

UPDATED 5/26/2021

University Operational Framework

Note: This is a working document that is updated as needed

This revised document summarizes the State System's approach to engaging in face-to-face instruction during the ongoing COVID-19 pandemic in light of changing state and federal guidelines.

University presidents have discretion to issue guidelines and rules in conformity with revised state and federal guidelines for their respective universities, including learning and work modalities, as well as mitigation measures. University presidents are encouraged to post those guidelines and rules on their public websites. All students, employees and visitors are encouraged to review those plans.
