<td>Expenses related to new facilities or modification to existing facilities</td>
</tr>
<tr>
<td>Impact to additional non-major course sections (e.g. General Education)</td>
<td>For all baccalaureate programs, a $4,000 expense is calculated each new full-time student. For each new part-time student, a $2,000 expense is included in the calculations.</td>
</tr>
<tr>
<td>---------------------------------------------------------------</td>
<td>-------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Administrative Expense</td>
<td>20 percent of all tuition and fee revenue.</td>
</tr>

SUBJECT: Approval of a Doctor of Psychology in Clinical Psychology Program at West Chester University of Pennsylvania (ACTION)

UNIVERSITIES AFFECTED: West Chester University of Pennsylvania

BACKGROUND: In accordance with Board of Governors’ Policy 1985-01-A: Requirements for Initiation or Change of Credit-Based Academic Programs, with the approval of the Council of Trustees at West Chester University to bring this proposed program forward for approval by the Board of Governors of Pennsylvania’s State System of Higher Education, and upon recommendation of the Chancellor, the following motion is put forth.

MOTION: That the Board of Governors approve a Doctor of Psychology in Clinical Psychology Program at West Chester University of Pennsylvania.

Supporting Documents Included: Executive Summary of Degree Proposal and Five-Year Budget Projection

Other Supporting Documents Available: Degree Proposal; Board of Governors’ Policy 1985-01-A: Requirements for Initiation or Change of Credit-Based Academic Programs.

Approved to move forward by: West Chester University Council of Trustees, January 28, 2016

Prepared by: Kathleen M. Howley

Telephone: (717) 720-4200
1. **Brief Description of Program and Appropriateness to Mission**

West Chester University currently offers a master’s in psychology with three separate tracks: clinical psychology, industrial/organizational psychology, and general psychology. The evolution of WCU’s clinical master’s program has positioned itself to successfully train doctoral students in clinical psychology. As such, the history and complex evolution of this existing program are relevant to the proposed new professional doctorate in clinical psychology (Psy.D.) at West Chester University. The proposed Psy.D. program in clinical psychology follows a practitioner-scholar model that prepares students for leadership roles as culturally competent psychologists. This proposed program is unique in that students will choose one of two specialty tracks: Child and Adolescent Health or Post Traumatic Stress. Graduates of this proposed program will be able to employ evidence-based interventions to assess, treat, and prevent mental, emotional, and behavioral disorders particularly among individuals who are at greatest risk and demonstrate the greatest need. The program prepares students to be critical consumers of research, and to develop and evaluate interventions for the purpose of quality improvement and clinical decision-making. The program provides significant training in assessment and therapeutic interventions through didactic coursework and supervised clinical training experiences beginning in the first year of the program. Graduates of the program will be adaptive to new knowledge in the field and responsive to emerging needs in an increasingly diverse society.

The proposed program strongly supports the State System’s goal in *Strategic Plan 2020 Rising to the Challenge*, to ensure academic program excellence and relevance. More specifically, the addition of a professional doctoral program in clinical psychology at West Chester will move the State System closer to reaching the goal of increasing the number of degrees or certificates in health-related disciplines awarded annually. The proposed program supports many of the strategic goals and objectives delineated in West Chester University’s plan *Building on Excellence*, including the goals of assuring student learning and academic excellence, strengthening the academic environment, and expanding academic opportunities. The proposed program will strategically enhance graduate education at West Chester University by developing a high-quality graduate program that meets regional needs.

2. **Need**

In the Commonwealth of Pennsylvania, the State Board of Professional and Occupational Affairs regulates licensure as a psychologist. The minimum requirements include a doctoral degree (either Psy.D. or Ph.D.) from a program that is either accredited by the American Psychological Association or designated by the Association of State and Provincial Psychology Boards/National Register Designation Project. As many states are moving toward requiring doctoral degrees from American Psychological Association accredited programs for licensure, the National Register Designation Project will be terminating its designation activities by 2019. This means that to become a licensed psychologist in the Commonwealth of Pennsylvania in the future, one must complete an American Psychological Association accredited doctoral program.

Currently, there are only 19 American Psychological Association accredited doctoral programs in Pennsylvania; with 13 of these being programs in clinical psychology (the others being counseling and school psychology programs). Eight of these programs are in the Southeastern PA region, with five being Psy.D. programs (the other three being Ph.D. programs). Given the
dense population in southeastern region of Pennsylvania and the growing number of psychology majors at many universities (including West Chester University), five American Psychological Association accredited clinical Psy.D. programs are not sufficient to fulfill the needs of regional psychology students.

A brief survey of published admissions data available for Psy.D. programs in southeastern Pennsylvania finds that the number of applicants to these programs is consistently high, with increasing demand. For example, LaSalle University reported a 21 percent increase in Psy.D. program applicants between 2007 (196 applicants) and 2014 (238 applicants). Similarly, applications to the Psy.D. program at Indiana University of Pennsylvania have increased by 30 percent since 2001. The average number of Psy.D. program applications currently received each year at Indiana University of Pennsylvania is 123 (compared to 95 applicants received in 2001), with an acceptance rate of 26 percent, and a yield of 47 percent (15 students). Information from Hanover Research shows above average growth predicted for careers related to clinical psychology nationwide (21.9 percent between 2010-2020). In 2009, the American Psychological Association reports that 93.6 percent of Psy.D. recipients surveyed were employed (full-time, part-time, or postdoctoral fellowship), with only 5.3 percent unemployed and seeking jobs (1 percent unemployed and not seeking jobs). Of the clinical psychologists surveyed (both Psy.D. and Ph.D. recipients), 94.9 percent were employed (full-time, part-time, or postdoctoral fellowship), with only 4.1 percent unemployed and seeking jobs. When drilling down into these data even more, we find that 94.9 percent of the clinical psychologists surveyed with specialties in child psychology were employed (full-time, part-time, or postdoctoral fellowship) with only 1.7 percent unemployed and seeking jobs (3.4 percent unemployed and not seeking jobs).

3. Academic Integrity
The West Chester University Psy.D. program in clinical psychology follows a practitioner-scholar model that prepares students for leadership roles as culturally competent psychologists. Graduates of the program will be able to employ evidence-based interventions to assess, treat, and prevent mental, emotional, and behavioral disorders among individuals who are at greatest risk and demonstrate the greatest need. The proposed program has eight categories of training goals that organize the curriculum: (1) Basic Foundations in Psychology, (2) Professional Skills, (3) Cultural Competence, (4) Evidence Based Assessment, (5) Evidence Based Intervention, (6) Supervision, (7) Consultation, and (8) Research. Graduates of this program will demonstrate proficiency and expertise in each of these areas. Students will complete a minimum of 114 credit hours spread across five years, with the fifth year dedicated to a full-time pre-doctoral clinical internship as required by the American Psychological Association. Of the required credits for the proposed Psy.D. at West Chester University, 12 credits will be elective courses. Students will be required to choose between one of two specialty tracks: Child and Adolescent Health or Post Traumatic Stress. Elective courses and practicum training experiences will provide students the opportunity to gain depth of training and expertise in their chosen specialty area (i.e., Child and Adolescent Clinical Health or Post Traumatic Stress). The curriculum has been reviewed by an external evaluator and been formed to be in conformance with the American Psychological Association accreditation standards.

4. Coordination/Cooperation/Partnerships
West Chester University anticipates collaborating with Indiana University of Pennsylvania in serving the educational needs of Psy.D. training in clinical psychology for the Commonwealth of Pennsylvania. The distance between the two campuses allows Indiana University of Pennsylvania to continue to be responsive to student need in the western part of the Commonwealth, while the proposed West Chester University program addresses student need...
in eastern part of the state. In sum, the program anticipates functioning independently of the Indiana University of Pennsylvania program, but will collaborate with them in meeting the needs of the Commonwealth of Pennsylvania.

West Chester University currently collaborates with numerous mental health agencies in providing students with practicum and internship training. The program will continue to foster these types of collaborations, as students in the proposed Psy.D. training program will be encouraged to supplement their on-campus practicum training with more advanced practicum training off campus.

