## Dear Appropriations Committee Members:

Affordable, career relevant postsecondary education is key to the future health and wellbeing of Pennsylvania.

It is an engine of social mobility – The most reliable pathway into and beyond the middle class. Yet today, low-income students are far less likely to attain a postsecondary credential than high-income students, and significant gaps exist between non-white and white as well as rural and urban students.

It is also a driver of economic development – Nearly 60 percent of all jobs in Pennsylvania require some postsecondary credential (certificate, associate's, bachelor's or graduate), yet only 47 percent of working-age adults have one.

Pennsylvania's State System of Higher Education is a critical part of Pennsylvania's future. Its universities are the most affordable in the state, and its 96,000 students are predominantly low- and middle-income—the very people the state must educate to ensure Pennsylvania:

- has the educated workforce it needs to attract employer investment and drive the state's economy.
- produces the healthcare workers, business and civic leaders, educators, engineers and professionals that all its communities—rural and urban—need to thrive.
- maintains reliable pathways into and beyond the middle class for all Pennsylvanians, including adults who need to re-skill or up-skill to maintain their viability in a changing labor market.

Yet, as we know, the State System is facing considerable challenges. And so—to shore up its future and the future health and wellbeing of the Commonwealth and to proactively solve the challenges of delivering public higher education in Pennsylvania at an affordable price—the State System has undertaken a monumental effort to redesign itself. The goal of this System Redesign is to transition from a system focused on the operation of universities into one focused strategically on the students who attend those universities.

Our approach entails leveraging the State System's massive scale to:

1. expand educational opportunities, notably by enabling students at one university to access educational programs at others.
2. reach new student markets, particularly adults who need to re-skill and up-skill to remain viable in the workforce.
3. respond with new educational programs to rapidly changing employer needs.
4. uncover cost efficiencies that maintain our affordability to all students. This is critically important for students who come from low- and middle-income backgrounds that the State System universities have historically served and for whom the Commonwealth needs to meet workforce demand and ensure continued opportunities for social mobility.

System Redesign is now well underway. In this past year the State System has:

- established a vision for the future – one in which distinctive universities leverage their combined operating scale and talent to expand students’ educational opportunities, improve their success, and accelerate the pace of innovation needed to serve new student and employer groups, contain operating costs, and ensure continued student affordability.
- made foundational progress implementing that vision by addressing urgent financial needs while laying the groundwork for broader transformations that are needed in order that the State System remain vibrant, affordable, and relevant in the 21<sup>st</sup> century.
- identified and begun capturing cost savings that we estimate will yield between \$80 million and \$120 million over eight years, during which time we anticipate significant revenue growth.
- responded as promised to specific concerns voiced by the General Assembly about the State System’s accountability and transparency, its slow progress aligning costs with revenues, its over-reliance on student tuition increases as a means of filling budget gaps, and the need to address the urgent challenges faced by low-enrolled schools. In each of these areas, it has delivered tangible, measurable, impactful, and lasting results.

But the State System cannot redesign itself without help from the General Assembly in three specific but related legislative actions:

- A 2 percent increase in the annual state appropriation.
- A \$20 million investment—part of a five-year \$100 million request—that will modernize the System’s operating infrastructure to better support students and improve efficiencies.
- Enactment of three bills that will relieve the System of costly regulations and improve its governance so that it may respond more nimbly and effectively to its challenges. It will also empower the State System to meet new demands from employers and students.

As stated in this document last year—we hear you. And over the last year our goal has been to be responsive to the concerns of the General Assembly, the Commonwealth, and most importantly, the needs of our students. What follows is another step forward in the unprecedented push for complete transparency and total accountability the State System has promised, and will continue to deliver. In these pages, we will report about our progress towards measurable goals—goals for improving our students’ success both while at university and afterwards in the labor market, as well as goals for ensuring our universities’ financial health and sustainability.

Daniel Greenstein  
Chancellor

# SUMMARY OF APPROPRIATIONS REQUEST

## EDUCATIONAL & GENERAL APPROPRIATION REQUEST

During FY 2019/20, Pennsylvania's State System of Higher Education received \$477.5 million in state appropriations. During the last five years, the Commonwealth's budget has provided the System with a combined increase in appropriations of \$64.7 million (16 percent in nominal dollars), following six years of reduced or stagnant appropriations. The State System is appreciative of the increased support provided by the General Assembly and Governor Wolf, and acknowledges the continued fiscal challenges facing the Commonwealth.

The State System's FY 2020/21 Educational and General (E&G) appropriation request builds upon the Commonwealth's commitment to increase funding for its state-owned universities, while addressing real affordability constraints experienced by Pennsylvania's low- and middle-income students. As such, this request was built upon a budget prepared with the following assumptions.

- Over the past five years, the State System has received appropriation increases annually, ranging from 5.0 percent in FY 2015/16 to 2.0 percent in both FY 2017/18 and 2019/20. Recognizing this trend for moderate increases in state funding, the System's FY 2020/21 budget estimates incorporate a 2.0 percent increase in state appropriations. This recognizes a modest increase in the "cost to carry" current operations into the upcoming year. An appropriation request of \$487,019,000, an increase of \$9,549,000 or 2 percent if fully funded, will continue the combined efforts of the Governor and the Legislature to support the Commonwealth's proportional share of the cost to carry operations into the upcoming year for its state-owned universities.
- Universities projected an overall 1 percent reduction in enrollment. Anticipated enrollment trends vary significantly due to differences in regional demographics, program mix, student success initiatives, etc. Preliminary tuition and fee revenue assumptions include these enrollment projections and adjustments that mirror the rate of inflation, maintaining the current level of affordability. In addition, most universities continue to address affordability for individual students through increases in institutional financial aid. Tuition rates for FY 2020/21 will not be addressed by the Board of Governors until spring 2020.
- Mandatory cost increases were anticipated, especially in employee pay, healthcare, and pension obligations. At the time of submission, these increases were included only for employees in two collective bargaining units for which new contracts had been agreed, replacing agreements that ended in summer 2019 (American Federation of State, County and Municipal

Employees [AFSCME] and the Service Employees International Union [SEIU]). Those employees represent approximately 27 percent of all staff and 39 percent of all salary costs. The budget excludes estimated future changes in pay for System employees represented by all other unions and non-represented employees for which salary agreements and actions were at that time unknown.

With the modest adjustments to revenue and expenditure requirements, universities will address the structural surpluses or deficits between revenues and expenses through reinvestment in strategic initiatives or through changes to their business models to enable financial sustainability. As universities implement lasting changes to their cost structure, available one-time resources (unrestricted net assets or reserves) may be used as a transitional step, typically reflected as a funding source referred to as “planned use of carryforward funds.” The requested appropriation of \$487.0 million, combined with other projected changes in the System’s revenue and anticipated mandatory expenditures, results in a balanced E&G budget. Notwithstanding the aggregate effect of creating a balanced budget, several universities will continue to face significant financial challenges. Although a modest net price adjustment to maintain current affordability levels has been incorporated into these projections, tuition rates for FY 2020/21 will not be addressed by the Board of Governors until spring 2020.

## SYSTEM REDESIGN INVESTMENT REQUEST

The success of the State System’s redesign, its future ability to provide all Pennsylvanians with affordable, career-relevant postsecondary education, requires investment in core infrastructure. That investment will do more than expand capability as necessary to achieve the outcomes described in the letter above. It will also produce significant returns measured both in revenue growth and cost efficiencies. Over an eight-year period, we estimate significant revenue growth resulting from expansion into new student markets, improved student retention, and expanded access to alternative revenue sources. And we expect \$80 to \$120 million in savings over the same period, including annual ongoing cost savings of between \$12 and \$18 million, cumulative returns on investment of between \$51 and \$82 million, and up to \$25 million from demolition of underutilized facilities (funded with existing resources). Additional savings will be achieved by aligning employee complement with enrollment levels.

Accordingly, the State System is requesting a line item appropriation of \$20 million in FY 2020/21 for System Redesign Investment, part of a Board-approved \$100 million, 5-year request. The funding would be dedicated to building the capabilities necessary to achieve the four scale-leveraging objectives detailed above and including the core systems infrastructure required to leverage the State System’s operating scale, enhance efficiency, reduce risk, and expand capabilities essential to driving student success. This infrastructure will include a single Student Information System, Enterprise Resource Planning upgrades and automation, student data services, and associated technology and training. The three initiatives comprising the \$20 million request are detailed below:

1. A shared services consortium. This customer-focused, metric-driven, duplication-eliminating consortium will provide to all 14 universities equitable and improved commonly required services. Consortium services will initially include human resources, procurement, finance, information technology, facilities, and analytics. Initial activities include upgrading and standardization of procure to pay, strategic sourcing, and human resources. **Total request \$5,850,000.**
2. A Student Information System. This initiative is to transition to a common student information system for all 14 universities to improve student interactions with registration, course catalogs, grades, transcripts, tests, scheduling, tuition and fees and financial aid. This will improve efficiencies within the universities as well as across universities, allowing more efficient sharing and reducing overall costs. **Total request \$12,000,000.**
3. A Student Success Center. Modeled after successful centers in several states including Texas and California, the Center will support universities in upskilling faculty and staff as a means of accelerating adoption of practices that improve student success, expand workforce aligned programming, and strengthen capabilities in key operating areas such as strategic finance and enrollment management. The Center will use an “institute” model that provides structured year-long experiential learning opportunities for cohorts of practitioners drawn from each of the universities. Cohort members participate in at least two annual multi-day institutes and are supported throughout the year by expert mentors and coaches. The approach has been shown to expand capability cost effectively as program participants become teachers and trainers at their home universities. Analysis for a new online educational platform will also be conducted for the State System universities to enable students at one university to access educational programs at others and to tap into underserved higher education markets totaling 17,000 net new students for online certificates, associates, bachelor’s, master’s, and doctoral degrees. **Total request \$2,150,000.**

## GOVERNOR'S FY 2020/21 BUDGET RECOMMENDATION

The State System of Higher Education requested a modest general appropriation increase of 2 percent (\$9.5 million) to \$487.0 million and a System Redesign Request of \$20.0 million to support the three one-time initiatives previously described that are needed to transform the infrastructure to support the sharing system. We would like to thank the Governor for support of System Redesign.

The Governor proposed a \$12.95 million or 2.71 percent general appropriation increase with support linked to System Redesign, falling short of the System's combined \$29.5 million requested increase by \$16.6 million. The State System continues to seek full funding of its request, given the operational needs of the universities, efforts to keep tuition affordable, and the importance of System Redesign implementation.

# The State System

## Progress Report and Accountability Dashboard

As part of its compact with the people of this Commonwealth, and its commitment to ongoing transparency and accountability, the Board of Governors undertakes to report annually on the State System's impact as an engine of social mobility and economic development, and on its efficient and effective operations.

The report is organized in the following sections:

1. Contributions to the state
2. Student access and enrollment
3. Student affordability
4. Student progression and completion
5. University financial efficiency and sustainability

Summary reporting will also be done dynamically via an online "accountability dashboard" to be launched in summer 2020.

# Section 1. Contributions to the state

The State System contributes significantly to the State in terms of:

- overall economic impact (including jobs created and maintained).
- workforce development.
- graduate earnings and return on investment.