5. Assessment
The eight program goals described earlier and recommended by the American Psychological Association serve as the basis of the assessment plan for the proposed program. Student learning outcomes are operationalized according to the types of outcomes expected of students enrolled in the proposed Psy.D. program to successfully demonstrate. Course maps provide a linkage of each student-learning outcome to one or more required courses in the proposed Psy.D. program. All required courses in the Psy.D. curriculum have outcomes linked to them. In addition to assessing student learning outcomes, the program plans on collecting other program assessment data in pursuit of continuous improvement. For example, data will be collected on the percentage of students completing the program within 5 years, the total number of program graduates, the percentage of students who do not successfully pass required examinations, the percentage of students who successfully acquire stable, full-time employment within 6 months (or a year) after graduating, internship and job placement information (e.g., location and type of employers), and any other information that would be deemed informative. All of this information will be collected on a continuous basis and will be carefully evaluated. Should any of the indicators fall below a pre-defined acceptable threshold, steps will be taken to attempt to remedy the underlying issue(s).

6. Resource Sufficiency
West Chester University is committed to providing adequate faculty positions to support the growth expected in the department as a result of offering the Psy.D. In addition, the necessary physical resources and facilities have been identified. Space for offering courses, conducting clinical work, and pursuing research will be provided in support of the research requirements of both faculty and students. The faculty members of the department are qualified to offer teaching, mentoring, and advising students involved in doctoral-level programs. All full-time tenured and tenure track faculty members maintain active research agendas. These individual teacher-scholars are fully equipped to conduct doctoral studies. Following an initial university investment of $367,500, the program should reach break-even status after the first five years. By year 5 it is expected that the program will serve 46 students per year (10 new and 36 existing). West Chester University’s administration is firmly committed to providing start-up funding for this program.

Prepared by: Jeffery L. Osgood, Jr. Ph.D. and Vanessa K. Johnson Ph.D.
Implementation date: Fall 2016
Date approved by Council of Trustees: January 28, 2016
### ESTIMATED REVENUES

<table>
<thead>
<tr>
<th>NARRATIVE/ASSUMPTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>ESTIMATED STUDENT IMPACT OF NEW PROGRAM</strong></td>
</tr>
<tr>
<td>Headcount Enrollment</td>
</tr>
<tr>
<td>This model assumes full time students only, which is consistent with other PsyD programs. Additionally, a 10 percent attrition rate was used between years one and two. Projections assume all in-state students until APA accreditation is achieved. The variable credits reflect the program plan in the proposal.</td>
</tr>
<tr>
<td><strong>ESTIMATED REVENUE</strong></td>
</tr>
<tr>
<td>Tuition Generated</td>
</tr>
<tr>
<td>Based on the high cost nature of this program, WCU is seeking a 30 percent tuition premium, which still makes us highly competitive with regional PsyD.</td>
</tr>
<tr>
<td>Instructional Support Fee</td>
</tr>
<tr>
<td>Using the standard rate of $50.63</td>
</tr>
<tr>
<td>Additional Program Generated Revenue</td>
</tr>
<tr>
<td>No additional program revenue is expected.</td>

</tr>
<tr>
<td><strong>ESTIMATED EXPENSES</strong></td>
</tr>
<tr>
<td>Salaries and Benefits - Faculty</td>
</tr>
<tr>
<td>The department currently has 7 licensed clinical psychologists. Two additional faculty are needed to support this program, with one hire in both year one and two. The salaries and benefits projections use assistant professor step 7 enrolled in the alternative retirement program. The model assumes the alternative retirement program given the overwhelming participation of faculty in this benefit.</td>
</tr>
<tr>
<td>Salaries and Benefits (Staff, Grad Assistant Stipend/ Waiver, Teaching Assistants, etc.)</td>
</tr>
<tr>
<td>During the first five years of the proposed program (before accreditation), graduate assistantships will be provided to all enrolled students for Years 1-3. The majority of the course work is to be completed by students in these first three years (96 of 114 credits), with year four consisting largely of clinical training and dissertation work (16 credits). In years 1-3, each semester, half of students’ credits will be covered by a graduate assistantship to account for the lack of accreditation. Graduate assistantships include tuition waivers and a stipend up to $2,500 per semester based on the number of credits awarded. The university uses a composite rate of $760.00 per credit to estimate the cost of graduate assistantships. This rate includes both the tuition waiver and stipend.</td>

During the third quarter, presidential leadership at Indiana University of Pennsylvania and Mansfield University of Pennsylvania engaged the OIARA to perform special project reviews at their respective institutions. Additionally, a special project review was initiated at West Chester University of Pennsylvania supporting the presidential transition process.

During the quarter, the OIARA concluded six work plan projects culminating in the issuance of final reports while efforts continue on 12 additional projects.

Projects Completed Third Quarter FY2015/16
The OIARA accomplished favorable progress in meeting defined initiatives supporting the department’s fiscal year work plan. The following six engagements concluded providing management with 22 recommendations to enhance operations and/or increase internal controls.

Additionally, in support of the OIARA’s System-wide continuous monitoring of purchasing card transactional activity, a report summarizing outcomes from the quarterly assessment was issued to the System’s chancellor.

Other Third Quarter Activities

- **Management Corrective Actions - OIARA Follow-up Assessments**
  During the third quarter of fiscal year 2015/16, 40 prior period-period audit report recommendations were reviewed with leadership verifying implementation of appropriate corrective actions occurred in response to recommendations supportive of previously concluded audit engagements. Prior audit report recommendation follow-up brings closure to the internal audit engagement cycle.

- **PASSHE Incident Reporting System**
  Concerns of employees, students, and others within the university communities regarding matters of wrongdoing are important; therefore, the State System maintains an active Incident Reporting System as a means to confidentially identify situations believed to be inappropriate. During the third quarter of FY2015/16, nine new case reports were received through the Incident Reporting System as of March 28, 2016.

- **Quality Assurance and Improvement Program – Self Assessment**
  The OIARA is finalizing completion of a self-assessment as defined by the Institute of Internal Auditor’s International Professional Practices Framework of processes supporting audit and consulting work performed by the Office of Internal Audit and Risk Assessment, including conformity with the International Standards for the Professional Practice of Internal Auditing.
SUBJECT: Revision of Board of Governors’ Policy 1991-06-A: State System Audit Policy
(ACTION)

UNIVERSITIES AFFECTED: All

Proposed revisions will clarify certain elements within the policy. Draft policy amendments have been reviewed with the Audit Committee, chancellor, and System Office of Chief Legal Counsel. Proposed revisions are attached with language deletions noted in red strike-through text and additions noted in green text. Proposed changes impact the following:

- Section I.B. Organization
- Section 1.D. Procedures, 1
- Section II.C. Policy, 3
- Section II.C. Policy, 4
- Section II.C. Policy, 8

MOTION: That the Board of Governors’ approves the proposed revisions to Policy 1991-06-A: State System Audit Committee, as attached.

Supporting Documents Included: Board of Governors’ Policy 1991-06-A: State System Audit Policy

Other Supporting Documents Available: N/A

Adopted: October 17, 1991  
Amended: July 12, 2001; October 12, 2006; July 16, 2009

I. Audit Committee

A. Purpose

The primary mission of the Audit Committee shall be to assist the Board of Governors in exercising its due care and diligence in discharging System-wide oversight and monitoring responsibilities. An important objective of the Audit Committee shall be to support and oversee the activities of the office of internal audit and risk assessment, maximizing the function’s operations and value across the State System.

B. Organization

The Audit Committee shall be a permanent committee consisting comprised of no fewer than three six members of the Board of Governors. The chairman of the Board shall appoint the chair and other members of the Audit Committee. The Audit Committee shall meet at least twice a year. The chair of the Audit Committee, however, shall have the authority to call a meeting whenever necessary. The System’s chief counsel, and director of the office of internal audit and risk assessment, and other personnel as necessary, shall serve as staff to the Audit Committee.

C. Policy

The Audit Committee shall assist the Board of Governors in discharging its System-wide oversight and monitoring responsibilities by:

1. Promoting the development of an effective and continuously improving control environment to achieve the System’s goals and objectives.

2. Overseeing the System’s internal control environment and risk assessment practices.

3. Serving as a voice on the Board of Governors and other standing committees by relaying an audit perspective when related issues are brought before the committees.

4. Providing a direct channel of communications to the Board of Governors for the System’s independent public accounting firm and office of internal audit and risk assessment.
D. Procedures

Specific duties of the Audit Committee shall include the following:

1. Approve the appointment of the director of the office of internal audit and risk assessment, and the department’s annual budget and staffing, in consultation with the Chancellor.

2. Review and approve the scope of the office of internal audit and risk assessment’s annual work plan.

3. Request the performance of supplemental reviews or other audit procedures, including investigations when necessary.

4. Meet with the System’s independent public accountants and director of the office of internal audit and risk assessment to review the results of their annual work. This shall include:
   a. A review, in advance of final issuance, of the System’s annual audit opinion, financial statements, and management letter;
   b. A timely review of any significant risks, and disposition of findings and recommendations, including corrective actions taken or in progress;
   c. At least annually, provide an opportunity for members of the Audit Committee to meet with representatives of the independent public accounting firm and the director of the office of internal audit and risk assessment, without other System management personnel present; and
   d. A review of the disposition of audit findings and recommendations contained in reports of the Department of the Auditor General, as well as other audits by outside agencies that may arise.

5. Annually report to the full Board of Governors on the Audit Committee’s activities.

II. Office of Internal Audit and Risk Assessment

A. Purpose

To provide policy for establishment and support of a System internal audit and risk assessment function. In carrying out their duties and responsibilities, members of the office of internal audit and risk assessment shall have full, free, and unrestricted access to all System records, property, and personnel except where such access may be limited or barred by federal or state law, or the provisions of a relevant collective bargaining agreement. No private agreement between the System and a third party shall be used to limit the applicability of this section unless reviewed and approved by the Office of Chief Counsel.
B. Objectives

1. Establish an ongoing, independent capability to review all System operations, including affiliated organizations where appropriate, to:

   a. Ensure compliance with statutes, regulations, and policies;
   
   b. review reliability and integrity of financial data, operating information, and the means used to identify, measure, classify and report it;
   
   c. make value-added recommendations for improvements regarding economy, efficiency, and effectiveness; and
   
   d. perform appropriate follow-up procedures and assess the effectiveness of actions taken.

2. Establish an ongoing, collaborative risk assessment process managed by the office of internal audit and risk assessment and including each of the System universities and the Office of the Chancellor.

   a. The office of internal audit and risk assessment will facilitate conversations and exercises in a multi-layered risk assessment approach initiating with a university president and senior management, then secondarily with line management and personnel in the identification of potential risks. The same multi-layered approach will be employed within the Office of the Chancellor.
   
   b. The adequacy of internal controls supporting operations will be evaluated.
   
   c. Identified operations with significant operating exposure to a university and/or the Office of the Chancellor, and where appropriate internal controls are not evident, will be defined as a potential high risk exposure.
   
   d. Potential high risk exposures at an institution will be communicated and discussed with the university’s president. Potential high risk exposures identified at the System level will be communicated with the Chancellor.
   
   e. Consideration will be given by the President and/or Chancellor for further evaluation of the risk exposure as part of a more detailed internal audit analysis.
   
   f. Risk assessment outcomes will be utilized in development of a prioritized annual internal audit work plan based on recognized levels of risk exposure and possible resulting liabilities.
   
   g. Audit outcomes will include recommendations for consideration by a university president and/or the Chancellor to strengthen internal controls through a change in operational and/or financial practices, documented policies, guidelines, etc.

3. Serve as in-house management consultants to the System. University presidents and the chancellor may request assistance from the office of internal audit and risk assessment on an as needed basis to review special issues, including strategic plan initiatives, and/or conduct such audits on the campuses and in the System headquarters as may be requested.

C. Policy

1. There shall be created an organizational element within the Office of the Chancellor known as the office of internal audit and risk assessment. The director of the office of internal audit and risk assessment shall report functionally to the Audit Committee of the Board of Governors and administratively to the System’s Chancellor.

2. The office of internal audit and risk assessment shall serve as in-house management consultants to the System. University presidents and the chancellor may request assistance from the department on an as needed basis to review special issues, including strategic plan initiatives, and/or conduct such audits on the campuses and in the System headquarters as may be requested.

3. Requests for assistance of the office of internal audit and risk assessment to conduct special reviews shall be communicated to the System’s Chancellor and chief counsel by the director and approved by the Audit Committee chairperson. A committee comprised of the System’s chief counsel, Chancellor, director of internal audit and risk assessment, and appropriate vice chancellor shall review and approve requests for assistance to conduct special reviews and investigations.

4. The office of internal audit and risk assessment shall follow the System’s Procedure/Standard Number 2013-17, Conducting Investigations Received through the State System’s Incident Reporting System. administrative directive 1991-06.01, Procedures for Conducting Investigations, when assisting the Audit Committee, universities, and the Office of the Chancellor in conducting investigations.

5. The office of internal audit and risk assessment’s cost shall be funded as a Board of Governors expense to the legislative appropriation prior to allocation based on the System’s funding formula.

6. The scope of work of the office of internal audit and risk assessment shall encompass all System operations, including affiliated organizations where appropriate, academic instruction by the faculty excepted.

7. University presidents and the chancellor may be requested to supplement the office of internal audit and risk assessment staffing with personnel who have special skills or training. This suggested “consultant” approach will help to minimize the permanent staffing of the department.

8. All completed reviews, special projects, and investigations conducted by the office of internal audit and risk assessment shall be made available to the Audit Committee, Chancellor, and to the president and local University Council of Trustees for issues applicable to their institution.

ITEM #1

Finance, Administration, and Facilities Committee Meeting
April 6-7, 2016

SUBJECT: Housing Acquisition and Financing, Edinboro University of Pennsylvania (ACTION)

UNIVERSITIES AFFECTED: Edinboro University of Pennsylvania

BACKGROUND: Edinboro University requests approval to acquire the on-campus, suite-style student residence halls known as The Highlands, which Edinboro University Foundation constructed on property leased from the university using a privatized student housing development and finance model approved by the Board of Governors. At this point, it is advantageous for the university to acquire the buildings using State System bond financing.

The residence halls were completed and opened for operation in two phases to replace outdated and obsolete on-campus student housing. Phase 1 opened in spring 2009 and included four buildings totaling 248,000 square feet with 796 beds; Phase 2 opened in fall 2011 and included four buildings totaling 259,000 square feet with 847 beds.

The initial amount financed to construct the buildings was $117 million; the current outstanding debt is approximately $113.3 million. At this time, the most beneficial alternative is to acquire the buildings using System bond funds to refinance the debt, the term of which will be structured to match the existing term of 26 years for Phase 1 and 27 years for Phase 2. This alternative reduces debt service costs by about $16 million, avoids an estimated $800,000 in operating costs annually, and allows the university to maintain or reduce room rental rates for the near future.

MOTION: That the Board of Governors approves Edinboro University’s acquisition of The Highlands student residence halls from the Edinboro University Foundation and bond finance the current debt.

ITEM #2

Finance, Administration, and Facilities Committee Meeting
April 6-7, 2016

SUBJECT: Bond Financing of Various Projects, Slippery Rock University of Pennsylvania (ACTION)

UNIVERSITIES AFFECTED: Slippery Rock University of Pennsylvania

BACKGROUND: Slippery Rock University requests approval to bond finance a group of critical building renovations and a network infrastructure equipment upgrade. The projects include:

1. Spotts World Culture Building—The building was constructed in 1966 and has not had a significant renovation since. The south wall of the building is structurally unstable and requires immediate attention, the HVAC system is beyond its useful life, restrooms are not ADA compliant, and emergency egress capabilities should be improved. The renovation will address those critical issues, make repairs to the building envelope, and renovate interior spaces to improve utilization and efficiency. Estimated cost is $7.0 million, which will be bond financed for 20 years.

2. Strain Behavioral Science Building—The building was constructed in 1938 and has not had a significant renovation since. Most building systems are well beyond their useful life and interior spaces are not configured adequately to meet the classroom and laboratory needs of the Safety Management Program occupying the building. The renovation will address the backlog of deferred maintenance, reconfigure spaces, and construct a small 2,000-square-foot addition to efficiently meet the space requirements of the building’s academic programs. Estimated cost is $5.2 million, which will be bond financed for 20 years.

3. Bailey Library—The building was constructed in 1973, and limited portions have had some renovation. The building is not ADA compliant, and systems are beyond their useful life. This project will update student study spaces, upgrade the HVAC system, replace windows, renovate restrooms, and make other modifications to improve egress and efficiency of the space. Estimated cost is $5.5 million, which will be bond financed for 15 years.