## Economic impact

According to a study conducted by Baker Tilly Virchow Krause, LLP in 2015, State System universities contributed \$4.4 billion in economic impact to Pennsylvania, representing \$10.61 for every one dollar of public funds expended on the State System that year.

Overall, the State System employs more than 10,000 full-time faculty and staff, and we estimate another 62,000 people are employed outside the universities as a direct result of their existence. At that scale, the State System is one of the larger employers in the state. The State System’s universities—with few exceptions—are among the largest employers in their communities, and often in their counties (**Figure 1**).

Impacts are distributed geographically. The nearly 100,000 enrolled students and more than 520,000 System alumni who live and work in every one of Pennsylvania’s 67 counties comprise as much as 10 percent of the population in any given legislative district (**Figures 3-5**).

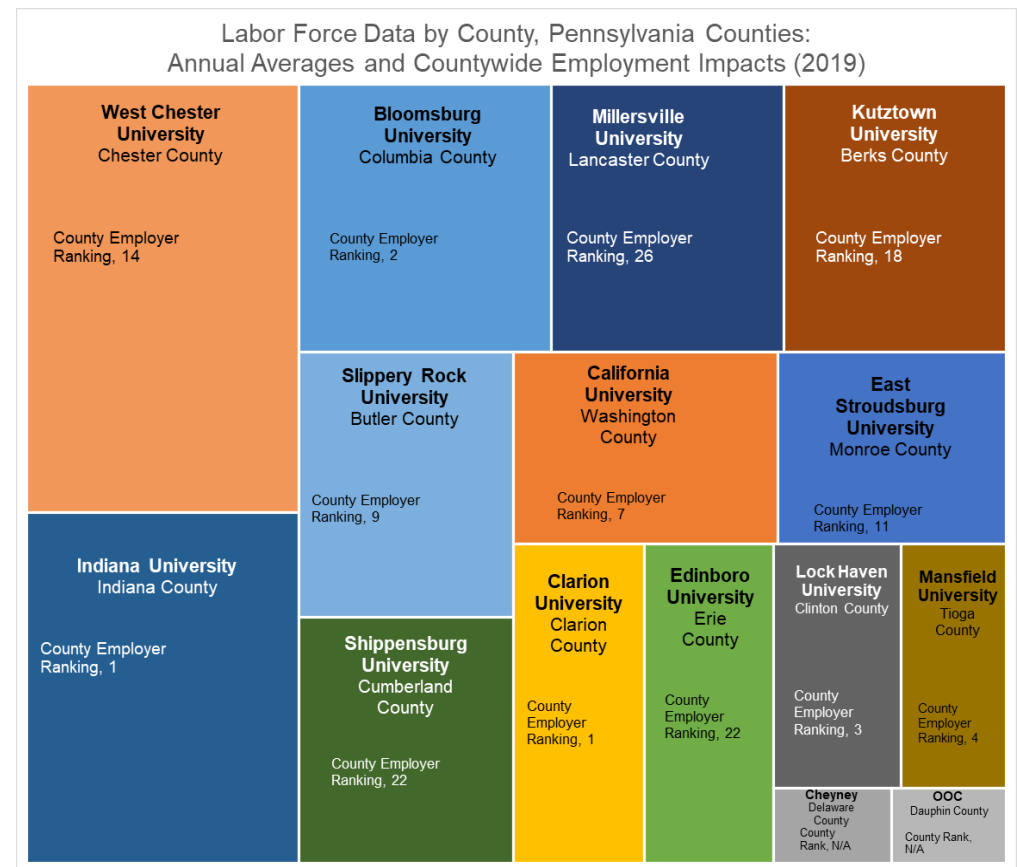

Figure 1

## Workforce development

System universities work closely with employers in their regions and use data that project workforce demand to continually review programs to ensure their relevance and to identify and respond to new and emerging needs. In 2019, for example, the System approved 35 new programs and discontinued 47 others.

As a result, the State System universities have seen a pronounced shift to high-need areas including STEM (science, technology, engineering, and mathematics) and healthcare-related programs which, when combined (STEM-H), represent the most popular areas of study, accounting for about one-third of the graduates receiving a bachelor's degree from a System university. Business, the second most popular field of study, accounts for about one-fourth of those now graduating.

The shift towards STEM-H and business is evident in the new programs introduced by State System universities over the past decade, and is expected to continue **(Figure 5)**.

Figure 5

Education also remains an important field of study. State System universities still produce the largest number of new teachers in the state.

Alignment between educational programs and workforce need is also apparent in **Figures 6 and 7**, which focus respectively on occupations with the greatest demand for employees and the highest enrolled programs of study offered at System universities.

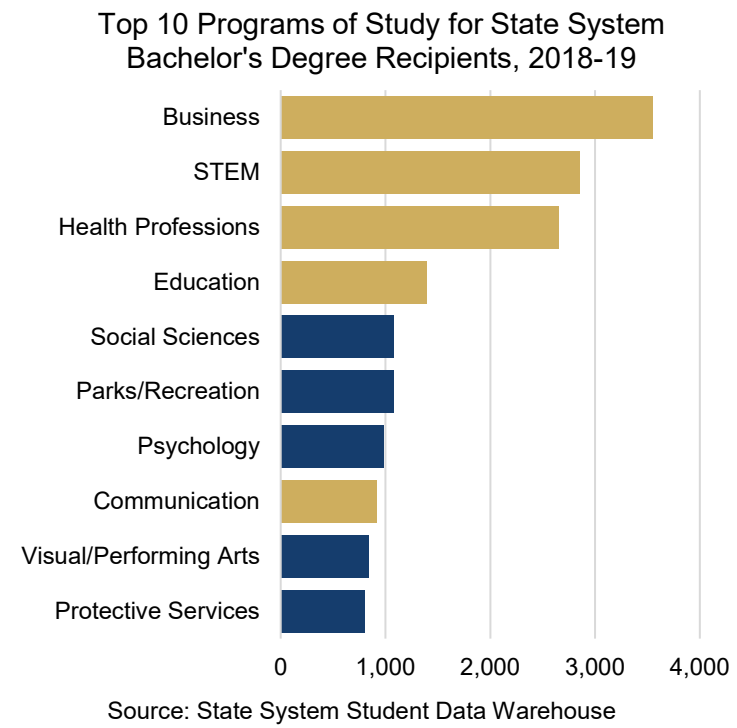

The left-hand graph shows the 10 highest-demand general occupations in Pennsylvania ranked in terms of the number of new jobs anticipated annually in Pennsylvania through 2026. The right-hand graph shows the most productive programs of study at the State System in terms of the number of graduates in 2018-19. Gold bars represent areas where workforce demand and graduate productivity are aligned. These data show opportunities for even greater alignment at the statewide level. More in-depth data are used to drive programmatic decisions at the university level.

Source: PA Department of Labor & Industry, 2016-2026 Long-Term Projections; based on occupations in O\*NET Job Zone 4

Figure 6

Source: State System Student Data Warehouse

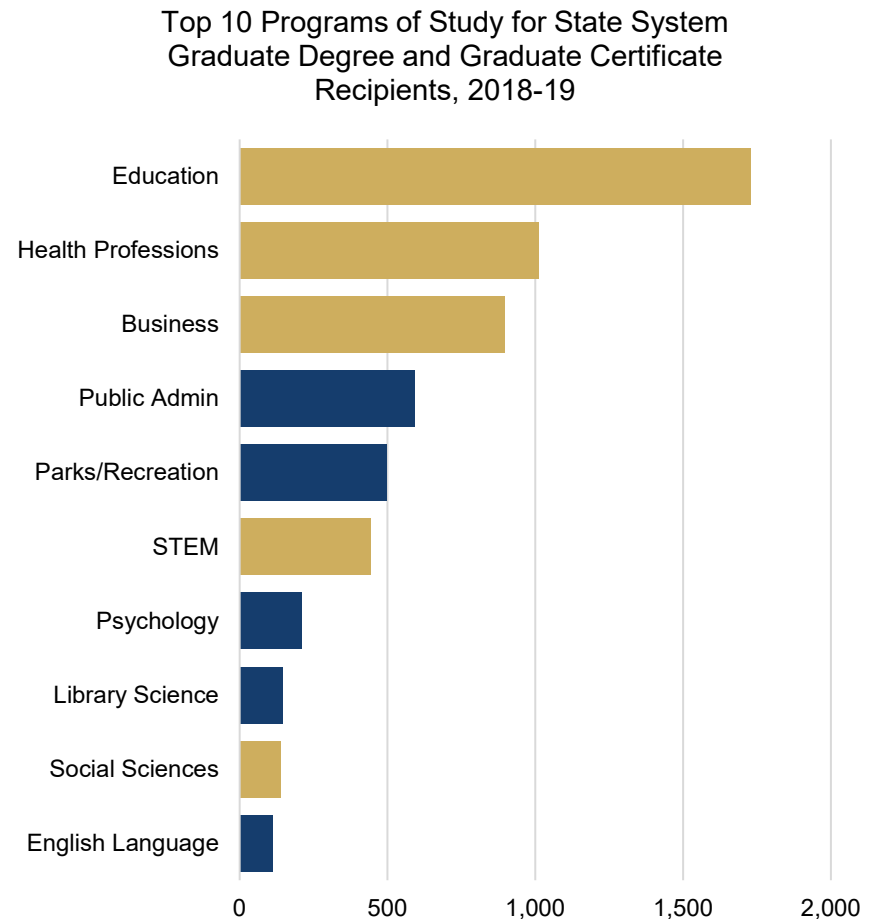

Figure 7

Workforce alignment is even more apparent at the graduate level than at the undergraduate level (**Figures 8 and 9**).