4. Network Infrastructure Equipment Upgrade—The main routers and switches in 37 buildings are approaching the end of their manufacturers’ support life. Reliability of this equipment is critical to the academic and administrative functions of the university. This equipment will be replaced to ensure continuity of these functions. Estimated cost is $1.9 million, which will be bond financed for five years.

The total estimated cost of these projects is $19.6 million. The debt service will be paid using various sources of existing university operating funds including Key ’93, an academic enhancement fee, and the technology tuition fee. The impact to the university’s debt ratio will be minimal since other debt will be retired, which will offset most of the cost of new borrowing.

MOTION: That the Board of Governors approves bond financing of various projects at Slippery Rock University including renovating the Spotts World Culture Building, Strain Behavioral Science Building, and Bailey Library and upgrading network infrastructure equipment.

Board of Governors’ Meeting Agenda – Page 67
SUBJECT: Bond Issue (ACTION)

UNIVERSITIES AFFECTED: All

BACKGROUND: The proposed bond issue will provide fixed-rate tax-exempt and taxable financing for the following items. The total bond issue is not expected to exceed project cash borrowing of $255.8 million.

1. Renovation of an academic facility at Slippery Rock University of Pennsylvania.
2. Upgrade of IT infrastructure at Slippery Rock University of Pennsylvania.
3. Upgrade of the steam plant at Bloomsburg University of Pennsylvania.
5. Construction and renovation of dining facilities at Indiana University of Pennsylvania.
6. Acquisition of student housing at Lock Haven University of Pennsylvania from Lock Haven University Foundation.
7. Acquisition of student housing at Edinboro University of Pennsylvania from Edinboro University Foundation.
8. Contingency and issuance costs.

In keeping with the State System’s practice of minimizing expense and risk, the bond issue will be competitively bid. Since the System does not possess statutory bond authority, the bonds will be issued through the Pennsylvania Higher Educational Facilities Authority. The bonds will be a general obligation of the System. The attached Pennsylvania’s State System of Higher Education Taxable/Tax-Exempt Bond Issue History outlines the System’s bond issue financing history and plan for fiscal year 2016/17.

MOTION: That the Board of Governors adopts the attached resolution authorizing the issuance of bonds up to a maximum project cash of $255.8 million.

Resolution Authorizing the Issuance of Bonds
by the Pennsylvania Higher Educational Facilities Authority

WHEREAS, the State System of Higher Education of the Commonwealth of Pennsylvania (the “System”) desires that the Pennsylvania Higher Educational Facilities Authority (the “Authority”) issue its State System Revenue Bonds in one or more series of taxable or tax-exempt bonds (the “Bonds”) to finance up to $255.8 million of project cash to pay the costs of (1) renovation of an academic facility at Slippery Rock University of Pennsylvania; (2) upgrade of IT infrastructure at Slippery Rock University of Pennsylvania; (3) upgrade of the steam plant at Bloomsburg University of Pennsylvania; (4) construction of student housing facilities at Bloomsburg University of Pennsylvania; (5) construction and renovation of dining facilities at Indiana University of Pennsylvania; (6) acquisition of student housing at Lock Haven University of Pennsylvania from Lock Haven University Foundation; (7) acquisition of student housing at Edinboro University of Pennsylvania from Edinboro University Foundation; and (8) contingency and issuance costs (the “Projects”); and

WHEREAS, the Authority will lend the proceeds of the Bonds to the System to finance the costs of the Projects and pay the expenses incident to issuance of the Bonds; and

WHEREAS, the System may make expenditures relating to clauses (1) through (8) of the definition of the Projects contained above prior to issuance of the Bonds, and the System desires to preserve the ability to reimburse itself with proceeds of the Bonds for any amounts expended for the Projects; and

WHEREAS, the obligation of the System to repay the Bonds will be described in and evidenced by a Loan Agreement, as supplemented (the “Loan Agreement”), between the Authority, as lender, and the System, as borrower, pursuant to which the System will pledge the full faith and credit of the System as security for repayment of the obligation; and

WHEREAS, the Loan Agreement will be assigned by the Authority as security for the Bonds pursuant to a Trust Indenture, as supplemented (the “Indenture”), between the Authority and a trustee; and

WHEREAS, the Authority will, by public invitation, solicit and receive competitive bids from underwriters for the purchase of the Bonds, which bids will contain, among other terms, proposed interest rates on the Bonds.

NOW, THEREFORE, BE IT RESOLVED, that the Board of Governors of the System (the “Board”) hereby approve the issuance of the Bonds by the Authority, in an amount in project cash not to exceed $255.8 million for the bonds, the proceeds of which will be used to undertake the Projects and pay the costs of issuance of the Bonds; and be it

RESOLVED, that the Board hereby delegate to the chancellor or vice chancellor for administration and finance the power to accept bids for purchase of the Bonds from underwriters and to determine the principal amount of the Bonds to be issued by the Authority, but not in excess of the amount described above, the rates of interest, dates of maturity, provisions for optional or mandatory redemption, and other details, such approval to be evidenced by acceptance of the bid for purchase of the Bonds by the Authority and the System; and be it

RESOLVED, that the Board hereby authorize the pledging of the System’s full faith and credit to repayment of the Bonds, as provided in the Loan Agreement, and does hereby authorize and direct the chancellor or vice chancellor for administration and finance to execute, acknowledge,
and deliver, and any Responsible Officer to attest such signature to a supplement to the Loan Agreement in such form as the officers executing it may approve, such approval to be conclusively evidenced by execution thereof; and be it

RESOLVED, that any Responsible Officer is hereby authorized and empowered to approve the content of the Preliminary Official Statement and the Official Statement of the Authority relating to issuance of the Bonds as to information concerning the System and its affairs; and be it

RESOLVED, that any Responsible Officer is hereby authorized and directed to take such further action and to execute and deliver such other instruments and documents as may, in his or her judgment or upon advice of counsel, be necessary or advisable to effect issuance of the Bonds by the Authority, the intent of this Resolution, and the transactions contemplated.

Pennsylvania’s State System of Higher Education
Taxable/Tax-Exempt Bond Issue History

April 2016
Current Debt Structure  
Pennsylvania’s State System of Higher Education  
Bond Issues

The Series A bonds were issued June 1, 1985, at a par value of $31 million to finance the Indiana University of Pennsylvania cogeneration plant. Scheduled amortization started in June 1988 and was to run through June 1994. Serial interest rates ranged from 6.50 percent to 8.20 percent.

The Series B bonds were issued June 1, 1986, for a par value of $25.9 million to finance 47 capital projects System-wide. Scheduled amortization started in June 1987 and concluded in June 1994. Serial interest rates ranged from 4.60 percent to 7.10 percent. Series B bonds called for a debt service reserve fund of $3.9 million to be used to pay the last principal and interest payment. This fund earned an interest rate higher than the cost of borrowing, resulting in realized investment income of $1 million. Universities with projects that participated in the bond issue received a prorated share of the debt service reserve fund investment income. The Series B issue allowed refinancing of existing capital leases for a savings of $1.2 million. Also, by financing capital projects, the universities could invest the operating capital in the Short-Term Investment Fund at an interest rate higher than the financing cost, providing investment income and flexibility.

The Series C bonds were issued July 1, 1987, for a par value of $38.2 million to finance residence halls at Bloomsburg and Kutztown Universities of Pennsylvania and to refund the Series A bonds. Serial interest rates ranged from 4.40 percent to 7.60 percent.

The Series D bonds were issued June 15, 1990, for a par value of $58.8 million to finance student unions at Clarion, Lock Haven, and Shippensburg Universities of Pennsylvania, and a residence hall at West Chester University of Pennsylvania. This bond issue also provided refinancing of State System internal loans for interest savings of $1.3 million. The Series D bonds launched the Reimbursement Program, which provided $17.7 million of capital financing. Serial interest rates ranged from 5.90 percent to 7.15 percent.

The Series E bonds were issued June 15, 1991, for a par value of $54.8 million to finance student unions at Bloomsburg, California, Clarion, East Stroudsburg, Edinboro, Kutztown, Lock Haven, Millersville, and Shippensburg Universities of Pennsylvania, and a residence hall at West Chester University of Pennsylvania. This bond issue included $12.3 million of capital reimbursement bonds. Serial interest rates ranged from 4.70 percent to 7.10 percent.

The Series F bonds were issued December 15, 1992, for a par value of $35.2 million to finance student unions, energy conservation equipment, and the renovation of dining halls at various State System universities. This bond issue provided $19 million of capital reimbursement bonds. Serial interest rates ranged from 2.70 percent to 6.15 percent.

The Series G bonds were issued December 15, 1992, for a par value of $14.2 million to refund the Series C bonds maturing on and after September 1, 1996. This refunding issue provided
present value savings of $825,000 to Bloomsburg and Kutztown Universities of Pennsylvania for their student housing projects. Serial interest rates ranged from 2.70 percent to 6.15 percent.

The Series H bonds were issued May 18, 1993, for a par value of $15.9 million to finance a computer purchase and energy conservation equipment at various State System universities. This bond issue provided $13.6 million of capital reimbursement bonds. Serial interest rates ranged from 2.70 percent to 5.80 percent.

The Series I bonds were issued May 18, 1993, for a par value of $61.4 million to refund the Series D bonds maturing on and after June 15, 1993. This refunding issue provided present value savings of $2.4 million to various State System universities. Serial interest rates ranged from 2.70 percent to 5.80 percent.

The Series J bonds were issued March 16, 1994, for a par value of $28.3 million to finance a recreation center, a fiber-optic network, a smokestack and engine retrofit, and student unions at various State System universities. This bond issue provided $14.4 million of capital reimbursement bonds. Serial interest rates ranged from 3.35 percent to 5.75 percent.

The Series K bonds were issued March 16, 1994, for a par value of $55.4 million to refund the Series E bonds maturing on and after June 15, 1994. This refunding issue provided present value savings of $1.8 million to various State System universities. Serial interest rates ranged from 2.95 percent to 5.70 percent.

The Series L bonds were issued July 14, 1994, for a par value of $45.9 million to finance a recreation center, computer equipment, student housing, and student unions at various State System universities. This bond issue provided $26.8 million of capital reimbursement bonds. Serial interest rates ranged from 3.75 percent to 6.30 percent.

The Series M bonds were issued March 14, 1995, for a par value of $35.4 million to finance instructional equipment purchased at Clarion University of Pennsylvania, energy conservation measures at two universities, and renovations to various residence halls and dining facilities at Indiana University of Pennsylvania. This bond issue provided $29.3 million of capital reimbursement bonds. Serial interest rates ranged from 4.50 percent to 5.98 percent.

The Series N bonds were issued April 2, 1996, for a par value of $44.5 million to finance construction of a recreation center at Mansfield University of Pennsylvania, renovation of a residence hall at Kutztown University of Pennsylvania and a dining hall at Indiana University of Pennsylvania, installation of a campus-wide fiber-optic network at California University of Pennsylvania, and installation of a PBX phone system at Millersville University of Pennsylvania. This bond issue provided $30.5 million of capital reimbursement bonds. Serial interest rates ranged from 3.65 percent to 5.85 percent.

The Series O bonds were issued June 25, 1997, for a par value of $46.7 million to finance construction of a recreation center and student housing at Slippery Rock University of Pennsylvania; road and site utilities development at Indiana University of Pennsylvania; various computer and telecommunication purchases at Clarion, Kutztown, and Millersville Universities of Pennsylvania; and a property acquisition at West Chester University of Pennsylvania. This bond issue provided $17.7 million of capital reimbursement bonds. Serial interest rates ranged from 3.77 percent to 5.35 percent.
The Series P bonds were issued February 25, 1998, for a par value of $72.9 million to refund a portion of the Series F bonds and a portion of the Series L bonds maturing on and after December 15, 2002, and June 15, 2004, respectively. This refunding issue provided present value savings of $3.9 million to the State System. Serial interest rates ranged from 3.50 percent to 4.40 percent.

The Series Q bonds were issued June 30, 1998, for a par value of $22.7 million to finance construction of a recreation center at Clarion University of Pennsylvania; a dining hall addition at Millersville University of Pennsylvania; a comprehensive electrical upgrade at Shippensburg University of Pennsylvania; various computer and telecommunication purchases at Millersville, Indiana, and Shippensburg Universities of Pennsylvania; and facilities renovations and the acquisition of equipment and furnishings by various State System universities. Serial interest rates ranged from 3.82 percent to 5.05 percent.

The Series R bonds were issued June 17, 1999, for a par value of $31.1 million to finance an addition to the student center at California University of Pennsylvania, renovation of and addition to the dining facilities at Kutztown University of Pennsylvania, renovation of a library to a student union at Mansfield University of Pennsylvania, purchase and installation of computer and telecommunications equipment at Shippensburg and Clarion Universities of Pennsylvania, purchase and installation of fiber-optic wiring at Clarion University of Pennsylvania, purchase of a building to be used by the Culinary School at Indiana University of Pennsylvania, and facilities renovations at various State System universities. Serial interest rates ranged from 3.40 percent to 5.24 percent.

The Series S bonds were issued June 21, 2000, for a par value of $51.7 million to finance the design and construction of on-campus apartments at Bloomsburg University of Pennsylvania; design and construction of renovations and additions to the dining accommodations and student union facilities at Kutztown University of Pennsylvania; renovations of student union facilities at California University of Pennsylvania; design and renovation of academic facilities at System universities; purchase and installation of computer and telecommunications equipment at Bloomsburg, Edinboro, and Slippery Rock Universities of Pennsylvania; and purchase of lab equipment at Mansfield University of Pennsylvania. Serial interest rates ranged from 4.54 percent to 5.81 percent.

The Series T bonds were issued July 12, 2001, for a par value of $69.6 million to finance the design and construction of a recreation center at East Stroudsburg and Lock Haven Universities of Pennsylvania; installation of a central chiller at Indiana University of Pennsylvania; renovation and maintenance of facilities at California University of Pennsylvania; construction of student housing at Bloomsburg University of Pennsylvania; technology initiatives at Clarion, Edinboro, and West Chester Universities of Pennsylvania; installation of residence hall sprinklers; design and renovation of academic facilities at System universities; and a shared administrative computer system. Serial interest rates ranged from 2.50 percent to 5.09 percent.

The Series U bonds were issued August 8, 2002, for a par value of $14.4 million to finance the Academic Facilities Renovation Program; renovation and maintenance of facilities at Bloomsburg, California, Edinboro, and Mansfield Universities of Pennsylvania; expansion of the fire detection system at Indiana University of Pennsylvania; and design and renovation of a recreation center at East Stroudsburg University of Pennsylvania. Serial interest rates ranged from 1.61 percent to 4.92 percent.
The Series V bonds were issued August 8, 2002, for a par value of $25.2 million to finance the acquisition and installation of residence hall sprinklers at all of the universities and the continued implementation of the shared administrative computer system. This was the System’s first variable rate issue, with terms of 20 years for the sprinklers and 7 years for the shared administrative computer system. Weekly resets of interest rates and monthly payments of interest were established for this issue.

The Series W bonds were issued October 15, 2002, for a par value of $69.1 million to refund the Series H bonds, the Series J bonds, and the Series M bonds. This refunding issue provided present value savings of $3.8 million to the State System. Serial interest rates ranged from 1.70 percent to 4.41 percent.

The Series X bonds were issued May 29, 2003, for a par value of $80.9 million to refund the Series G bonds and the Series I bonds. The refunding issue provided a present value savings of $6.2 million to the State System. The Series X bonds also issued new money for auxiliary facilities renovations and construction at Bloomsburg, California, Indiana, Kutztown, Mansfield, Millersville, and Shippensburg Universities of Pennsylvania; academic facilities renovation and general campus improvements at Bloomsburg and California Universities of Pennsylvania; installation of fire alarm systems at Indiana University of Pennsylvania; and property acquisitions at East Stroudsburg University of Pennsylvania. Serial interest rates ranged from 0.99 percent to 4.33 percent.

The Series Y bonds were issued June 19, 2003, for a par value of $25.4 million to finance the acquisition and installation of residence hall sprinklers at all of the universities and the continued implementation of the shared administrative computer system. This was the System’s second variable rate issue, with terms of 20 years for the sprinklers and 7 years for the shared administrative computer system. Weekly resets of interest rates and monthly interest payments were established for this issue.

The Series Z bonds were issued March 17, 2004, for a par value of $71.8 million to refund the Series K bonds and the Series N bonds. The refunding issue provided a present value savings of $6.6 million to the State System. Serial interest rates ranged from 1.00 percent to 4.43 percent.