Source: PA Department of Labor & Industry, 2016-2026 Long-Term Projections; based on occupations in O\*NET Job Zone 5

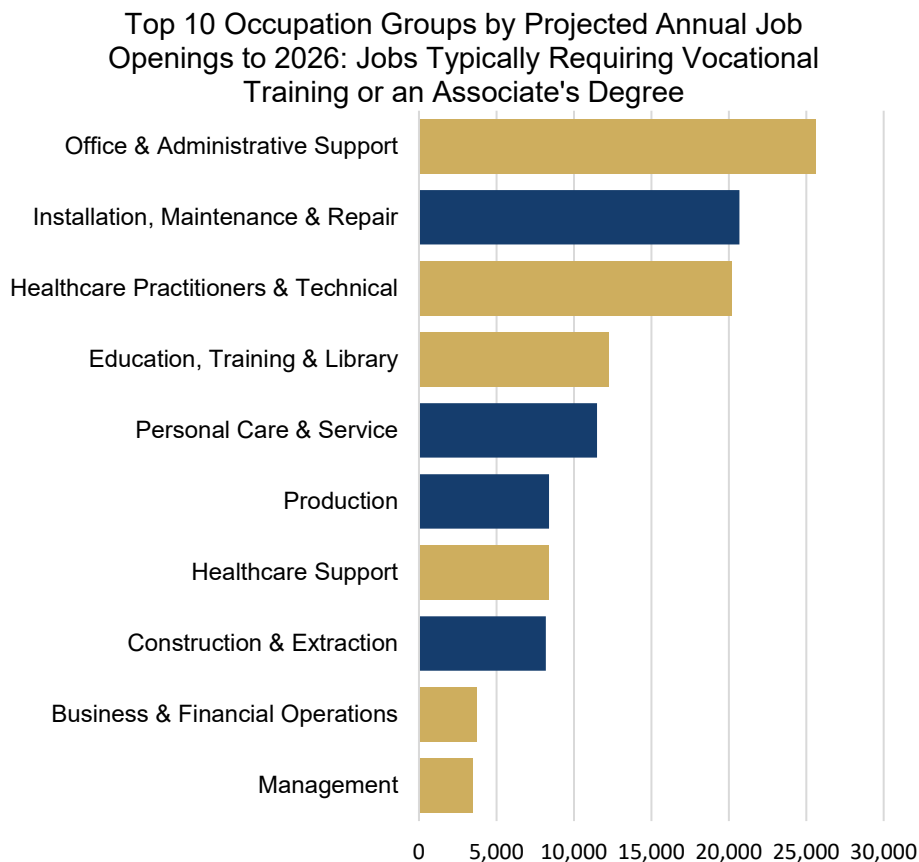

Figure 8

Source: State System Student Data Warehouse

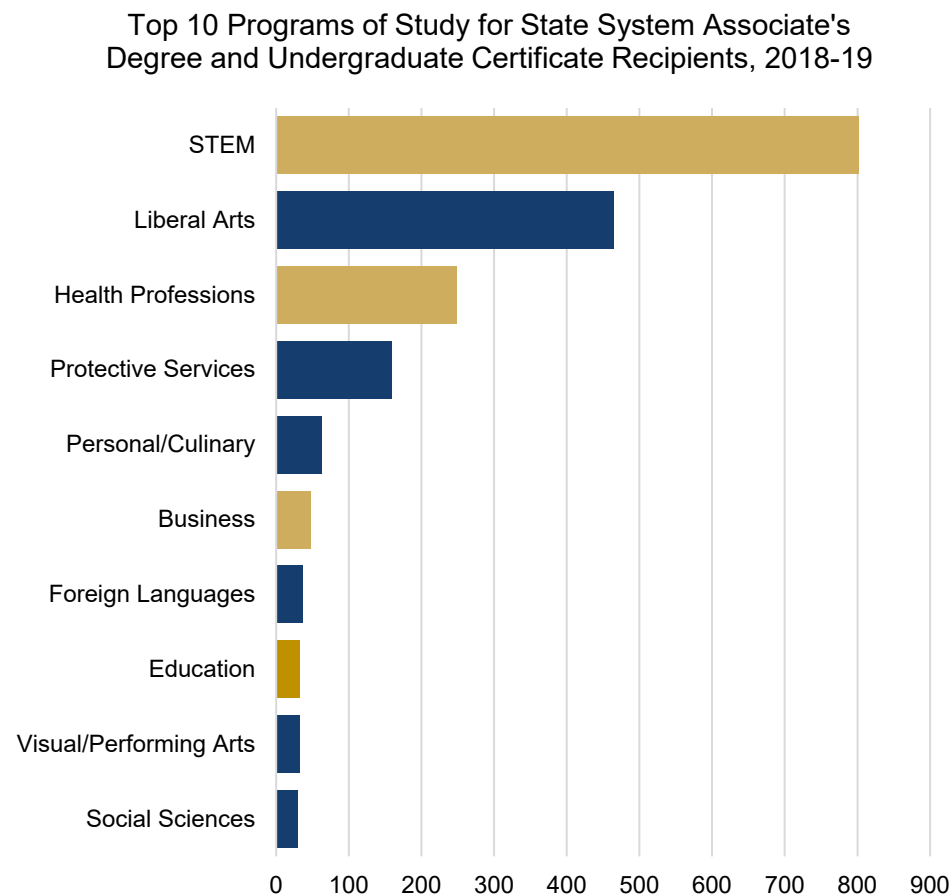

Figure 9

At the sub-baccalaureate level (associate’s degree and certificate), workforce alignment also appears strong, (**Figures 10 and 11**) but is hard to assess given relatively weak data on non-degree certificate programs. We expect to see significant improvement in these areas as we improve data about certificate programs and their students (a priority for 2020), and expand non-degree certificate programs that target high-demand employer and adult upskilling/reskilling needs.

Source: PA Department of Labor & Industry, 2016-2026 Long-Term Projections; based on occupations in O\*NET Job Zone 3

Figure 10

Source: State System Student Data Warehouse

Figure 11

Tight alignment between educational programs and workforce need shows up in graduates' employment outcomes and pays off for the state.

A year after graduation, 94 percent of graduates are employed, continuing their education, or serving in the military.

Ten years after graduating, Bachelor's degree recipients have average annual earnings of \$56,000, and fully 63 percent of them are living and working in Pennsylvania 10 (**Figure 12**).

And while students graduating in STEM fields do somewhat better economically than graduates in other fields, a good return on student's investment in their State System university education is available for all.

Longitudinal Employment Outcomes for Graduates 

Source: Integrated Student Data Warehouse, PA Unemployment Insurance Records  
Figure 12

Together, the relative affordability of a State System university education (section 3), the high degree of alignment between credentialing programs and workforce needs, and graduates' success in the labor market ensure students receive an excellent return on their investment in a State System education. This is demonstrated in **Figure 13**. It shows the net present value (NPV) of a student's investment in their State System university education after 10, 20, and 40 years, as well as lifetime earnings compared to those for a Pennsylvanian with no more than a high school diploma.

NPV is how much a sum of money invested today is worth in the future.

For higher education, this metric demonstrates what graduates get in terms of salary for their investment in a State System degree. It takes account of the net price of attending a State System university and graduates' salary outcomes.

### State System's Average Net Present Value

---

*On average, State System University Graduates receive a return of investment of \$866,144 forty years after graduating.*

Source: Georgetown University Center on Education and the Workforce, A First Try at ROI: Ranking 4,500 Colleges, 2020. Systemwide averages created using relative number of graduates from corresponding data.

Figure 13

## Section 2. Student access and enrollment

### Background and overview

After a decade of growth, student enrollments across the State System have declined by almost 19 percent since fall 2011 (**Figure 14**). This decline varies by university (**Figure 15**), compares to an overall decline of 3 percent in Pennsylvania and a decline of 2 percent in the university's national comparator groups.

Pennsylvania's State System of Higher Education  
Fall Headcount Enrollment History

Note: Enrollments for 2012 forward include credit hour and clock hour students.

Source: State System Student Data Warehouse

Figure 14

Enrollment decline is driven by a variety of factors including **the rising price of education**, **decline in the size of the high school leaving population**, and a **strong economy** which sees proportionally more people entering the workforce.

**The rising price of education** at the State System is directly related to the level of state funding. Pennsylvania has increased funding for the State System in each of the last five years by a combined total of approximately \$65.7 million (**Figure 16**). This amounts to a 2 percent increase since 2011-12 in inflation-adjusted dollars.

Yet, recent funding increases have not offset the combined effect of inflation and the seven consecutive years prior to 2011-12 when state funding either was reduced or held flat. The net result is that state funding in 2019-20 is at or near the same level as it was between 2005-06 and 2006-07, representing a \$140 million cut in inflation-adjusted dollars over that time period, a \$220 million (32 percent) cut from 2000-01 (**Figure 16**).

Source: State System Student Data Warehouse  
Figure 15

## State Appropriations Adjusted for Inflation

*\*Inflation adjustment based on CPI-U through 2018-19, and 2019-20 inflation of 2.0% per Congressional Budget Office projection.*

Source: State System Budget Office  
Figure 16

At this funding level, Pennsylvania ranks 47<sup>th</sup> of 50 states in terms of educational appropriation per student FTE, spending \$3,558 per student less than the 50-state average (**Figure 17**). This ranking represents an improvement over 2016-17 when Pennsylvania was 48<sup>th</sup> in the nation and reflects continuing and welcomed incremental support for the State System over the last several years.

Net Tuition per FTE as Percent of Total Educational Revenue

Source: State Higher Education Executive Offices FY18 Report  
Figure 17

Student tuition has increased consistently in response to the long-term pattern of state investment. The result is that the proportionate burden borne by students for the cost of their higher education was 73 percent in 2018 (Figure 18).

Notes: Data adjusted for inflation using the Higher Education Cost Adjustment [HECA]. Full-time equivalent [FTE] enrollment equates student credit hours to full-time, academic year students, but excludes medical students. Educational appropriations are a measure of state and local support available for public higher education operating expenses including ARRA funds, and excludes appropriations to independent institutions, financial aid for students attending independent institutions, research hospitals, and medical education. Net tuition revenue is calculated by taking the gross amount of tuition and fees, less state and institutional financial aid, tuition waivers or discounts, and medical student tuition and fees. Net tuition revenue used for capital debt service is included in the net tuition revenue figures above.

Figure 18

## Change in In-State Undergraduate Headcount by Income Level

*For those who completed the FAFSA*

Tuition increases have had a larger impact on the low- and middle-income students that the State System universities have historically served and that the State needs most to succeed in order to meet workforce development goals. This is evident in **Figure 19**, which shows steeper enrollment declines for those students than for higher income students.

Source: State System Student Data Warehouse  
Figure 19

**Demographic trends** are also responsible for declining enrollments. Pennsylvania is at the tail end of a period of contraction in the size of the high-school-leaving population (2012-2020). After a period of modest growth (2020-2025), the number of high school graduates in Pennsylvania is expected to decline precipitously by as much as 9 percent by 2035 from the number of graduates in 2012 (**Figure 20**). This will further depress enrollment of “traditional” students (those entering university directly after high school), who today represent almost 90 percent of all undergraduates enrolled at the System’s universities.

Source: Pennsylvania Department of Health "Pennsylvania Vital Statistics 1997-2016." Pennsylvania Department of Education Public High School Graduates 2003-2018. Pennsylvania Department of Education Public High School Enrollment 2003-2019. Methods based on Western Interstate Commission for Higher Education (WICHE) "Knocking at the College Door: Projections of High School Graduates." Issued December 2012. Updated by the office of Advanced Data Analytics June 25, 2019.  
Figure 20

**Figure 21** demonstrates how university enrollments relate to population trends in the counties from which they draw most of their students (“feeder counties”) for the period 2013-2018. Gray bars show the percentage change in the universities’ enrollments during the period. Gold bars show the percentage change in the size of the high school leaving population in the universities’ five feeder counties. Blue bars show the percentage change in the universities’ enrollment from their feeder counties.

Every State System university except for Bloomsburg and Kutztown has captured a larger share of high-school-leavers from its feeder counties (blue bar has a higher value than the gold bar). Slippery Rock and West Chester universities are expanding beyond their regions (gray has a higher value than the blue and gold bars) and have been successful in growing enrollments. California, Cheyney, Clarion, Edinboro, Indiana, Lock Haven, and Mansfield are doubly challenged trying to expand beyond their region while drawing from regions where the size of the high school leaving population is shrinking.

### System Five-Year Change in Percent Enrollment Compared to Five-Year Percent Change in HS Graduates of Top 5 Counties by Enrollment

Figure 21

### Responding to access and enrollment challenges

To continue their historic contribution to Pennsylvania’s workforce development and social mobility needs, State System universities are striving to enroll and graduate proportionately more students from traditionally under-served populations, stabilize declining enrollments of low- and middle-income students and enroll more adults seeking to upskill or reskill.