The Series AA bonds were issued July 8, 2004, for a par value of $28.8 million to finance auxiliary facilities renovations and construction at Bloomsburg, California, Indiana, Kutztown, Mansfield, Millersville, and Shippensburg Universities of Pennsylvania; academic facilities renovations and general campus improvements at Bloomsburg, California, and Kutztown Universities of Pennsylvania; energy savings improvements at Shippensburg University of Pennsylvania; and property acquisitions at East Stroudsburg University of Pennsylvania. Serial interest rates ranged from 1.66 percent to 5.00 percent.

The Series AB bonds were issued July 8, 2004, for a par value of $21.0 million to finance the acquisition and installation of residence hall sprinklers at all of the universities and the continued implementation of the shared administrative computer system. This was the System’s third variable rate issue, with terms of 20 years for the sprinklers and 7 years for the shared administrative computer system. Weekly resets of interest rates and monthly interest payments were established for this issue.
The Series AC bonds were issued July 7, 2005, for a par value of $52.7 million to finance auxiliary facilities renovations and construction at Bloomsburg, Cheyney, Edinboro, Indiana, Kutztown, Millersville, and Shippensburg Universities of Pennsylvania; academic facilities renovations and general campus improvements at California, Cheyney, Indiana, Kutztown, Shippensburg, and Slippery Rock Universities of Pennsylvania; network equipment upgrade at Clarion University of Pennsylvania; continued installation of fire alarm systems at Indiana University of Pennsylvania; and property acquisitions at East Stroudsburg University of Pennsylvania. Serial interest rates ranged from 2.66 percent to 4.50 percent.

The Series AD bonds were issued July 7, 2005, for a par value of $7.3 million to finance the acquisition and installation of residence hall sprinklers at all of the universities. This was the System’s fourth variable rate issue, with a term of 20 years. Weekly resets of interest rates and monthly interest payments were established for this issue.

The Series AE bonds were issued July 6, 2006, for a par value of $103.3 million to finance auxiliary facilities renovations and construction at Bloomsburg, Cheyney, East Stroudsburg, Edinboro, Kutztown, Lock Haven, Millersville, and Shippensburg Universities of Pennsylvania; academic facilities renovations and general campus improvements at East Stroudsburg, Kutztown, and Millersville Universities of Pennsylvania; and energy savings improvements at Edinboro and West Chester Universities of Pennsylvania. Serial interest rates ranged from 3.70 percent to 4.82 percent.

The Series AF bonds were issued July 10, 2007, for a par value of $68.2 million to finance auxiliary facilities renovations and construction at California, Clarion, East Stroudsburg, Kutztown, Shippensburg, and West Chester Universities of Pennsylvania; Academic Facilities Renovation Program and other academic facilities at East Stroudsburg, Indiana, and Kutztown Universities of Pennsylvania; and energy savings improvements at East Stroudsburg and West Chester Universities of Pennsylvania. Serial interest rates range from 3.80 percent to 4.60 percent.

The Series AG bonds were issued March 27, 2008, for a par value of $101.3 million to refund the Series O bonds, the Series P bonds, and the Series Q bonds. The refunding issue provided a present value savings of $6.9 million to the State System. Serial interest rates range from 2.10 percent to 4.70 percent.

The Series AH bonds were issued July 17, 2008, for a par value of $140.8 million to finance auxiliary facilities renovations and construction at Bloomsburg, California, Kutztown, Millersville, Shippensburg, Slippery Rock, and West Chester Universities of Pennsylvania; academic facilities at California, East Stroudsburg, Kutztown, and Millersville Universities of Pennsylvania; and energy savings improvements at Bloomsburg, Cheyney, Lock Haven, Mansfield, Millersville, and Slippery Rock Universities of Pennsylvania. Serial interest rates range from 1.75 percent to 4.77 percent.

The Series AI bonds were issued August 7, 2008, for a par value of $32.1 million to refund the System’s variable rate bonds: the Series V bonds, the Series Y bonds, the Series AB bonds, and the Series AD bonds. Serial interest rates range from 2.00 percent to 4.66 percent.

The Series AJ bonds were issued July 9, 2009, for a par value of $124.0 million to finance auxiliary facilities renovations and construction at Bloomsburg, California, Kutztown, Millersville, Shippensburg, Slippery Rock, and West Chester Universities of Pennsylvania; academic facilities at California, East Stroudsburg, Kutztown, and Millersville Universities of Pennsylvania;
and energy savings improvements at Bloomsburg, Cheyney, Lock Haven, Mansfield, Millersville, and Slippery Rock Universities of Pennsylvania. Serial interest rates range from 0.49 percent to 5.17 percent.

The Series AK bonds were issued September 3, 2009, for a par value of $47.3 million to refund the Series R bonds and the Series S bonds. The refunding issue provided a present value savings of $4.8 million to the State System. Serial interest rates range from 0.70 percent to 4.00 percent.

The Series AL bonds were issued July 8, 2010, for a par value of $135.4 million to finance auxiliary facilities renovation and construction at Bloomsburg, Mansfield, Millersville, Shippensburg, Slippery Rock, and West Chester Universities of Pennsylvania; academic facilities renovation and construction at California, East Stroudsburg, Edinboro, Indiana, Kutztown, Millersville, and Shippensburg Universities of Pennsylvania; and student information systems purchase and implementation at California, Clarion, East Stroudsburg, Shippensburg, and Slippery Rock Universities of Pennsylvania. Serial interest rates range from 0.4 percent to 4.50 percent.

The Series AM bonds were issued July 12, 2011, for a par value of $119.1 million to finance auxiliary facilities renovation and construction at Bloomsburg, Indiana, Lock Haven, Millersville, Shippensburg, Slippery Rock, and West Chester Universities of Pennsylvania; academic facilities renovation and construction at California, East Stroudsburg, and Millersville Universities of Pennsylvania; and student information systems purchase and implementation at East Stroudsburg University of Pennsylvania. Serial interest rates range from 0.27 percent to 4.64 percent.

The Series AN bonds were issued March 20, 2012, for a par value of $76.8 million to refund the Series U bonds, the Series W bonds, and the Series X bonds. The refunding issue provided a present value savings of $13.8 million to the State System. Serial interest rates range from 0.25 percent to 2.22 percent.

The Series AO bonds were issued July 8, 2013, for a par value of $30.9 million to finance (taxable) auxiliary facilities renovation and construction at Indiana University of Pennsylvania; and (tax-exempt) academic facilities renovation and construction at California and Mansfield Universities of Pennsylvania. Taxable serial interest rates range from 0.80 percent to 5.20 percent, and tax-exempt serial interest rates range from 0.28 percent to 4.66 percent.

The Series AP bonds were issued May 7, 2014, for a par value of $46.1 million to refund the Series Z bonds and the Series AA bonds. The refunding provided a present value savings of $5.8 million to the State System. Serial interest rates range from 0.30 percent to 2.65 percent.

The Series AQ bonds were issued on May 7, 2015, for a par value of $95.0 million to current refund the Series AC bonds and advance refund the Series AE bonds. The refunding provided a present value savings of $9.1 million to the State System. Serial interest rates range from 0.45 percent to 3.837 percent.

The Series AR bonds were issued September 10, 2015, for a par value of $102.4 million to finance auxiliary facilities renovation and construction at Bloomsburg, California, and Millersville Universities of Pennsylvania and an upgrade of a steam plant at Bloomsburg University of Pennsylvania and the purchase by California University of Pennsylvania of on-campus student housing from Student Association, Incorporated.
The Series AS bonds will be issued during the spring of 2016 to advance refund the Series AF bonds.

Of the original $2.5 billion principal amount issued, through principal repayment and refunding of bond issues, $903 million is outstanding as of March 1, 2016.