Pennsylvania State System universities have made significant progress closing the enrollment gap between white students and students of color (**Figure 22**). In 2018, 21 percent of the student body was non-white; only slightly below the proportion of non-whites in the state’s overall population of almost 23 percent (**Figure 23**). It is estimated that the non-white population will remain relatively flat through 2028, at which point we expect non-white students to enroll in proportion to their representation in the state’s population.

Population Growth of Non-white Groups in Pennsylvania and the State System of Higher Education

Figure 22

Pennsylvania and State System Minority Population

Source: State System Student Data Warehouse, ACS 5-year estimates

Figure 23

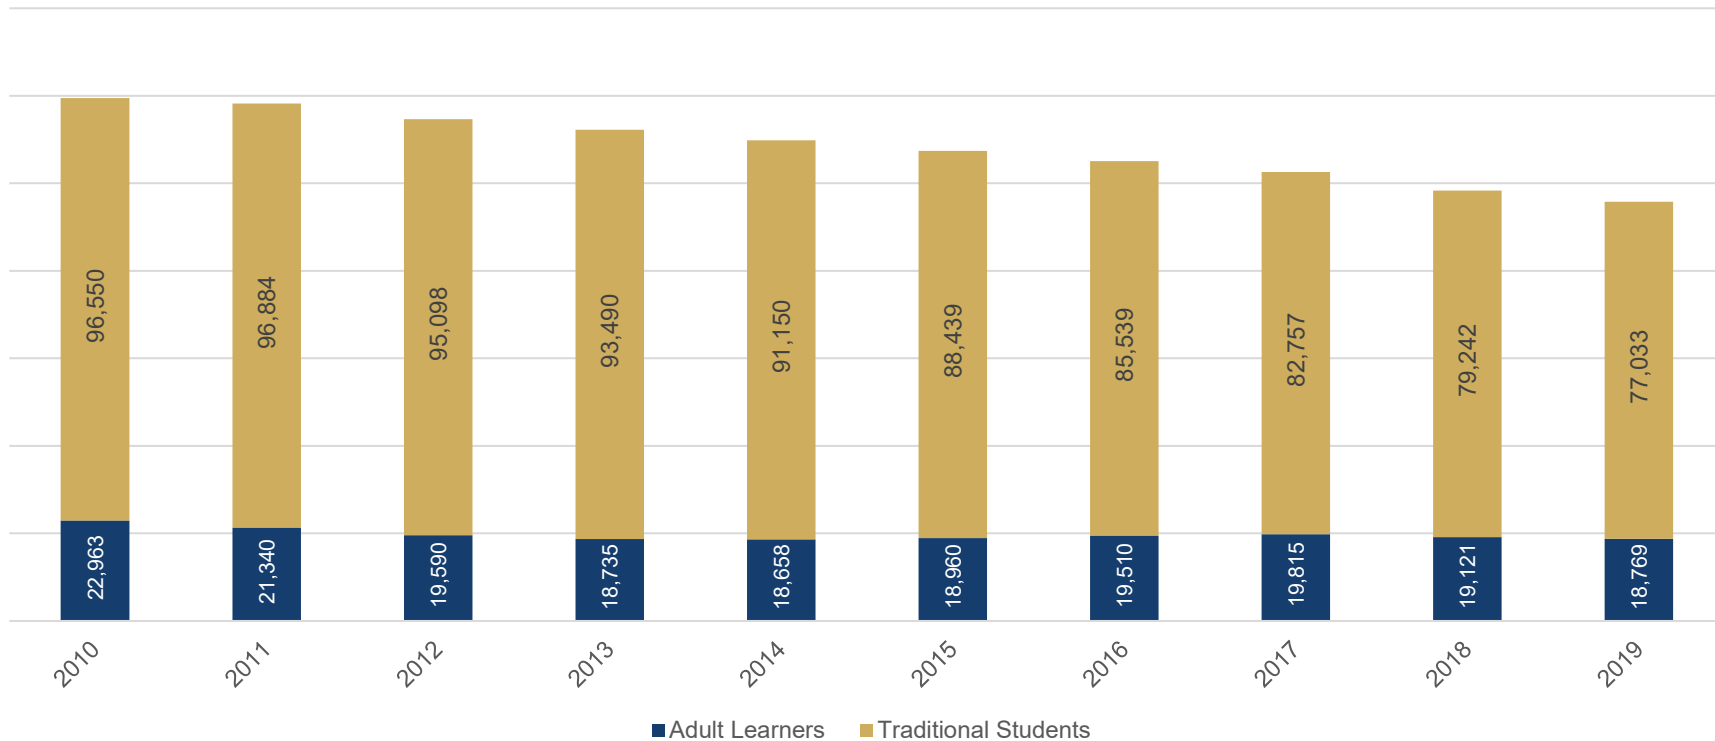

The gap in enrollment between lower- and higher-income students is growing. Maintaining affordability for these students will be critical here and is the subject of Section 3.

Source: State System Student Data Warehouse  
Figure 24

The proportion of adult students (defined as students over the age of 24 and referred to as adult learners in the figure below) has remained steady at around 10 percent for nearly a decade (adults represent 10, 28 and 72 percent, respectively, of undergraduate, graduate and non-degree certificate enrollments). This is better than the national picture where adult enrollments have declined by 13 percent over the same time period. During the next five years, we expect the number of adult students to grow, reflecting programmatic shifts that target adult reskilling and upskilling needs.

Fall Enrollment Trends for Traditional Students and Adult Learners

Source: State System Student Data Warehouse  
Figure 25

Fall 2019 New Undergraduate Transfer Enrollments:  
5,374

Source: State System Student Data Warehouse  
Figure 26

Growing transfer enrollments is a critical means of providing affordable pathways to and through postsecondary education and is a priority for State System universities.

Given the lower student tuition that applies at community colleges, the so-called transfer pathway is a particularly affordable option for students pursuing a four-year degree. Transfer students are, as a result, an important source for diversifying the universities' student bodies.

Transfer student enrollments have declined 16.6 percent since 2013, reflecting declining community college enrollments which are approximately of the same magnitude, as well as increasing competition from low-cost out-of-state online providers. In fall 2019, approximately 2,600 students transferred to a State System university from a Pennsylvania two-year public community college in pursuit of a four-year baccalaureate degree.

Students who take credit-bearing college courses while still in high school do demonstrably better than those who do not, enrolling in and graduating from college at higher rates. Such programs also improve student affordability (students who participate in them accumulate credits toward their college degree at a lower per-credit cost) and help diversify the student body. While early college high school programs are still relatively small, they are growing significantly and will continue to do so as part of student affordability and student success efforts (**Figure 27**).

Dual Enrollment/Early Admit High School Enrollment

Source: State System Student Data Warehouse  
Figure 27

## Section 3. Student affordability

State System universities are the most affordable postsecondary option in Pennsylvania. Ensuring they remain affordable is critical to continuing service to low- and middle-income students and to meeting state social mobility and economic development needs.

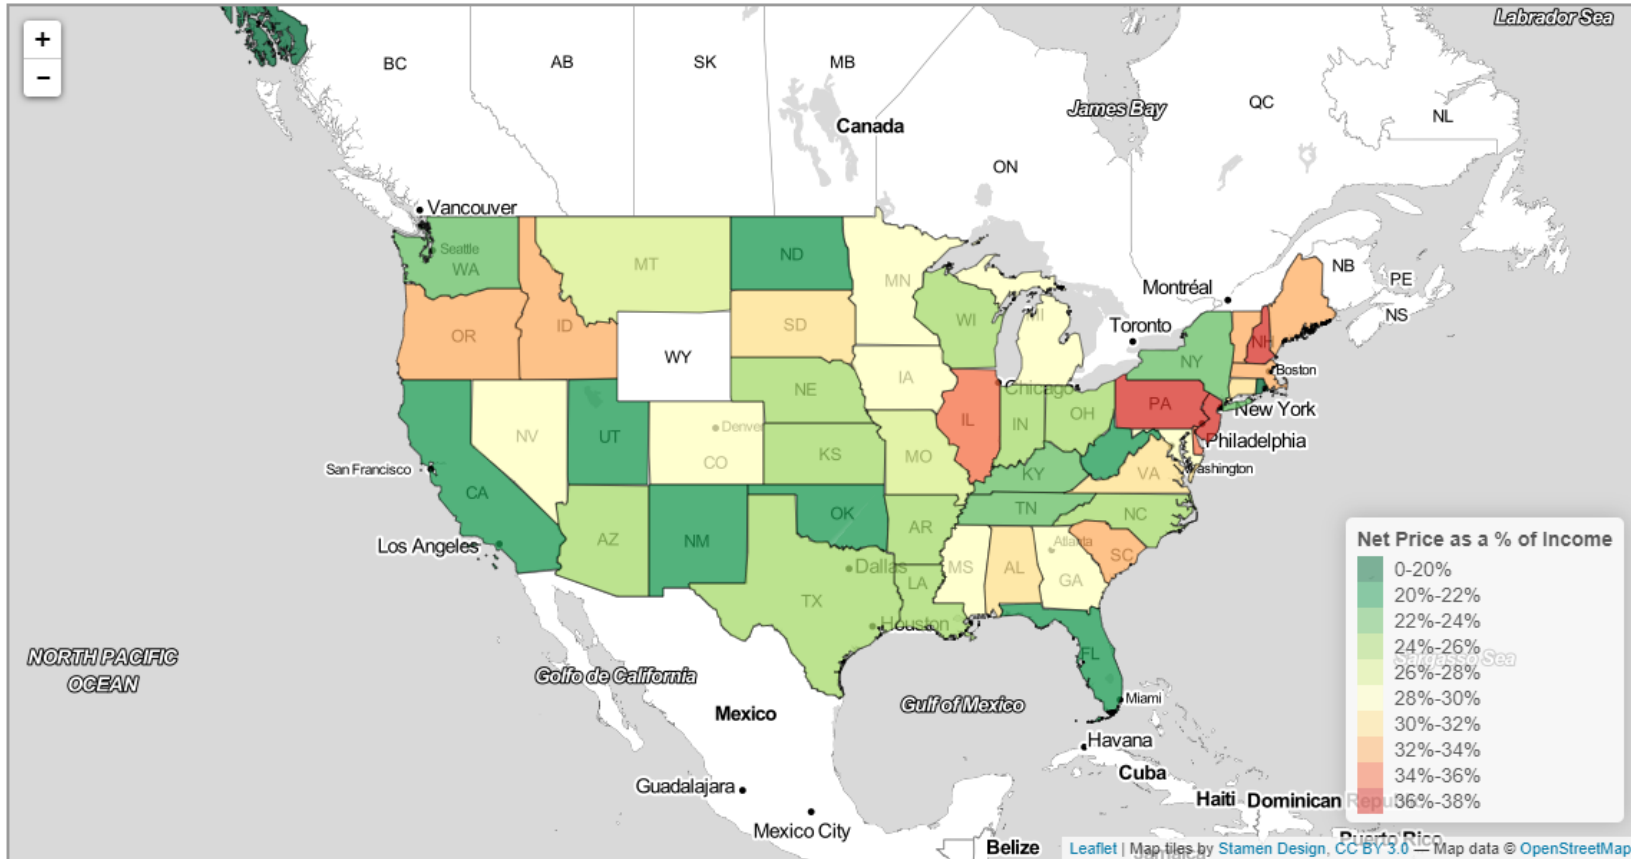

State System universities are adopting a portfolio approach and showing progress in key areas. Work managing operating costs (section 5) creates opportunities to curtail price increases. Work improving student progress towards their degrees (section 4) and supporting community college transfer and high school dual enrollment options (section 2) supports student affordability directly. So do strategic approaches to setting rates for tuition, fees, room, and board, and efforts to increase the amount of aid that universities make available to students (reported in this section).

The universities' success, however (the success of public higher education nationally), depends heavily on public support in the form of annual appropriations made directly to the State System universities and/or grants, scholarships, or other financial awards made directly to students.

As noted above, Pennsylvania ranks 47<sup>th</sup> among 50 states in the level of funding per student FTE, and \$3,550 per student behind the national average (**Figure 18, p.25**). As a result, State System universities' proportionate reliance on tuition revenues has grown to become second highest nationally at 72.7 percent compared to the US average of 46.6 percent (**Figure 17, p.24**). The combined trends make Pennsylvania the second least affordable state with respect of higher education—49<sup>th</sup> out of 50 in terms of student affordability (**Figure 28**).

Percent of household income to attend, full time, public four-year colleges

Source: Institute for Research on Higher Education (2016). *College Affordability Diagnosis*.  
[https://peabody.vanderbilt.edu/research/studies/affordability/maps\\_pub4.php](https://peabody.vanderbilt.edu/research/studies/affordability/maps_pub4.php)

Figure 28

The **average total price of attendance** including tuition, fees, and room and board for a typical student living on campus at a State System university has increased by 33 percent since 2011-12.

Despite this, total price of attendance is lower in 2019-20 than most other four-year residential options in Pennsylvania. It is also lower than the average price for four-year universities accredited by the Middle States Commission on Higher Education (in Delaware, the District of Columbia, Maryland, New Jersey, New York, Pennsylvania, Puerto Rico, and the U.S. Virgin Islands) and only \$8 more than the average price of four-year universities nationally.

2019-20 Price of Attendance Comparisons  
for Typical New In-State Undergraduate Living on Campus

Integrated Postsecondary Education Data System (IPEDS)  
Figure 29

Source:

Total price varies across the State System universities owing to different structures for tuition, student fees and room and board (which vary within a university, depending on the housing and dining options students choose). **Figure 30** shows price variation by university. The gray area reflects the price range for on-campus, in-state undergraduate students, based on the housing and dining options they choose.

2019-20 Price of Attendance by University  
for Typical New In-State Undergraduate Living on Campus

\*Gray area denotes range of price based on minimum and maximum housing/dining options \*\*Includes Technology Tuition Fee

Source: Integrated Postsecondary Education Data System (IPEDS)  
Figure 30

Federal, state, and institutional grant aid helps students offset the price of attendance, but the availability of aid has not kept pace with the rising price of attendance. **Figure 31** represents the gap between the price of attendance and any grant aid a student receives. Grant aid includes grants, scholarships and other monetary awards a student receives that do not need to be repaid.

History of Price of Attendance with Average Federal, State, and Institutional Grants

Figure 31

Lower-income students receive more grant aid and have a lower net average price of attendance than higher-income students. (Figure 32)

### State System 2017-18 Average Net Price vs Average Grant Aid, by Income Level

Source: State System Student Data Warehouse  
Figure 32

Despite this, overall increases in the net price of attendance have hit low- and middle-income students hardest **(Figure 33)**. These students make up a majority (72 percent) of total enrollments at State System universities.

### Net Price as Percent of Family Income

Source: Integrated Postsecondary Education Data System (IPEDS). \*Data is for first-time, full-time, degree/certificate-seeking students paying the in-state tuition rate, who received any Title IV federal financial aid. Enrollment by income level is provided for Fall 2017 students, with approximately 12% of students not filling the FAFSA.

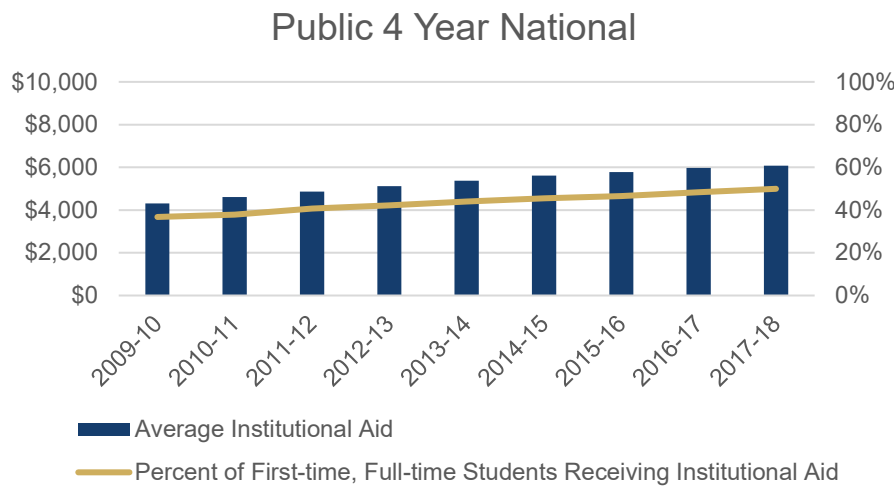

Figure 33

Institutional aid is money that universities take from operating budgets, donor gifts, and other sources, and distribute to students as grant aid in order to reduce their total price of attendance.

State System universities fall behind public four-year universities nationally in terms of the proportion of their students who receive institutional aid and the average amount of aid distributed to each student (**Figures 34 and 35**). While State System universities have distributed aid dollars to a growing proportion of students in recent years, the average aid per student has declined (**Figure 35**).

As elsewhere, there is considerable variation between universities (**Figure 36**).

State System universities are addressing this challenge by increasing the amount of institutional aid that they make available to students (e.g., building scholarship funds through donor support and implementing tuition return to aid policies).

Source: Integrated Postsecondary Education Data System (IPEDS)  
Figure 35

Figure 34

## 2017-18 Average Institutional Aid for First-time, Full-time Students

Source: Integrated Postsecondary Education Data System (IPEDS)  
Figure 36

**Need is net price of attendance** minus **expected family contribution** (the amount a student is expected to pay for their education as calculated based on a student's completed Free Application for Federal Student Aid [FAFSA] form). Need is met by students in a variety of ways, including through loans, on-campus work study, off-campus employment, tax credits, and private support.

Because price of attendance has grown more rapidly than available aid and average family income, need has grown, driving greater reliance on student loans (**Figure 37**).

Loan debt for State System university graduates is high compared to other public universities outside of Pennsylvania, reflecting low overall state support and resulting high net price of attendance. Despite this, the overall student default rate of 7 percent is lower than the national average and indicates that graduates are employable, getting good jobs that enable them to pay back their debt.

Pennsylvania's State System of Higher Education  
Average Debt of Graduates, by University, 2011 - 2018

University	2011 Graduates	2012 Graduates	2013 Graduates	2014 Graduates	2015 Graduates	2016 Graduates	2017 Graduates	2018 Graduates	Most Recent (2016) Loan Default Rates

Figure 37

## Section 4. Student progression and completion

Students' educational outcomes are measured in terms of their progression to and completion of a credential. Data are "disaggregated" to show outcomes for different student groups defined in terms of their race/ethnicity, income, etc. By disaggregating data, it is possible to identify and advance initiatives that eliminate attainment gaps between different groups.

Presently, data are available for undergraduate degree-seeking students that make up 81 percent of State System university enrollments. Data on students seeking graduate degrees and non-degree credentials are being developed and will be presented in the future.

Using these data, State System universities are able to target academic, student, financial and other supports to bolster student success and address attainment gaps. As shown in these pages, several universities are showing early signs of improvement in student retention between the first and second years and in graduation rates. Through System Redesign, these efforts are being accelerated and we expect to see their significant impacts.

**Student retention** measures the proportion of students that persist from their first to their second year—an important indicator of their likelihood of completing a degree. Systemwide, around 80 percent of first-time, full-time Bachelor's degree-seeking students are retained, compared to 75 percent for comparator institutions nationally.

Over the last several years, retention rates dipped at many State System universities in ways that reflect responses to the Great Recession and its aftermath. They have recovered in the last two or three years—a direct result of deliberate actions on the part of State System universities to ensure students' success. We expect improved retention rates to show up in improved graduation rates in three years.

While the overall picture is promising, there is work to do addressing attainment gaps. These have grown between white and non-white students in the period 2013-17 (from 8 percent to 14 percent) and between students receiving Federal Pell grants (typically from families earning less than \$75,000) and those not receiving Pell grants (from 7 percent to 11 percent). (**Figures 38 and 40**)

Here too, there is considerable variation across universities (**Figure 39**).

Figure 44

## Section 5. University financial efficiency and sustainability

**Figure 45** shows the State System's 2019-20 budget, totaling \$2.3 billion distributed as follows: \$1.7 billion in educational and general (E&G) enterprises (all activity associated with instruction, student support services, and associated administrative and facilities operations), \$0.3 billion in auxiliary enterprises (self-supporting activities such as housing, dining and student unions) and \$0.3 billion in restricted (funds for which uses are restricted by the provider).

FY 2019-20 System Budget

Source: State System Budget Office  
Figure 45

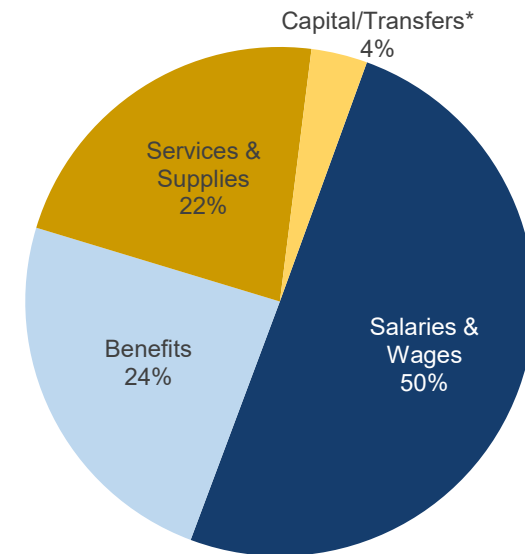

## Educational and General (E&G)

The E&G budget is funded by student tuition and fees (68 percent), state appropriations (27 percent), and other miscellaneous sources (5 percent).

Seventy-four percent of the E&G budget is spent on personnel-related expenditures, followed by other operating cost categories such as services and supplies (22 percent) and capital and transfers (4 percent). Transfers reflect the university's investment in the renewal and replacement of its physical plant from the E&G budget (**Figure 46**). The overall expenditure allocation is little changed since 2010 (**Figure 47**).

Also little changed since 2010 is the proportional expenditure by functional categories, e.g., instructional and academic supports, student services, etc.