Finance, Administration, and Facilities Committee Meeting
April 6-7, 2016

SUBJECT: Authorization to Issue Refunding Bonds (ACTION)

UNIVERSITIES AFFECTED: All

BACKGROUND: In the current interest rate environment, opportunities arise to refund all or part of certain State System bond issues. The window of opportunity often opens and closes in a matter of days, and missing the window could cost the System millions of dollars in lost debt service savings. The Treasury staff monitors these market conditions and alerts the Board of Governors when the environment might provide debt service savings. The Internal Revenue Service requires the governing board to pass a resolution authorizing issuance of bonds. It is prudent management for the Board to authorize the chancellor to direct issuance of bonds only when market conditions provide significant savings. It is common for this type of resolution to contain minimum savings limits and an expiration date so control of the bond issuance process is maintained. This Board action will authorize the Office of the Chancellor to issue refunding bonds during fiscal year 2016/17 based upon market conditions to maximize present value savings, provided that the net present value savings equal or exceed 4 percent, and will establish an expiration date of June 30, 2017.

In keeping with the State System’s practice of minimizing expense and risk, the bond issue will be competitively bid. Since the System does not possess statutory bonding authority, the bonds will be issued through the Pennsylvania Higher Educational Facilities Authority. The bonds will be a general obligation of the System.

MOTION: That the Board of Governors adopts the attached resolution to authorize future issuance of refunding bonds when market conditions permit and after the vice chancellor for administration and finance consults with the chair of the Finance, Administration, and Facilities Committee.

Resolution Authorizing Issuance of Refunding Bonds
by the Pennsylvania Higher Educational Facilities Authority

WHEREAS, the State System of Higher Education of the Commonwealth of Pennsylvania (the “System”) desires that the Pennsylvania Higher Educational Facilities Authority (the “Authority”) undertake a project (the “Project”) consisting of the issuance of bonds (the “Refunding Bonds”) to refund all or a portion of various series of bonds issued by the Authority on behalf of the System (the “Prior Bonds”); and

WHEREAS, the Board of Governors of the System (the “Board”) has determined that it is desirable to authorize the chancellor to proceed with the issuance of the Refunding Bonds when market conditions permit, as long as the net present value savings on the Refunding Bonds equal or exceed 4 percent, and this authorization expires June 30, 2017; and

WHEREAS, the Authority will lend the proceeds of the Refunding Bonds to the System to finance the costs of the Project and to pay expenses incidental to issuance of the Refunding Bonds; and

WHEREAS, the obligation of the System to repay the Refunding Bonds will be described in and evidenced by a Loan Agreement, as supplemented (the “Loan Agreement”), between the Authority, as lender, and the System, as borrower, pursuant to which the System will pledge the full faith and credit of the System as security for repayment of the obligation; and

WHEREAS, the Loan Agreement will be assigned by the Authority as security for the Refunding Bonds pursuant to a Trust Indenture, as supplemented (the “Indenture”), between the Authority and the accepted trustee; and

WHEREAS, the Authority will, by public invitation, solicit and receive competitive bids from underwriters for the purchase of the Refunding Bonds, which bids will contain, among other terms, proposed interest rates on the Refunding Bonds.

NOW, THEREFORE, BE IT RESOLVED, that the Board hereby authorize the chancellor to proceed with issuance of the Refunding Bonds by the Authority when market conditions permit, provided that the net present value savings on the Refunding Bonds equal or exceed 4 percent; this authorization will expire June 30, 2017; and be it

RESOLVED, that the Board hereby delegate to the chancellor or vice chancellor for administration and finance the power to accept bids for purchase of the Refunding Bonds from underwriters and to determine the principal amount of the Refunding Bonds to be issued by the Authority, the rates of interest, dates of maturity, provisions for optional or mandatory redemption, and other details, such approval to be evidenced by acceptance of the bid for purchase of the Refunding Bonds by the Authority and the System; and be it

RESOLVED, that the Board hereby authorize pledging the System’s full faith and credit to repayment of the Refunding Bonds, as provided in the Loan Agreement, and does hereby authorize and direct the chancellor or vice chancellor for administration and finance to execute, acknowledge, and deliver, and any Responsible Officer, as defined in the Indenture, to attest such signature to a supplement to the Loan Agreement in such form as the officers executing it may approve, such approval to be conclusively evidenced by execution thereof; and be it

RESOLVED, that any Responsible Officer is hereby authorized and empowered to approve the content of the Preliminary Official Statement and the Official Statement of the Authority relating to issuance of the Refunding Bonds as to information concerning the System and its affairs; and be it
RESOLVED, that any Responsible Officer is hereby authorized and directed to take such further action and to execute and deliver such other instruments and documents as may, in his or her judgment or upon advice of counsel, be necessary or advisable to effect issuance of the Refunding Bonds by the Authority, the intent of this Resolution, and the transactions contemplated.

Finance, Administration, and Facilities Committee Meeting
April 6-7, 2016

SUBJECT: Demolition of Various Buildings, East Stroudsburg University of Pennsylvania
(ACTION)

UNIVERSITIES AFFECTED: East Stroudsburg University of Pennsylvania

BACKGROUND: East Stroudsburg University intends to demolish a variety of small buildings that have been acquired over the last half-century. These buildings are mostly small single-family homes that were purchased for land control and future development. The university has used many of the buildings as temporary office space; however, they are not fully accessible, are inefficient to operate, and cannot be feasibly updated for further use. The university plans to demolish the houses and restore the sites to green space or parking as funding becomes available.

Depending upon who holds the titles to the buildings, approval might be required from the Department of General Services (DGS) and the Pennsylvania Historical and Museum Commission (PHMC).

MOTION: That the Board of Governors approves East Stroudsburg University’s plan to demolish 18 buildings, totaling 42,410 gross square feet.

SUBJECT: Revisions to Board of Governors' Policy 1996-01-A: Sources of Funding for University Scholarships (ACTION)

UNIVERSITIES AFFECTED: All

BACKGROUND: Board of Governors’ Policy 1996-01-A: Sources of Funding for University Scholarships, provides for the use of university revenues for institutional financial aid. This policy was last revised in April 2014 to allow for the limited use of unrestricted Educational and General revenue to be used for need-based scholarships. Since that time, two changes have occurred that warrant consideration of additional adjustments to this policy.

Most State System universities have revitalized their student housing portfolios, primarily through private partnerships managed by affiliated organizations. The funding arrangements for several of these private partnerships are in the process of being refinanced, sometimes resulting in ownership being transferred to the university. Previously, these housing partnerships often resulted in private, restricted gift income to the university for financial aid associated with housing. As these refinancing opportunities result in a transfer of ownership to some universities, housing proceeds become university unrestricted revenue. In order to continue using these funds for housing grants, this policy must be revised to allow auxiliary fee revenue to be a source of funds for university financial aid.

Similarly, the advent of pricing flexibility pilots has resulted in the Board of Governors’ approving exceptions to this policy to allow additional need-based aid to be awarded as an integral component of pricing pilots that result in increased costs to students.

The attached proposed revisions to Policy 1996-01-A: Sources of Funding for University Scholarships, update this policy to address both of these changes in financial practices.

MOTION: That the Board of Governors approves the proposed revisions to Policy 1996-01-A: Sources of Funding for University Scholarships, as attached.

Policy 1996-01-A: Sources of Funding for University Scholarships

A. Purpose

To provide flexibility for universities to award institutional scholarships from unrestricted funds. This policy does not apply to scholarships supported by restricted funding sources.

B. Definitions

Institutional scholarships—University-funded financial assistance to a student for the purpose of undertaking for-credit course work not to exceed the full cost of attendance less other grant awards.

Instructional fees—Mandatory fees that may be used to support general instructional operations and academic facilities needs. These fees may be used to cover unusual costs of certain special programs such as music instruments, practica, instructional equipment, required course/university tests and examinations, laboratory supplies, course-required field trips, student teaching, clinical experiences, or related activities.

Need-based institutional scholarships—Institutional scholarships for which eligibility is based upon an analysis of financial need, to include information reported in the Free Application for Federal Student Aid (FAFSA).

Restricted funds—Resources received with purpose restrictions imposed by a donor or an agency outside the State System. The funds must be expended according to the specific directions of the donor or external agency. Examples of entities that can cause funds to be classified as restricted are the Commonwealth of Pennsylvania and its agencies, the federal government, and corporate or individual donors. Unrestricted funds have no restrictions placed on them by donors or external agencies.

C. Administration of Need-Based Institutional Scholarships

1. Need-based institutional scholarships may be granted to students who meet the following criteria:

   a. Domiciled in Pennsylvania;
   b. Has completed the FAFSA for the award year;
   c. Has demonstrated financial need; and
   d. The total financial aid awarded does not exceed the cost of attendance.
2. To use this policy, presidents must develop university procedures for establishing and maintaining a need-based institutional scholarship fund and its administration. University procedures must include funding expectations, not to exceed 5.0 percent of the prior year’s gross tuition and instructional fee revenue; utilization guidelines; and requirements for annual reports and audits. University procedures must be approved by the university council of trustees.