### FY 2019-20 E&G Expenditure Budget

*\*Capital/Transfers represents annual commitments to renewal and replacement of the physical plant from the E&G budget. Excludes Commonwealth capital funding and Key '93 funds for deferred maintenance.*

Source: State System Budget Office  
Figure 46

## Pennsylvania's State System of Higher Education 10-year History of Education & General Expenditures

Source: State System Budget Office  
Figure 47

In response to enrollment declines and the long-range pattern of state support, the State System universities have introduced efficiencies in order to minimize the upward pressure on students' net price of attendance. Together, they have eliminated nearly \$400 million in expenditures from their combined operating budgets over the last 14 years and reduced the number of permanent employees by about 1,100 since 2009.

Still, revenues have declined faster than costs. This has impacted the State System's overall financial health.

In response, in 2019 the State System required that universities review four key financial health measures—annualized student FTE enrollment, annual operating margin ratio, primary reserve ratio, and university minimum reserves. Universities will also begin tracking key efficiency measures, including expenditure per student and student-faculty ratio.

These measures are presented below and in future years will allow us to record progress stabilizing the State System financially.

**Annualized Student FTE Enrollment** represents impact on revenues from tuition, fees, and room and board as collected from students, and is the key revenue driver for State System universities.

Universities will set and agree upon enrollment goals with the Chancellor and present them to the Board of Governors for approval as part of their budget estimates. Universities are not required to increase enrollment (there are good educational and business reasons to maintain or even reduce enrollment levels). They are required to ensure operating budgets (expenditures) align to revenues earned at the target enrollment level.

The **Annual Operating Margin Ratio** shows for every dollar of revenue a university receives, how much is left after operating expenses are removed. For example, a positive operating margin enables the university to make investments in improving students' experience and student success, or to pay down debt and relieve budget pressure of interest payments. An annual operating margin ratio of 0 means that a university expended all its revenues for operations in a given year and has nothing left for reinvestment.

The State System has established a goal for each of its universities to achieve an annual operating margin of at least 2-4 percent. As shown in **Figure 48**, the annual operating margin ratio has declined since 2016.

Source: State System SAP  
Figure 48

The **Primary Reserve Ratio** shows how long a university could function and pay its obligations, including debt, without additional revenues, and is one indicator of a university's financial health.

The State System's goal is for each of its universities to have a primary reserve ratio of 40 percent. The ratio for the System overall has declined in recent years, with particular impact on several of its universities (**Figure 50**).

State System 3-Year Rolling Average Primary Reserve Ratio

Figure 49

**University Minimum Reserves** shows the number of days a university could operate without additional revenues, and is another measure of financial health.

The State System's goal is for each of its universities to have minimum reserves on hand for at least 90 days of operation. Minimum reserves have declined in recent years, with particular impact on several of its universities (**Figure 51**).

Source: State System SAP  
Figure 51

**Expenditure per student FTE** is a measure of a university's operating efficiency. Since 2011-12, expenditure per student FTE has increased 37 percent.

**Figure 52** shows that in 2017-18, ten State System universities were less efficient than the average that applied to their comparator institutions nationally.

Figure 53

Ratios comparing the number of students to the number of instructional faculty and to staff (non-instructional faculty and staff), respectively, are also used to assess operating efficiency.

With regard to student-to-faculty ratio, **Figure 54** shows that in Fall 2018, seven State System universities were more efficient than their comparator groups nationally (had higher ratios). **Figure 55** shows growing inefficiency according to this measure over the 2014-2018 period.

Figure 57

Through System Redesign, the State System universities are addressing efficiency issues through a number of means, including capturing cost efficiencies through the use of shared services (see below), and requiring that universities set and then meet agreed-upon revenue and expenditure goals that ensure their financial sustainability.

Efficiencies gains will be tracked annually in these pages under the following headings:

- Personnel
- Shared services
- Facilities
- Shared educational programs and courses

Cost efficiency data for shared services and shared educational programming are in development and will be presented in 2021. We are also evaluating how best to track revenue growth resulting from System Redesign.

## Personnel

Personnel costs represent 74 percent of total E&G expenditures and have grown by 17 percent since 2011-12.

Key cost drivers include **number of employees**, **salary levels**, **salary growth**, and **benefit costs** (pension and healthcare). Each is examined below.

The **number of employees** at State System Universities has declined since 2009, but not as fast as enrollment levels, as shown in **Figure 58** which represents employees by collective bargaining unit (eighty-five percent of the State System's employees belong to one of eight bargaining units with which the university has nine labor contracts), and in **Figure 59** which represents employees by functional category.

### State System Complement Trend by Bargaining Unit

\* Fall Headcounts as of October 31st  
 \* 14 universities and Office of the Chancellor Personnel, excluding students

■ APSCUF ■ AFSCME ■ Non-Represented ■ SCUPA ■ All Other

Aligning the employee complement with enrollment levels is critical to the universities' and the State System's overall financial sustainability. Accordingly, in 2019 the Board of Governors required universities to set efficiency goals, including goals pertaining to student:employee ratios.

Source: State System SAP

Figure 59

Salaries for eighty-five percent of State System employees are negotiated within the State System's nine collective bargaining units.

**Salary levels** for faculty and senior administration are tracked against national benchmarks (using data from the American Association of University Professors for faculty and from the Integrated Postsecondary Education Data System for senior administrators. According to these data, salaries paid to both employee groups are comparable to those that apply at comparator universities nationally (**Figures 60 and 61**).

### 2018-19 Average University Executive Level Salaries

\*All Funds

\*\*Total Personnel includes all salaries, wages, and benefits (healthcare, pensions, other retirement, social security, etc.)

Source: University FINRPTs

Source: State System Budget Office  
Figure 63

**Healthcare** is another key driver of personnel costs. The State System operates two healthcare programs covering about two-thirds of its employees. One plan covers non-represented employees and members of two of the smaller collective bargaining units, including health center nurses and campus police and security officers. The other plan covers faculty and athletic coaches. The Pennsylvania Employee Benefit Trust Fund (PEBTF) covers the remainder of those eligible to receive healthcare coverage.

The two State System plans were redesigned in 2018 to include higher member cost-sharing for certain medical services, along with an increased employee premium contribution. Plan changes have held down healthcare costs for the System, at a time when employer spending on a national level for health plans continues to rise. **Figure 64** shows:

- The total family premium is now lower than the national average.
- The total healthcare claims paid in all active employee State System plans for 2017-18 was the lowest since the 2011-12 fiscal year.

Figure 64

## Costs, cost efficiencies, cost avoidance, and capability building.

### Shared services

By sharing in the development of key business and administrative functions, and leveraging their collective buying power, State System universities annually save on and avoid significant costs. The work also enhances service capability and quality beyond that which many universities could afford operating independently.

Presently, the portfolio of shared services work in this area includes human resources, procurement, data analytics, information technology, finance, and facilities management (discussed below). Cost savings also result from having a single administrative office (the Chancellor's Office) that interacts with state and federal governments around education and related policies, budgets, and compliance reporting.

Under System Redesign, and through the additional investments, core infrastructure upgrades will be made to improve automation and efficiency of service delivery, allowing for increased sharing and efficiencies at the universities.

To date, only rudimentary estimates of cost avoidance and cost efficiencies have been gathered. Going forward, these will be formalized and reported against specific annually agreed-upon goals.

## Facilities

Facilities maintenance is an important component of State System operations and one that presents significant challenges. Fifty-four percent of the System's academic facilities have not had a major renovation in 25 years and require a significant capital investment (**Figure 65**). The universities have historic facilities, which tend to be less efficient to operate and costlier to maintain and repair than newer construction. Commonwealth procurement requirements such as the Separations Act and Prevailing Wage Act increase construction durations and costs. Other Pennsylvania higher education sectors do not have these requirements. Although the universities invest annually in their facilities, the State System does not have sufficient resources to do so in the most cost-effective manner.

The universities have three primary sources for funding building maintenance.

- **University operating funds** are used for maintenance and operations of the physical plant including grounds, janitorial, preventative maintenance, repairs, and deferred maintenance. Last year State System universities spent about \$45.6 million on repairs and modernization of their facilities; national models suggest at least \$85 million should be invested annually in this area to keep up with deferred maintenance (**Figure 66**).
- **Key '93 funds** also are used to help address the deferred maintenance backlog. The program was created by the Legislature in 1993 and is funded with revenue from the Real Estate Transfer Tax. The System received about \$19.1 million in FY 2018-19 through this resource.
- **Commonwealth Capital funds** are spent largely on renovation or replacement of existing buildings and infrastructure. The System received \$70 million in capital funds this year, an increase of \$5 million from the prior year. The increased funding is being targeted for demolition of underutilized facilities.

## State System E&G Facilities

➤ Number of Buildings:

**643**

➤ Gross Square Feet:

**16.5 Million**

➤ Replacement Value:

**\$6.5 Billion**

➤ Deferred Maintenance and Capital Renewal Backlog:

**\$1.85 Billion**

### Building Age

52% of E&G Facilities have not had a significant renovation in the last 25 years. At 25 years, facilities maintenance and repair costs increase dramatically.

Source: State System Facilities Office

Figure 65

According to Sightlines, a national firm that specializes in the benchmarking of higher education facilities, the State System is not investing adequately in its facilities (**Figure 66**).

National standards suggest the State System invest at least \$165 million annually in its E&G buildings to prevent further degradation of the facilities. This amount includes a blend of “annual stewardship” (university operating budgets and Key’93 funds or equivalent for recurring maintenance and repair) and “asset reinvestment” (capital funds to address building life cycle renewal and replacement requirements).

The temporary increases in capital funding in recent years helped minimize the impact of underfunding the annual stewardship. However, in each of the last four years the combined investment in both annual stewardship and asset reinvestment fell short of the annual life cycle need by more than \$80 million each year. Continued facility investment at this level will result in significant increases to the State System’s E&G deferred maintenance backlog, which is currently estimated at \$1.7 billion.

## Capital Investment vs Target – E&G

## Shared Educational Programs and Courses

Several opportunities for shared educational programs and courses are available by jointly developing credentialing programs and enabling students at one university to take advantage of courses and programs at others. Acting in a more coordinated fashion in the design and delivery of educational programs, State System universities can ensure students have access to:

- a full breadth of specialized degree programs in high-demand areas including business, health care, education, and STEM.
- courses and programs in important low-demand subjects such as physics, philosophy, and modern languages, where enrollments at one university can be too low to sustain a reasonable breadth of course offerings.
- courses and programs in subjects requiring faculty expertise that are scarce or in short supply
- courses they need to advance toward a degree, but which for a variety of reasons may not be available in the semester or at the time they can take it.

State System universities have had some success with shared academic programming, and faculty are generally supportive of scaling student-centered collaborations. Expansion will take time and investment in the technology and business systems infrastructure required to enable it. Still, on these pages we expect to track our progress in terms of:

- number of credentials produced from jointly managed programs.
- number of collaboratively designed and delivered academic programs.
- efficiency measured by student-faculty ratios.
- number of students taking courses from other universities in the State System.

# Appendix A

## Appendix A-1

### **Pennsylvania's State System of Higher Education Mission Statement**

“The State System of Higher Education shall be part of the Commonwealth’s system of higher education. Its purpose shall be to provide high quality education at the lowest possible cost to students. The primary mission of the System is the provision of instruction for undergraduate and graduate students to and beyond the master’s degree in the liberal arts and sciences and in applied fields, including the teaching profession.”

<sup>1</sup>Reflects the Educational and General Appropriation enacted for FY 2018-19 and FY 2019-20. Reflects the System's appropriation request for FY 2020-21. The Governor's recommendation of \$490.4 million for FY 2020-21 provides a \$12.95 million or 2.7 percent increase in the Educational and General Appropriation. This recommendation has been earmarked to support System Redesign initiatives for core enterprise resource planning upgrades and transition to a common student information system; operating expenditures were increased \$3.4 million for System Redesign to match the total revenue based on the Governor's recommendation (see Appendix A-4.)

<sup>2</sup>The augmentation includes an assumption of a 1.5 percent tuition rate increase in FY 2020-21 and an associated increase in institutional financial aid. The Board of Governors will set tuition at its April 2020 meeting, based upon the System's financial requirements and state appropriations at that time.

<sup>3</sup>FTE Student is defined as follows: annual undergraduate credit hours produced divided by 30 credit hours; annual graduate credit hours produced divided by 24 credit hours.

Note: Numbers may not add due to rounding.

<sup>1</sup>Reflects the first year of a five-year request totaling \$100 million for the State System of Higher Education's System Redesign project that will advance cost-saving and revenue-generating activities for all universities in the following areas: a new online educational platform to allow universities to tap into an underserved higher education market, an expanded IT environment providing high-level cybersecurity and student data services, and creation of a shared services consortium that will eliminate duplicative processes in several areas across the System (e.g., accounts payable, human resourcing, IT), as well as a Student Success Center that will help reform/innovation in areas such as student retention and workforce aligned programming.

<sup>2</sup>The Governor's recommendation of a \$12.95 million increase in the System's E&G appropriation has been earmarked to support System Redesign initiatives for core enterprise resource planning upgrades and transition to a common student information system (see Appendix A-3.)

**Appendix A-4 (cont.)**

**Pennsylvania's State System of Higher Education  
Summary of Special Line Item Appropriation Request  
System Redesign Investment**

**Shared Services Consortium (\$5.85 million):**

The financial challenges facing the universities and the high costs to operate result in the inability for all 14 universities to continue to maintain individual, redundant core administrative functions. Therefore, the System seeks funding to create an administrative back office shared service organization to serve all 14 universities, reducing duplication of work and driving savings. Increased efficiency will be realized through automation of current paper processes and consolidation of activities. Savings will result from reductions in the System's combined data center footprint, software license savings, and staffing reallocation.

**Student Information System (\$12.00 million):**

The transition to a common student information system (SIS) is an essential component to System Redesign. Today, each institution maintains its own student information system (SIS) and interfaces are built between universities to pass data. In order for the System to create a more efficient, forward-looking, sharing System, it will be necessary to first implement and stand up a core SIS infrastructure across the universities. Therefore, the System seeks funding to establish one common platform that all 14 institutions would leverage for student interactions on campus from registration, to course catalogs, grades, transcripts, student tests and assessments, building schedules, tracking attendance, tuition and fees and financial aid. Savings will be realized as the total cost of ownership for SIS solutions is lowered and improved efficiencies are achieved through both employees who interact with the system and students who are served while taking courses from multiple PASSHE universities.

**Redesign for Student Success (\$2.15 million):**

The cornerstone of a sharing system is the redesign of core academic and student functions from 14 universities offering duplicative programs to one where program sharing is enabled, both through master planning and technology. Universities will need assistance to transition business models and will require peer consulting and technology enablement to improve student experiences and reduce student costs. The introduction of comprehensive online capabilities will increase overall System revenue and allow the System to enter into new markets (adult, credential, etc.), thus increasing access to higher education across the Commonwealth. Increased efficiency will be realized through academic master planning for the System, introduction of technology to enable shared online offerings, and introduction of technology to improve student engagement, resulting in improvements in retention, completion and recruitment in new markets.

PENNSYLVANIA'S STATE SYSTEM OF HIGHER EDUCATION

**Appendix A-5**

**Pennsylvania Higher Education Assistance Agency (PHEAA)  
 Appropriation for Cheyney Keystone Academy  
 of Pennsylvania's State System of Higher Education  
 (Dollar Amounts in Thousands)**

<b>Source of Funds</b>	<b>Actual 2018-19</b>	<b>Current 2019-20</b>	<b>Budget Request 2020-21</b>	<b>Governor's Budget 2020-21</b>

<b>Total</b>	<b>102</b>	<b>157</b>	<b>216</b>	<b>216</b>
<b>Employees (FTE)</b>	<b>9.10</b>	<b>6.10</b>	<b>6.20</b>	<b>6.20</b>

<sup>1</sup>The Governor's recommendation of a \$5.0 million appropriation in FY 2020-21 provides a 25 percent increase in funding for the Keystone Academy Appropriation over the total amount received in FY 2019-20.

<sup>2</sup>Primarily scholarships. In addition, the appropriation also supports other direct program costs; and, beginning in FY 2017-18, related indirect costs.

<sup>3</sup>If FY 2020-21 is funded at the Governor's recommended level, approximately 216 students may be served through this program. Over the last five years, on average, 84 Keystone Academy students receive the Keystone Academy Scholarships. In fall 2019, 157 students are scholarship recipients.

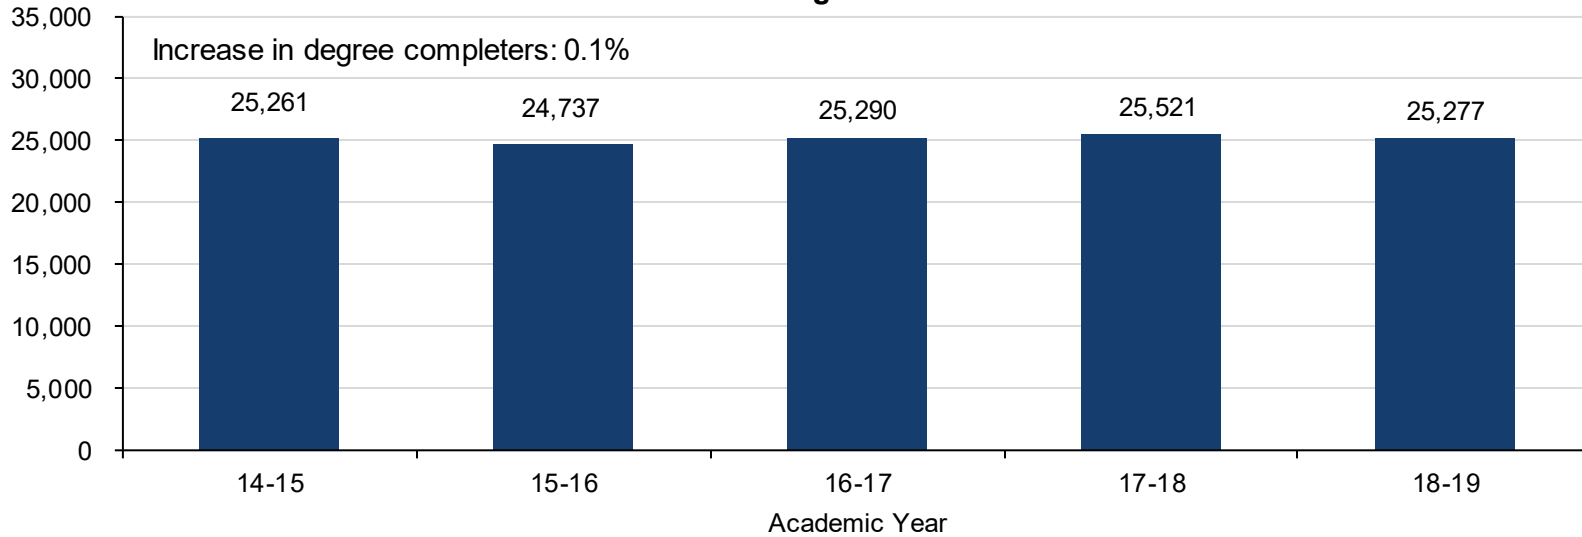

Note: The line item appropriation has been funded as a special program within PHEAA's budget since FY 1999-00. It is critical to the recruitment and retention of students at Cheyney University and is vital to the success of the institution and its students.

Notes:

Methodology changed in 2013 to only count completed applications.

Native Hawaiian/Pacific Islander and Two or More Races first reported in 2010. Prior to 2010, Pacific Islander was reported with Asian.

Beginning in 2014, Nonresident Alien applicants who meet domicile requirements are included in Pennsylvania counts. Previously, they were considered out-of-state students.

Programs and Services for Military Members and Veterans

State System universities offer a wide range of programs and services for military members, veterans, and their families. Their efforts continue to receive national recognition. Victory Media, publisher of *G.I. Jobs* magazine, this year again named 13 of the universities “Military Friendly® Schools,” a designation awarded annually to colleges, universities, and trade schools in recognition of their efforts to ensure the academic success of military service members, veterans, and their spouses. Several of the universities have qualified for this select honor roll for multiple years in a row.

Additionally, *Military Advanced Education* magazine's *2018 Guide to Top Colleges and Universities*, which compares schools based on their military culture, financial assistance, flexibility, and on-campus and online support provided to students serving in the military, includes six State System universities.

Slippery Rock University participates in the Troops to Teachers program, which provides accelerated training toward teaching certification for veterans with bachelor's degrees. Veterans can earn a Pennsylvania instructional certificate to teach mathematics and the sciences in grades 7-12 and foreign languages across the K-12 spectrum. Veterans must hold at least a bachelor's degree and register on the National Troops to Teachers registry to participate. Certification costs are discounted and application processing is expedited.

All 14 universities provide military veterans with preference in course scheduling. The universities also offer in-state tuition rates to qualified veterans and their dependents regardless of state residency status under the Veterans Access, Choice, and Accountability Act.

Below are more examples of the individual programs and services State System universities provide to military members, veterans, their spouses, and dependents:

- Bloomsburg University's** Office of Military and Veterans Resources provides current and former military members, their spouses, and their dependents assistance when seeking and utilizing different forms of financial aid through their respective branch of service, including through the GI Bill, Federal Tuition Assistance, and the Educational Assistance Program. The university also provides a military-specific academic adviser for all military students for anything the students need. Bloomsburg was awarded Silver Level status as a Military Friendly® school this year. The university ranked in the top 20 percent of colleges, universities, and trade schools in the country working to embrace military service members, veterans, and spouses as students and helping to ensure their success on campus. To help meet the needs of military students, the university also established a military resource center. The BU Student Veterans Association offers opportunities for social and educational activities and is involved in fundraisers and community service to benefit organizations such as the National Alliance to End Veterans Suicide and the American Red Cross. Lastly, Bloomsburg University has implemented an innovative program designed to translate military training and experience into

## PENNSYLVANIA'S STATE SYSTEM OF HIGHER EDUCATION

experiential college level credit on an individualized basis. This program is known as the MAC-RB (Military Academic Credit Review Board).