3. Universities with flexible pricing practices may exceed the limit in section C.2, above, by utilizing revenue generated through the flexible pricing model to ensure access for students with financial need.

D. Funding of Institutional Scholarships that are Not Based on Need

Subject to the recommendation of the president and approval of the university council of trustees, as part of the annual university budget approval process, the following sources of unrestricted revenue may be used to fund institutional scholarships that are not based on need:

1. Gifts;
2. Unrestricted endowment income;
3. Corporate sponsorship;
4. Camp, conference, and similar event income (net of expenditure);
5. Net revenue from athletic concessions, snack vending machines, and licensing royalties;
6. Up to 5.0 percent of the prior year’s gross nonresident tuition and instructional fee revenue; and/or
7. Other sources of revenue, as approved by the chancellor.

E. Restricted Scholarship Funds

Nothing herein shall be deemed to govern the awarding of scholarships that are based on sources of funding which are specifically restricted for that purpose by an external source or donor.
ITEM #7

Finance, Administration, and Facilities Committee Meeting
April 6-7, 2016

SUBJECT: Pricing Flexibility Pilots (ACTION)

UNIVERSITIES AFFECTED: All

BACKGROUND: At its meeting on January 23, 2014, the Board established a Pricing Flexibility Pilot Program to allow System universities to develop more market-driven pricing practices and assume the financial and operational risks of doing so. To do so has required Board approval of particular exceptions to existing policy. To date, approval has been granted to allow universities to implement a total of 27 pricing pilots. Updates on all pilots that have been implemented are reflected in the university action plans, as included with the materials for the Board of Governors’ meeting.

Several of the pilots that were implemented in 2014 are set to expire this summer. As previously reviewed with the Board of Governors at a pricing flexibility pilot workshop held in December 2015, and reiterated in the assessments included in the action plans, California, Cheyney, East Stroudsburg, Edinboro, Lock Haven, Millersville, and West Chester Universities of Pennsylvania seek to continue the pricing structure established in certain pilots for at least one more year, through summer 2017. In addition, California University seeks to extend its Global Online active duty military tuition rates to all Global Online veterans and eligible dependents, effective for the fall 2016 semester.

Of the pilots that have been approved for implementation in fall 2016, Bloomsburg and Clarion Universities of Pennsylvania have decided not to implement per-credit tuition, and Mansfield University of Pennsylvania seeks a modification to its per-credit tuition structure for returning students.

The attached summary highlights the changes as outlined above. The following motion addresses those changes that require Board action.

MOTION 1: That the Board of Governors approves the following exceptions to Board of Governors’ Policies 1999-02-A: Tuition, and 1989-05-A: Student Fees, to allow pricing flexibility, as particularly described in the attached and as follows.

1. California University of Pennsylvania to continue to charge a reduced tuition rate to active duty military and eligible dependents participating in its Global Online Program and expand this pricing model to include veterans and eligible dependents effective fall 2016.

2. Cheyney, East Stroudsburg, and West Chester Universities of Pennsylvania to continue to charge a reduced tuition rate to students enrolled at the System’s Center City location in downtown Philadelphia.

3. Edinboro University of Pennsylvania to continue to charge a program fee to students enrolled in the innovative nursing program and a course fee to students enrolled in ART courses.

4. Lock Haven University of Pennsylvania to continue to charge its instructional fee on a per-credit basis.
5. Millersville University of Pennsylvania to extend its pilot for STEM-H program majors for one additional year, through summer 2017, as it continues to assess the pilot.

**MOTION 2:** That the Board of Governors approves the following exception to Board of Governors’ Policy 1999-02-A: *Tuition*, upon review of additional information provided by Mansfield University of Pennsylvania concerning the financial impacts of the pricing pilot following the meeting of the Finance, Administration, and Facilities Committee on March 29, 2016, to allow pricing flexibility, as particularly described in the attached and as follows.

1. Mansfield University of Pennsylvania to modify its per-credit tuition pilot to charge one percent above the System’s 2015/16 per-credit tuition rate to returning students with fewer than 90 credits. Students with 90 or more credits will have the option either to pay the System’s 2015/16 per-credit rate or participate in Mansfield’s returning student cohort frozen tuition rate.

</thead>
<tbody>
<tr>
<td><strong>Bloomsburg</strong>&lt;br&gt;Approved January 2015</td>
<td>Charge tuition on a <strong>per-credit</strong> basis to all in-state undergraduate students. The tuition rate for in-state undergraduate students will lag one year behind the System’s established per-credit rate set by the Board of Governors. Charge out-of-state undergraduate students 200% of the in-state undergraduate per-credit tuition rate. Effective fall 2016–summer 2019. <strong>University will not implement.</strong></td>
</tr>
<tr>
<td><strong>California</strong>&lt;br&gt;Approved January 2014</td>
<td>Charge undergraduate tuition at the most recent <strong>Military Tuition Assistance (TA)</strong> reimbursement rate (currently $250 per credit) and graduate tuition at a fixed rate of $399 per credit to the following individuals enrolled in the Global Online Program: all active duty military (Army, Navy, Air Force, Marine Corps, Coast Guard, National Guard, and Reserves); and dependents and spouses of active duty members. Undergraduates taking 12–18 credits are charged the 12-credit rate. Effective summer 2014–summer 2016. <strong>University seeks to continue pricing model and expand to include veterans and eligible dependents.</strong></td>
</tr>
<tr>
<td><strong>Cheyney</strong>&lt;br&gt;Approved July 2014</td>
<td>Charge 90% of the applicable tuition rate to students attending the System’s <strong>Center City</strong> location in downtown Philadelphia. The tuition rate would apply to all Cheyney Center City programs, both undergraduate and graduate. Effective fall 2014–summer 2016. <strong>University seeks to continue pricing model.</strong></td>
</tr>
<tr>
<td><strong>Cheyney</strong>&lt;br&gt;Approved July 2014</td>
<td>Charge undergraduate tuition at the most recent <strong>Military Tuition Assistance (TA)</strong> reimbursement rate (currently $250 per credit) and graduate tuition at a fixed rate of $399 per credit to all active duty military, spouses and dependents of active duty members, veterans, and spouses and dependents of veterans of all branches of service (Army, Navy, Air Force, Marine Corps, Coast Guard, National Guard, and Reserves) attending Cheyney University at any location. Effective fall 2015–summer 2017. Implementation postponed indefinitely.</td>
</tr>
<tr>
<td><strong>Clarion</strong>&lt;br&gt;Approved April 2014</td>
<td>Charge all undergraduate students on a <strong>per-credit</strong> basis, in a revenue-neutral manner, by charging 90.5% of the System’s per-credit rate to all undergraduate students. Effective fall 2016–summer 2019. <strong>University will not implement in 2016/17.</strong></td>
</tr>
<tr>
<td><strong>East Stroudsburg</strong>&lt;br&gt;Approved July 2014</td>
<td>Charge 90% of the applicable tuition rate to students attending the System’s <strong>Center City</strong> location in downtown Philadelphia. The tuition rate would apply to all East Stroudsburg Center City programs, both undergraduate and graduate. Effective fall 2014–summer 2016. <strong>University seeks to continue pricing model.</strong></td>
</tr>
<tr>
<td><strong>Edinboro</strong>&lt;br&gt;Approved January 2014</td>
<td>Charge 105% of the in-state tuition rate to all newly enrolled domestic <strong>out-of-state</strong> undergraduate students. Effective fall 2014–summer 2017.</td>
</tr>
<tr>
<td><strong>Indiana</strong>&lt;br&gt;Approved January 2015</td>
<td>Charge tuition on a <strong>per-credit</strong> basis to all in-state undergraduate students. The university will phase in this program over three years, with a 7% rollback (charge 93%) of the System’s per-credit tuition rate in year 1, a 4% rollback (charge 96%) of the System’s per-credit tuition rate in year 2, and a 1% rollback (charge 99%) of the System’s per-credit tuition rate in year 3. The university will assess the program annually and may make appropriate adjustments to this plan. Effective fall 2015–summer 2018. Implementation postponed until fall 2016.</td>