- **California University of Pennsylvania's** dedicated Military and Veterans Center of Excellence provides resources for veterans, assists with benefits, and provides support for current and former service members, reservist, and their eligible family members. In addition, service members around the world are enrolled in 100 percent online degree programs through Cal U Global Online, which offers a discounted tuition rate for active-duty military, veterans, and their eligible dependents. Cal U has been recognized as a Military Friendly School for the past nine years; it also is recognized as a Vietnam War Commemorative Partner. Cal U is active in the National Association of Veterans' Program Administrators and the Western Pennsylvania Veterans Academic Alliance, and it recognizes student veterans for their academic and service achievements through the SALUTE honor society. Dating back to the early 1970s, Cal U's Veterans Club and Student Veterans chapter is one of the most active clubs on campus.
  - **Cheyney University** welcomes all veterans, eligible dependents, members of the National Guard and Reserves, and active duty personnel and is committed to meeting their educational and campus community goals. The Office of the Registrar provides information about GI Bill and other available educational benefits and is the office where veterans, eligible dependents, members of the National Guard, and selected reserves may apply for their benefits.
  - **Clarion University** strives to support the transition of students from the military to higher education. The university has a director of veteran services and a Veteran Service Office staffed by student veteran workers, along with an adjacent veterans' lounge. The VSO is the advocate for student veterans on campus, assisting in coordination with registration, financial services, GI Bill, disability services, admissions, and tutoring services. The VSO performs GI Bill certifications and reviews and makes recommendations for transfer credits based on military experience and training. It is also involved with new student and new faculty orientation, ensuring the awareness of veteran programs and sensitivity to veteran issues. A Campus Veterans Committee includes representatives from administrative offices across campus. The university maintains a Student Veterans of America Club on its Clarion Campus and a Veterans Club on the Venango Campus. The university has teamed with Butler VA to provide mental health care for student veterans via a Tele-Health Program. Clarion's Department of Library Science is collaborating with the Library of Congress to conduct interviews for the Veterans History Project.
- 
- **East Stroudsburg University's** Student Veterans Center is a one-stop shop that assists students with everything from applying for financial aid and veterans' benefits to registering for classes and helping to ensure they are prepared for graduation. It processes all veteran education benefits, including Federal Tuition Assistance, the Educational Assistance Program, GI Bill, and ROTC scholarships for Army and Air Force. The center, which is a designated Green Zone, also hosts a series of weekly meetings for veterans on a variety of topics ranging from employment opportunities to healthcare. The Veterans Task Force meets regularly to identify issues that student veterans are experiencing, and implements strategies to help alleviate some of these issues and concerns. ESU extends credit for military training and service, DANTE's, and CLEP tests. The university holds a veteran meet and greet every academic semester, a 9/11 moving flag tribute, and a Veterans Day celebration. The Veterans of ESU Club is part of the Student Veterans of America and two members

## PENNSYLVANIA'S STATE SYSTEM OF HIGHER EDUCATION

attended the SVA Conference in Orlando in January 2019. ESU is part of the National Association for Veterans and Program Administrators, A's for Vets, Monroe County Veterans Association, and the NEPA Veterans Education Representatives group.

- Edinboro University** has been recognized among the top 15 percent of higher education institutions nationwide in service to veterans, earning *G.I. Jobs'* Military Friendly® designation in each of the last 10 years, earning Gold status in 2018. At the center of the university's support for veterans and military families is the EU Veterans Success Center, which was founded on campus in 2012. The center serves as a one-stop shop for assistance to veterans, active military, and military dependents, providing expert guidance for all GI Bill programs and other services. Also, Edinboro University and the Erie Veterans Affairs Medical Center have partnered to make VA Telehealth Services available to veterans through the university's Ghering Health Center and through the organization's mobile applications.
- Indiana University of Pennsylvania's** Military and Veterans Resource Center (MVRC) serves as a one-stop shop, providing a wide range of services for military, veterans, and military-affiliated students and family members. Student workers who are veterans or military-affiliated staff the center. More than 4,000 individuals have visited the MVRC since its opening, and staff members have helped more than 750 IUP students to use their GI Bill benefits. The center also coordinates special Veterans' Day events and campus-wide programming. IUP has an active Veterans Outreach Committee that meets regularly to improve university services to students who are veterans, a Veterans Support Group, and a Student Veterans Organization. The MVRC director sits on a number of advisory boards of organizations that provide assistance to veterans and their families. IUP has one of the largest Reserve Officers Training Corps (ROTC) in Pennsylvania, commissioning its 2,000th cadet in May 2015 and counting 12 generals among its ROTC graduates. The IUP ROTC program has earned the MacArthur Award, a national award given to the top programs in the country. IUP ROTC is also a three-time recipient of the Governor's Trophy, presented to the most outstanding military science program at a Pennsylvania college or university. IUP is a Yellow Ribbon university and is recognized routinely by military publications for excellence.
- Kutztown University** provides a military-supportive atmosphere in a thriving campus environment. This supportive atmosphere starts with a committed and knowledgeable staff and a centrally located Veterans Services Center, a USO-style resource center that provides a place where students can study, relax, and meet other military-affiliated students. A single point-of-contact provides assistance and coordinates needed services for students and staff. To make the pursuit of academic goals more manageable, veteran's liaisons offer services such as veteran benefits guidance (i.e. GI Bill, TA, EAP), financial assistance, academic advising, career planning, counseling, and disability services. Military-related leadership and student-organization opportunities exist such as Army ROTC, an active Military Club @ KU, the Women Veterans Committee, and SALUTE Veterans National Honor Society. Graduating student-veterans receive Patriotic honor cords for their achievement. Faculty and staff participate in Veterans Green Zone sensitivity training and an advisory board consisting of administrators, faculty, staff, student-veterans, and local VA and veteran-related organizations meet regularly to improve university services. Additionally, KU awards credit for military training, CLEP and DANTES, and participates in the MyCAA spouse program.

## PENNSYLVANIA'S STATE SYSTEM OF HIGHER EDUCATION

- **Lock Haven University's** veterans' advisory group meets monthly to coordinate university efforts in identifying and meeting the needs of student veterans, as well as veterans in the community. The group coordinates Veterans' Appreciation Month activities celebrated in November, including an on-campus Community Veterans' Expo, a Veteran Pinning Ceremony, and LHU Army ROTC's Commemorative Run. In addition, LHU's Student Veterans Alliance serves as a liaison for student veterans, providing a variety of resources and special services, including personal and financial counseling. A Veteran's Center is available for all military and veteran students.
- **Mansfield University** waives the application fee for all veterans. The Office of Military and Veterans Affairs offers counseling to enrolled veterans on benefits, career resources, and more. MU is a Yellow Ribbon Program participant. Mansfield University's Veteran's Support Group is comprised of campus and surrounding community professionals who meet regularly to discuss and implement ways to support military and veteran students, faculty, and staff. The MU chapter of Student Veterans of America (MUSVO) is open to all students, faculty, and staff who have served or are serving in the military. MUSVO offers a program that pairs each incoming student veteran with a current student veteran as a mentor. The group also offers several programs throughout the year for veterans and the entire campus community. The university's Military Resource Center has computers, study space, a television, refrigerator, and microwave for student veterans to use. Several scholarships have been established at MU to provide recognition and financial assistance to veterans and active-duty personnel.
- **Millersville University** provides an organization and resources for veterans to receive academic support and assistance in attending, transitioning through, and successfully graduating from college. Housed on campus at the Mercer House, the Veterans Resource Center and the Student Veterans Association welcome veterans to share their experiences and explore opportunities for resources and leadership on campus and in the community. It also serves as a source of fellowship and support for families of soldiers who are currently deployed or preparing for deployment. A veterans' coordinator on staff handles paperwork for individuals applying for educational benefits from the Department of Veterans Affairs and ensures that veterans receive all of the benefits they are entitled to, including qualifying for the in-state tuition rate. Millersville coordinates with the VA's work-study program to ensure that the students staffing the VRC are also GI-Bill recipients, and a Veterans' Task Force meets regularly to assess changes in options or needs. Millersville was recognized for being among the 2017 Military Friendly® Employers and Schools and was honored with the Seven Seals Award by the Employer Support of the Guard and Reserve. Millersville participates in the Concurrent Admissions Program with the Army, Army Reserves, and Army National Guard. In addition, Millersville offers a two-part, four-year program in military science, ROTC.
- **Shippensburg University** offers a variety of programs and assistance-based services for military service members, veterans, and their dependents. These services are centralized through the Veterans Service Office, whose mission is to help simplify the transition to continuing education. The Veterans Resource Center in the student union building is a relaxing place to study, eat, and converse with like-minded students. Additional learning and outreach opportunities for student veterans include an active Student Veterans of America chapter and the Army ROTC Raider Battalion. The campus is an easy commute from Letterkenny Army Depot, U.S. Army War College in Carlisle, Navy Support Activity in Mechanicsburg, National Guard Training Center at Fort Indiantown Gap, and Army Medical Command installation at Fort Detrick.

## PENNSYLVANIA'S STATE SYSTEM OF HIGHER EDUCATION

- **Slippery Rock University** sponsors a Student Veterans Center, providing veterans, their dependents, active duty personnel, reserve and National Guard members, and ROTC cadets a place to gather, share information, and relax. The center's location in the Smith Student Center supports a synergy and integration among student veterans, the Student Government Association, and other student organizations. SRU's Student Veterans Association offers opportunities for social and educational activities and is involved in fundraisers to benefit organizations such as the Wounded Warrior Foundation and the American Red Cross. SRU is utilizing grant money from the U.S. Department of Veterans Affairs for an equine-assisted recreation program, which provides recreational therapy to veterans at the university's Storm Harbor Equestrian Center. SRU was the first university in the country to participate in the Veterans Administration's Telehealth system. Students are eligible to participate in the Army Reserve Officers' Training Corps program. The university annually promotes several "Salute to the Military" activities at which former, current, and future military personnel are recognized and receive free admission. SRU has received a grant from the Pennsylvania Department of Education to prepare military veterans for teaching jobs in school districts and subjects that are in need of certified teachers.
- **West Chester University** offers scholarships for returning veterans and provides a variety of services through its Veterans Center and the Student Veterans Group, including a weekly support group. The Veterans Center regularly connects with West Chester VFW Post 106 for breakfast, support, and networking. Students are eligible to participate in the Army Reserve Officers' Training Corps (ROTC) program through a formal cross-enrollment agreement with the Widener University Department of Military Science and in the Air Force Reserve Officer Training Corps (AFROTC) through an agreement with Saint Joseph's University. The Greg and Sandra Weisenstein Veterans Center at West Chester strives to create an intentional culture of understanding, acceptance, and success for veterans, active military, and those who support them. The Veteran Center facilitates communication among campus offices to provide a coordinated system of service for a meaningful transition from the military to college. West Chester ranked 38<sup>th</sup> in the 2019 version of *U.S. & World Report's* Best Colleges for Veterans.

---

**Military Friendly® Schools** (as designated by Victory Media, publisher of *G.I. Jobs* magazine): Bloomsburg, California, Clarion, East Stroudsburg, Edinboro, Indiana, Kutztown, Lock Haven, Mansfield, Millersville, Shippensburg, Slippery Rock, and West Chester Universities

**Top Schools** (as designated by KMI Media Group, publisher of *Military Advanced Education* magazine's *2018 Guide to Top Colleges and Universities*): California, Clarion, Edinboro, Kutztown, Mansfield, and West Chester Universities

**2018-19 Yellow Ribbon Program participants** (with U.S. Department of Veterans Affairs): East Stroudsburg, Indiana, Kutztown, Lock Haven, Mansfield, and West Chester Universities
